Officers and Cadets
OF THE
United States Military Academy

WEST POINT, NEW YORK
JUNE, 1907

"I give it as my fixed opinion that, but for our graduated cadets, the war between the United States and Mexico might, and probably would, have lasted some four or five years, with, in its first half, more defeats than victories falling to our share; whereas, in less than two campaigns, we conquered a great country and a peace, without the loss of a single battle or skirmish."

WINFIELD SCOTT.

AND BINDERY

BOARD OF VISITORS

JUNE, 1907.

Appointed by the President of the United States.

1. Brigadier General THOMAS WARD, U. S. A., retired,
(President) ROCHESTER, N. Y.
2. General BIRD W. SPENCER PASSAIC, N. J.
3. Mr. GEORGE H. NEWMAN FAYETTEVILLE, TENN.
4. Dr. ROSWELL PARK BUFFALO, N. Y.
5. Colonel A. R. LAWTON SAVANNAH, GA.
6. Mr. ARCHIBALD HOPKINS WASHINGTON, D. C.
7. Honorable N. T. GUERNSEY DES MOINES, IA.

Appointed by the Vice-President.

8. Honorable N. B. SCOTT WEST VIRGINIA
9. Honorable A. O. BACON, (Vice-President) GEORGIA

Appointed by the Speaker of the House of Representatives.

10. Honorable JOHN A. T. HULL IOWA
11. Honorable JOHN W. DWIGHT, (Secretary) NEW YORK
12. *Honorable JAMES HAY VIRGINIA

*Not present.

HISTORICAL SKETCH.

The United States Military Academy is a school for the practical and theoretical training of cadets for the military service. Upon completing its course satisfactorily, cadets are eligible for promotion and commission as second lieutenants in any arm or corps of the Army the duties of which they have been judged competent to perform.

The supervision and charge of the Academy are in the War Department under such officer or officers as the Secretary of War may assign to that duty (section 1331, Revised Statutes). In conformity with the provisions of this section, the Chief of Staff has been, by direction of the Secretary, charged with the supervision of matters in the War Department pertaining to the Academy.

The occupation of West Point as a military post took place on January 20, 1778, and has been continuous since that date. The earliest proposal for a military school for the United States was that of Brigadier General Henry Knox, Chief of Artillery (May, 1776). His plans were seconded by Colonel Alexander Hamilton and approved by General Washington, though they were not adopted in the form suggested before 1802, other counsels having temporarily prevailed.

On October 1, 1776 Congress passed a resolution appointing a committee to prepare a plan for "A Military Academy at the Army." The result was the resolution of June 20, 1777, providing for a Corps of Invalids "to serve as a military school for young gentlemen previous to their being appointed to marching regiments." The Invalid Corps was organized in July, 1777, and in 1781, at the request of Washington, was marched from Philadelphia to form part of the garrison at West Point, where an engineer school, a laboratory, and a library had already been established in three separate buildings.

On March 30, 1779, the Board of War adopted regulations for the Corps of Engineers and for the Sappers and Miners. These were promulgated in orders, July 30, 1779, by General Washington and provided for a plan of instruction to be carried into effect after approval by the Board and by the General-in-Chief. The plan contemplated lectures, by engineer officers, on fortification, mining, reconnaissance, encampments and the like. Practical experiments in gunnery were conducted at West Point as early as February, 1780. In 1783, after the cessation of hostilities, Washington, having been called upon for his views as to the peace establishment, laid the matter of a Military Academy before his officers at Newburg. He referred to it again in his message on December 3, 1793. The law of May 9, 1794, authorized the organization of a Corps of Artillerists and Engineers with two cadets to a company, thus creating the new grade of "cadet" in the American Army. A school for the Artillerists and Engineers, and for the cadets attached to the Corps, was established, on the recommendation of Washington, by order,

at West Point in 1794. The destruction of its buildings by fire, in 1796, caused its suspension. In July, 1801, the Secretary of War directed that all the cadets of the Corps of Artillerists should report at West Point for instruction, and in September, a school was opened with four army officers and a civilian as administrators and instructors.

An Act of Congress approved March 16, 1802, authorized the President to organize and establish a Corps of Engineers to consist of five officers and ten cadets, and provided that it should be stationed at West Point, in the State of New York, and should constitute a Military Academy. The Academy with ten cadets present, was formally opened July 4, the year of the Act.

