PREFACE.

The preparation of the decennial edition of this work for 1920 has required an amount of labor which could not have been foreseen by the founder of the Register. When the edition of 1890—the third—was published, the law authorized for the Corps of Cadets one from each congressional district, one from each territory, one from the District of Columbia and ten from the United States at large. The maximum number possible at that time was, therefore, 345; but, because of dismissals and other casualties, the classes at graduation rarely exceeded 75, and had averaged for more than half a century only about 45 in number.

It was not until the close of the next decade that an addition was made to the maximum number of cadets allowed by law. This was done by the Act of June 6, 1900, which provided for the appointment of two from each state at large and thirty from the United States at large, an authorized increase of 126. There was a further slight increase of ten from the United States at large by the Act of June 28, 1902, and of four Filipinos by the Act of May 28, 1908, making the total authorized, 471. These increases had for the period 1900 to 1910 the effect of swelling the size of the average graduating class to 94.

By the Act of May 4, 1916, the authorized number of cadets was increased more than two and a half times. This Act provides for the appointment of two from each congressional district, two from each territory, four from the District of Columbia, four from natives of Porto Rico, four from each state at large, eighty from the United States at large and one hundred and eighty from enlisted men of the Regular Army and the National Guard, the increases to take place in four annual increments. The appointment of the four Filipinos was still authorized so that the total number now allowed by law is 1254.

The result of the latest legislation began to show in 1915, when the graduating class numbered 164. The classes of 1916, 1917 and 1918 numbered 125, 139 and 150, respectively. On account of the war with the Central Powers of Europe, which began April 6, 1917, the classes of 1918, 1919, 1920 and 1921 were graduated ahead of time, that of 1918 being turned out in August, 1917; that of 1919 in June, 1918, and those of 1920 and 1921, November 1, 1918, the last three numbering 137, 227, and 284, respectively.

Between 1890 and 1900 the total number of graduates was 609; between 1900 and 1910 the number was 942, the average for the two periods being 60 and 94, respectively. Between 1910 and 1920 the total number graduated was 1875, an annual average of 187. Thus, in the ten years elapsing since 1910 there are to be added to the Register nearly one-half as many names as are contained in the edition of 1890, which covered a period of eighty-eight years.

In submitting the edition for 1920, the present editor desires to repeat with emphasis the regret of General Cullum in his preface to the third edition, that the work could not be made as complete as might be desired because so large a number of those to whom letters and circulars have been sent have failed to make reply.

He wishes to express his grateful appreciation, especially to Major A. E. Potts, for assistance received in preparing these records.

WIRT ROBINSON,

Colonel and Professor, U. S. M. A.

West Point, N. Y.,
September 1, 1920.

NOTE.

In the following pages a † after the name of a graduate signifies that the graduate is dead. If the death occurred before 1890, it is recorded in the third edition of the Register (1891); if between 1890 and 1900, in the fourth edition (1900); if between 1900 and 1910, in the fifth edition (1910); if the death occurred before 1910, but was not known till after this date, it is noted in this volume.

A * after the name of a graduate usually refers to a foot-note giving the name of the graduate's father. The names are printed in the text in the order of graduation and class rank. In the Index the names are arranged alphabetically.

It is requested that graduates who consult this volume will communicate to the Secretary of the Association of Graduates, at West Point, any additions or corrections which ought to be made in a subsequent edition.

This is the Supplement, Volume VI, 1910-1920, to the Biographical Register of the Officers and Graduates of the U. S. Military Academy at West Point, N. Y., since its establishment in 1802, by Brevet-Major-General George W. Cullum, Colonel of Engineers, U. S. Army, retired. Edited by Colonel Wirt Robinson, U. S. A. Printed by Seemann & Peters, Saginaw, Michigan, 1920. 8vo.

BRIGADIER-GENERAL, CHIEF OF ORDNANCE, APRIL 5, 1899.

BRIGADIER-GENERAL, U. S. A., RETIRED, NOV. 22, 1901,

BY OPERATION OF LAW.

During the two years and eight months that he was Chief of Ordnance, he brought about changes of far-reaching consequence; viz:

First, the substitution of nitro-cellulose for nitro-glycerine powder for the Army, this involving the enlargement of the gun chambers;

Second, the solving of the problem of the effect of exterior explosion versus penetration and interior explosion; the former by means of the 18-inch Gathman torpedo gun, throwing a shell containing about 500 pounds of wet gun cotton; the latter by the service 12-inch rifle, against

targets exactly alike, representing the side of the latest battle ship, armored with 12½ inches of Kruppized steel. The *first* Gathman shell exploded on the center of its target, producing no effect and would not have endangered a ship by striking its armor belt; the *first* 12-inch rifle shell passed through the center of its target, exploding and wrecking everything in rear of it. (See pp. 768-769, Report of Chief of Ordnance, 1901.)

Placed temporarily in charge of Engineering District of San Francisco, Cal., July 9, 1910, to Jan. 10, 1911, while the officer in charge was absent on duty under the Reclamation Bureau of the Department of the Interior.

While in charge of the ship channel connecting the waters of the Great Lakes between Chicago, Duluth and Buffalo, submitted in 1906 a project for a new lock and canal at St. Mary's Falls, Mich., at an estimated cost of \$6,200,000 with provision for a fourth lock, should such a lock be needed in the future. The canal and third lock were built and opened to traffic in 1914, and the fourth lock is now (1918) under construction. This lock is 1350 feet long,—longer than the Panama locks—80 feet wide and has 24½ feet of water upon the miter sills. This canal and lock have been referred to on the floor of Congress as the Davis Lock and Canal.