Acts of Congress, in 1802 and 1808, authorized 40 cadets from the Artillery, 100 from the Infantry, 16 from the Dragoons, and 20 from the Riflemen; few of these were appointed, and no provision was made for them at the Academy. In 1810, the Academy was deprived of nearly all means of instruction, and officers and cadets had difficulty in obtaining their pay. During most of the year 1811, and a part of 1812, although war was imminent, academic instruction was practically abandoned. In March, 1812, the Academy was without a single instructor. Up to and including this time, 88 cadets had been graduated; they had entered without mental or physical examination, at all ages from 12 to 34, and at various times during the year.

By Act of Congress of April 29, 1812, the Academy was reorganized. The provisions of this Act have furnished the general principles upon which the Military Academy has since been conducted and controlled; a more adequate corps of professors was authorized; a maximum of 250 cadets was fixed; and the age and the mental requisites for admission were prescribed.

In 1817, under the provisions of the Act of 1812, and the able superintendency of Major Sylvanus Thayer, Corps of Engineers, the present era in the Academy's history opened.

Until 1843, a prescribed residence was not a legal qualification for appointment, but the selection of one cadet from each Congressional district had grown to be customary. In this year the custom became the law, Congress prescribing that the Corps of Cadets should consist of one from each Congressional district, one from each Territory, one from the District of Columbia, and ten from the United States at large, to be appointed by the President.

By Acts of Congress approved June 6, 1900, June 28, 1902, and March 3, 1903, the Corps of Cadets as now constituted consists of one from each Congressional district, one from each Territory, one from the District of Columbia, one from Porto Rico, two from each State at large, and forty from the United States at large, all to be appointed by the President. Those cadets appointed from States or Territories must be actual residents of the Congressional or Territorial districts, or of the District of Columbia, or of the States, respectively, from which they are appointed. Under these Acts, and under the apportionment of Members of Congress according to the 12th Census, the maximum number of cadets is 522.

The total number of graduates from 1802 to 1907 inclusive is 4641.

SUPERINTENDENTS OF THE UNITED STATES MILITARY ACADEMY.

26	HUGH L. SCOTT.....	Major 14th Cavalry.....	Aug. 31, 1906

NOTE.—The selection of the Superintendents of the Military Academy was confined to the Corps of Engineers from the establishment of the Institution, March 16, 1802, till the passage of the law of July 13, 1866, which opened it to the entire Army. By the Act of June 12, 1884, the local rank of Colonel was conferred upon the Superintendent.

† Major Williams resigned June 20, 1803, on a point of command, and pending its settlement until April 19, 1805, when he again returned to service as Chief of Engineers present for duty. The Superintendent of the Military Academy was appointed, the command devolving upon the senior officer of the Corps of Engineers.

§ Bvt. Major P. G. T. Beauregard, Corps of Engineers, by order of John B. Floyd, Secretary of War, relieved Colonel Delafield, Jan. 23, 1861, from the superintendency of the Military Academy, but was himself displaced five days later, Jan. 28, 1861, by direction of the succeeding Secretary of War, Joseph Holt, the command again devolving upon Colonel Delafield.

United States Military Academy

WEST POINT, NEW YORK

Superintendent.

COLONEL HUGH L. SCOTT,
Major, 14th Cavalry.

Military Staff.

Captain FRANK W. COE, Coast Artillery Corps, *Adjutant of the Military Academy and of the Post; Recruiting Officer.*

Major JOHN M. CARSON, Jr., Quartermaster, *Quartermaster of the Military Academy and of the Post; Disbursing Officer; in charge of construction.*

1st Lieutenant WILLIAM S. BROWNING, 1st Field Artillery, *Commissary.*

Captain THOMAS FRANKLIN, Commissary, *Treasurer of the Military Academy, and Quartermaster and Commissary of the Battalion of Cadets.*

Lieutenant Colonel CHARLES M. GANDY, Medical Department, U. S. A., *Surgeon.*

Captain OSCAR J. CHARLES, 17th Infantry. *On duty at Headquarters Military Academy.*

Captain SAM F. BOTTOMS, Commissary, *in charge of Post Exchange.*

Captain HORTON W. STICKLE, Corps of Engineers, *Assistant to the officer in charge of construction.*

Captain ROBERT C. FOY, 10th Cavalry, *Assistant to Quartermaster.*

1st Lieutenant WALTER D. SMITH, 14th Cavalry, *Assistant to Quartermaster.*

1st Lieutenant JOHN W. HANNER, Assistant Surgeon, U. S. A.

1st Lieutenant ROBERT C. LOVING, Assistant Surgeon, U. S. A.

*1st Lieutenant LLOYD L. SMITH, Assistant Surgeon, U. S. A.

*Absent on detached service since April 1, 1907.

Academic Staff.

Professors whose service at the Academy, as Professor, exceeds ten years, have the rank, pay and allowances of Colonel, and all other Professors the rank, pay and allowances of Lieutenant Colonel. The Academic Departments are arranged in the order in which they were created by law.

DEPARTMENT OF TACTICS.

Robert L. Howze, Lieutenant Colonel, U. S. A. (Captain, 6th Cavalry), *Commandant of Cadets and Instructor of Tactics.*

Captain FRANCIS C. MARSHALL, 15th Cavalry, *Senior Instructor of Cavalry Tactics.*

Captain MORTON F. SMITH, 20th Infantry, *Senior Instructor of Infantry Tactics.*

Captain MERCH B. STEWART, 8th Infantry, *Assistant Instructor of Tactics. Commanding Company of Cadets.*

Captain CHARLES P. SUMMERALL, 3d Field Artillery, *Senior Instructor of Artillery Tactics.*

Captain HENRY L. NEWBOLD, 4th Field Artillery, *Assistant Instructor of Tactics. Commanding Company of Cadets.*

Captain CHARLES W. EXTON, 20th Infantry, *Assistant Instructor of Tactics. Commanding Company of Cadets.*

Captain HERMAN J. KOEHLER, U. S. Army, *Master of the Sword. Instructor of Military Gymnastics and Physical Culture.*

Captain LLEWELLYN W. OLIVER, 12th Cavalry, *Assistant Instructor of Tactics. Commanding Company of Cadets.*

Captain GEORGE S. SIMONDS, 22d Infantry, *Assistant Instructor of Tactics. Commanding Company of Cadets.*

*Captain CHARLES M. BUNDEL, 16th Infantry, *Assistant Instructor of Tactics. Commanding Company of Cadets.*

1st Lieutenant HERMAN GLADE, 6th Infantry, *Assistant Instructor of Tactics and Gymnastics.*

1st Lieutenant GUY KENT, 1st Cavalry, *Assistant Instructor of Tactics. Commanding Company of Cadets.*

2d Lieutenant BENJAMIN E. GREY, 29th Infantry, *Assistant Instructor of Tactics and Gymnastics.*

CIVILIAN INSTRUCTORS.

†Appointed Assistant Professor, June 15, 1907.

DEPARTMENT OF LAW AND HISTORY.

Edgar S. Dudley, LL.B., LL.D., Colonel and Judge Advocate, U. S. A., *Professor*.
(By assignment under Act 6 June, 1874.)

Captain IRVIN L. HUNT, 6th Infantry, *Assistant Professor*.

Captain SAMUEL T. ANSELL, 8th Infantry,

Captain CLEMENT A. TROTT, 5th Infantry,

Captain EDWIN G. DAVIS, Coast Artillery Corps,

1st Lieutenant MARION W. HOWZE, 3d Field Artillery,

2d Lieutenant GRAYSON M-P. MURPHY, 17th Infantry,

} *Instructors.*

DEPARTMENT OF PRACTICAL MILITARY ENGINEERING,
MILITARY SIGNALING AND TELEGRAPHY.

Charles W. Kutz, Captain, Corps of Engineers, *Instructor*.

Captain MICHAEL J. McDONOUGH, Corps of Engineers, *Senior Assistant Instructor*.

DEPARTMENT OF ORDNANCE AND SCIENCE OF GUNNERY.

Ormond M. Lissak, Lieutenant Colonel, U. S. A., *Professor*.

Captain EDWARD P. O'HERN, Ordnance Department, *Senior Assistant Instructor*.

1st Lieutenant WILLIAM P. ENNIS, 2d Field Artillery,

1st Lieutenant THOMAS E. SELFRIDGE, 5th Field Artillery,

} *Instructors.*

DEPARTMENT OF MILITARY HYGIENE.

Charles M. Gandy, Lieut. Colonel, U. S. A. (Major, Medical Department), *Professor*.

Edward S. Holden, M. A., Sc.D., LL.D., *Librarian*. (1 July, 1902.)

Edward S. Travers, *Chaplain*. (1 Dec., 1905.)

Robert T. Oliver, *Examining and Supervising Dental Surgeon*. (16 Jan., 1905.)

William H. Chambers, *Dental Surgeon*. (30 June, 1907.)

George T. Tyler, *Contract Surgeon*. (14 April, 1907.)

George Essigke, *Teacher of Music*. (15 Oct., 1895.)

Roy L. Marston, M. F., *Forester*. (1 April, 1905.)

BATTALION ORGANIZATION.

For instruction in infantry drill regulations and in military police and discipline, the Cadets are organized into a battalion, under the Commandant of Cadets, each company being commanded by an officer of the Army. The officers and non-commissioned officers are selected from those Cadets who have been most studious, soldier-like in the performance of their duties, and most exemplary in their general deportment. In general, the captains and lieutenants are taken from the first class, the sergeants from the second class, and the corporals from the third class.

JUNE 12, 1907.

CLASSIFICATION OF CADETS.

The Cadets are arranged in four distinct classes, corresponding with the four years of study. The Cadets employed on the first year's course constitute the **FOURTH CLASS**; those on the second year's course the **THIRD CLASS**; those on the third year's course the **SECOND CLASS**; and those on the fourth year's course the **FIRST CLASS**.

The academic year commences on the 1st of July. On, or before, that date the result of the examination held in the preceding month is announced and Cadets are advanced from one class to another. At no other time is a Cadet advanced from one class to another, unless prevented by sickness, or authorized absence, from attending the aforesaid examination; in such a case a special examination is granted; but in no case is a Cadet advanced from one class to another without having satisfied the Academic Board of his proficiency in each branch of study pursued by his class.

*NOTE.—Names marked thus * in the following pages are to be attached to the next Army Register, in conformity with a regulation for the government of the Military Academy, requiring the names of the most distinguished Cadets, not exceeding five in each class, to be reported for this purpose at each Annual Examination. This practice was instituted February 10, 1818, by Hon. John Calhoun, Secretary of War.*

Cadets whose names are marked thus † were found deficient, and turned back, to join the next succeeding class.

Cadets whose names are marked thus ‡ were found deficient, and discharged.

The count for conduct, based upon the number of demerit received by a cadet each year, is

First class year.....	125,
Second class year.....	100,
Third class year.....	75,
Fourth class year.....	50.

The final count in conduct for the graduating merit roll is 125. It is obtained by adding together the respective proportional parts for each of the four years, and then reducing the sums thus found to equivalent values with a maximum of 125.

^a Absent with leave (sick) March 14, 1905, to August 23, 1905.

^b Turned back to join Fourth Class, June 17, 1905, for deficiency in Mathematics.

^c Receiving instruction under the provisions of a Joint Resolution of Congress, approved March 3, 1905.

Changes in the Class since June 30, 1906.

Barnett, Chester P. Discharged December 28, 1906, for deficiency in Mathematics.

Carroll, Philip H. Discharged May 2, 1907, for deficiency in Mathematics.

Chipman, Guy W. Turned back to join 4th Class, January 5, 1907, for deficiency in Mathematics.

Hulen, Harry. Resigned June 1, 1907.

Jennings, Robert E. Discharged January 5, 1907, for deficiency in Mathematics.

Mathues, William F. Turned back to join 4th Class, December 28, 1906, for deficiency in Mathematics. (Resigned January 23, 1907.)

Paxton, John K. Discharged November 1, 1906, for deficiency in Mathematics.

Plaza, Frutos T. Receiving instruction under the provisions of a Joint Resolution of Congress, approved January 18, 1905. Withdrew February 28, 1907.

Tull, Isaac W. Discharged December 28, 1906, for deficiency in Mathematics.

Vogt, William F. C. Discharged January 5, 1907, for deficiency in Mathematics.

Waldron, Arthur W. Discharged December 28, 1906, for deficiency in Mathematics.

Williams, Roger H. Turned back to join 4th Class, April 19, 1907, for deficiency in Mathematics.

Willing, Richard E. Discharged December 28, 1906, for deficiency in Mathematics.

Wilson, Durward S. Turned back to join 4th Class, December 28, 1906, for deficiency in Mathematics.

INFORMATION RELATIVE TO THE APPOINTMENT AND ADMISSION OF CADETS TO THE UNITED STATES MILITARY ACADEMY.

APPOINTMENTS.

How Made.—Each Congressional District and Territory—the District of Columbia and also Porto Rico—is entitled to have one cadet at the Academy. Each State is also entitled to have two cadets from the State at large, and forty are allowed from the United States at large. The appointment from a Congressional District is made upon the recommendation of the Congressman from that District, and those from a State at large upon the recommendations of the Senators of the State. Similarly the appointment from a Territory is made upon the recommendation of the Delegate in Congress. Each person appointed must be an actual resident of the State, District or Territory from which the appointment is made.

The appointments from the United States at large and from the District of Columbia are made by the President of the United States upon his own selection. The cadet from Porto Rico, who must be a native of that island, is appointed by the President on the recommendation of the Resident Commissioner.

Date of Appointments.—Appointments are required by law to be made one year in advance of the date of admission, except in cases where, by reason of death or other cause, a vacancy occurs which cannot be provided for by such appointment in advance. These vacancies are filled in time for the next examination.

Alternates.—For each candidate appointed there may be nominated *two alternates*. The principal and each alternate will receive from the War Department a letter of appointment, and must appear for examination at the time and place therein designated*. The fitness for admission to the Academy of the principal and the alternates will be determined as prescribed in paragraphs 19 and 20, Regulations U. S. Military Academy. If the principal fails to qualify, either mentally or physically, then the qualifications of the alternates will be considered and if only one has met the requirements he will be admitted; if both alternates have met the requirements the better qualified will be admitted. The alternates, like the principal, should be designated as nearly one year in advance of the date of admission as possible.

EXAMINATION AND ADMISSION OF CANDIDATES.

The following are extracts from the Regulations of the Military Academy relating to the examination of candidates for admission and will be strictly adhered to :

19. On the second Tuesday in January of each year candidates selected for appointment shall appear for mental and physical examination before boards of Army officers to be convened at such places as the War Department may designate. Candidates who pass will be admitted to the academy without further examination upon reporting in person to the Superintendent before 12 o'clock, noon, on the 1st day of March of the same year. No candidate shall be examined at any other time, unless prevented by sickness or other unavoidable cause from attending the above examination. If thus prevented, he shall report at West Point for examination before 12 o'clock, noon, on the 23rd of February of the same year.

20. Each candidate before admission to the academy, must show by examination as prescribed in paragraph 19 that he is well versed in algebra, to include quadratic equations and progressions, plane geometry, English grammar, composition and literature, descriptive and physical geography, and general and United States history, as explained in the circulars of notification. No rejected candidate shall be re-examined, except upon recommendation of the Academic Board.

*The Board before which a candidate is directed to appear will be, without exception, the one convened at the place nearest or most convenient to his home, or to the school at which he is in regular attendance at the time of appointment.

22. Immediately after reporting to the Superintendent for admission, and before receiving his warrant of appointment, the candidate is required to sign an engagement for service in the following form, and in the presence of the Superintendent, or of some officer deputed by him:

"I, _____, of the State (or Territory) of _____, aged _____ years _____ months, do hereby engage (with the consent of my parent or guardian) that, from the date of my admission as a Cadet of the United States Military Academy, I will serve in the Army of the United States for eight years, unless sooner discharged by competent authority."

In the presence of _____

The candidate is then required to take and subscribe an oath or affirmation in the following form:

"I, _____, do solemnly swear that I will support the Constitution of the United States, and bear true allegiance to the National Government; that I will maintain and defend the sovereignty of the United States, paramount to any and all allegiance, sovereignty, or fealty I may owe to any State or country whatsoever; and that I will at all times obey the legal orders of my superior officers, and the rules and articles governing the Armies of the United States."

Sworn and subscribed, at _____, this _____ day of _____ nineteen hundred and _____ before me, _____.

Qualifications.—No candidate shall be admitted who is under seventeen, or over twenty-two years of age, or less than five feet four inches in height at the age of seventeen, or five feet five inches in height at the age of eighteen and upwards, or who is deformed, or afflicted with any disease or infirmity which would render him unfit for the military service, or who has, at the time of presenting himself, any disorder of an infectious or immoral character. Candidates must be unmarried.

Each candidate must on reporting at West Point present a certificate showing successful vaccination within one year; or a certificate of two vaccinations, made at least a month apart, within three months.

NOTE.—Candidates are eligible for admission from the day they are seventeen until the day they become twenty-two years of age, on which latter day they are not eligible.

It is suggested to all candidates for admission to the Military Academy that, before leaving their places of residence for the place of examination, they should cause themselves to be thoroughly examined by a competent physician, and by a teacher or instructor in good standing. By such examinations any *serious* physical disqualification or deficiency in mental preparation would be revealed.

It should be understood that the informal examination herein recommended is solely for the convenience and benefit of the candidate himself, and can in no manner affect the decision of the Academic and Medical Examining Boards.

CHARACTER OF EXAMINATIONS.

PHYSICAL EXAMINATION.

Upon the completion of the mental examination all candidates will be thoroughly examined physically by the medical officers of the board, under the following instructions prepared by the Surgeon General of the Army:

Hearing must be normal in both ears.

Vision, as determined by the official test types, must not fall below 20/40 in either eye, and not below 20/20 unless the defect is a simple refractive error not hyperopia, is not due to ocular disease, and is entirely corrected by proper glasses.

In the record of all examinations the acuity of vision without glasses, and also with glasses when the acuity is less than 20/20, will be given for each eye separately; in the latter case the correction will also be noted.

Hyperopia requiring any spherical correction, anisometropia, squint or muscular insufficiency, if marked, are causes for rejection.

Color blindness, red, green, or violet, is cause for rejection.

The requirements of the following tables of physical proportions are *minimum for growing youths* and are for the guidance of medical officers in connection with the other data of the examination, a consideration of all of which should determine the candidate's physical eligibility. Mere fulfillment of the requirements of the standard tables does not determine eligibility, while on the other hand no departure below the standard should be allowed unless upon the unanimous recommendation of the medical examining board for excellent reasons clearly stated in each case.

The physical requirements should be those of the age at the birthday nearest the time of the examination. Fractions greater than $\frac{1}{8}$ inch will be considered as an additional inch of height; but candidates 17 years old must be at least 64 inches, and those 18 years and upward at least 65 inches in height.

Table of physical proportion for height, weight, and chest measurement.

Age.	Height, inches.	Weight, pounds.	Chest measurement, expiration, inches.	Chest mobility, inches.	Age.	Height, inches.	Weight, pounds.	Chest measurement, expiration, inches.	Chest mobility, inches.
17 yrs.	64	110	29	2	18 yrs.	65	117	30½	2

	75	167	33½	3½	75	169	34	3½	
					76	174	34½	4	

The following are causes of disqualification if found to exist to such a degree as would immediately or at no very distant period impair the efficiency of the candidate :

- 1.—Feeble constitution ; unsound health from whatever cause ; indications of former disease, glandular swellings, or other symptoms of scrofula.
- 2.—Chronic cutaneous affections, especially of the scalp.
- 3.—Severe injuries of the bones of the head ; convulsions.
- 4.—Impaired vision, from whatever cause ; inflammatory affections of the eyelids ; immobility or irregularity of the iris ; fistula lachrymalis, &c., &c.
- 5.—Deafness ; copious discharge from the ears.
- 6.—Loss of many teeth, or the teeth generally unsound.
- 7.—Impediment of speech.
- 8.—Want of due capacity of the chest, and any other indication of a liability to a pulmonary disease.
- 9.—Impaired or inadequate efficiency of one or both of the superior extremities on account of fractures, especially of the clavicle, contraction of a joint, deformity, &c.
- 10.—An unusual excurvature or incurvature of the spine.
- 11.—Hernia.
- 12.—A varicose state of the veins of the scrotum or spermatic cord (when large), hydrocele, hemorrhoids, fistulas.
- 13.—Impaired or inadequate efficiency of one or both of the inferior extremities on account of varicose veins, fractures, malformation (flat feet, &c.), lameness, contraction, unequal length, bunions, overlying or supernumerary toes, &c., &c.
- 14.—Ulcers, or unsound cicatrices of ulcers likely to break out afresh.

MENTAL EXAMINATION.

Algebra.—Candidates will be required to pass a satisfactory examination in that portion of algebra which includes the following range of subjects: Definitions and notation; the fundamental laws; the fundamental operations, viz.: addition, subtraction, multiplication and division; factoring; highest common factor; lowest common multiple; fractions, simple and complex; simple, or linear, equations with one unknown quantity; simultaneous simple, or linear, equations with two or more unknown quantities; involution, including the formation of the squares and cubes of polynomials; binomial theorem with positive integral exponents; evolution, including the extraction of the square and cube roots of polynomials and of numbers; theory of exponents; radicals, including reduction and fundamental operations, rationalization, equations involving radicals, operations with imaginary numbers, quadratic equations; equations of quadratic form; simultaneous quadratic equations; ratio and proportion; arithmetical

and geometrical progressions. Candidates will be required to solve problems involving any of the principles or methods contained in the above subjects.

The following are typical questions:

State the Commutative, Associative, and Distributive Laws for Multiplication.

What is a homogeneous algebraic expression? Give example.

Simplify $2a - \{3a - [a - (b - a)]\}$.

Find the L. C. M. of

$$x^3 + 6x^2 + 11x + 6 \text{ and } x^4 + x^3 - 4x^2 - 4x.$$

Divide $x^{\frac{3}{2}} - xy^{\frac{1}{2}} + x^{\frac{1}{2}}y - y^{\frac{3}{2}}$ by $x^{\frac{1}{2}} - y^{\frac{1}{2}}$.

A piece of work can be done by *A* and *B* in 4 days, by *A* and *C* in 6 days, and by *B* and *C* in 12 days. Find in what time it would be done by *A*, *B*, and *C* working together.

A battalion of soldiers, when formed into a solid square, present sixteen men fewer in the front than they do when formed in a hollow square four deep. Required the number of men.

Solve the equation $ax^2 + bx + c = 0$, and show the conditions that the roots be equal, real, imaginary, rational.

Having 300 barrels of flour worth \$7.50 per barrel, and 800 barrels worth \$7.80 per barrel, and 400 barrels worth \$7.65 per barrel, how many more barrels of flour at \$8.00 and \$8.50 per barrel will make 2000 barrels worth \$7.85 a barrel

$$\text{Solve } \left. \begin{array}{l} x + \frac{3}{y} = \frac{7}{2} \\ 3x - \frac{2}{y} = \frac{26}{3} \end{array} \right\}$$

There is a number which consists of two digits, such that if we divide the number by the product of its digits we obtain a quotient 5 and a remainder 2, but if we invert the order of the digits and divide the resulting number by the product of its digits we obtain a quotient 2 and remainder 5. Required the number.

$$\text{Solve } \left. \begin{array}{l} 2y^2 - 4xy + 3x^2 = 17 \\ y^2 - x^2 = 16 \end{array} \right\} \quad \text{Simplify } \frac{(3 + \sqrt{3})(3 + \sqrt{5})(\sqrt{5} - 2)}{(5 - \sqrt{5})(1 + \sqrt{3})} \quad \text{Solve } \sqrt{2x+7} + \sqrt{8x-18} = \sqrt{7x+1}$$

Find the geometrical progression whose sum to infinity is $4\frac{1}{2}$ and whose second term is -2 .

Plane Geometry.—Candidates will be required to give accurate definitions of the terms used in *plane geometry*, to demonstrate any proposition of plane geometry as given in the ordinary textbooks and to solve simple geometrical problems either by a construction or by an application of algebra.

The following are typical questions:

Name and define the different kinds of triangles; of quadrilaterals.

Prove that, if a perpendicular is drawn to a given straight line at its middle point: 1st. Any point of the perpendicular is equally distant from the extremities of the line; 2d. Any point without the perpendicular, is unequally distant from the extremities.

Show that, if through the middle point of one of the sides of a triangle, a line be drawn parallel to the base, it will bisect the second side and the part intercepted will be equal to one-half the base.

What number of sides has the polygon, the sum of whose angles is twenty-six right angles?

To draw a common tangent to two given circles.

Find the locus of the middle points of all chords of a circle equal in length to a given line.

Find the locus of the middle points of all chords of a circle passing through a given point within the circle.

Prove that, through three points not in the same straight line, one circumference may always be made to pass, and but one.

Prove that, the square described on the hypotenuse of a right angled triangle is equivalent to the sum of the squares described on the other two sides.

Given the side of an equilateral triangle equal to 10 feet; find its area.

Define "limit of a variable." Illustrate by an example.

Prove that the area of a circle is equal to the product of its circumference by half the radius.

Prove that the bisector of an angle divides the opposite side into segments which are proportional to the other two sides.

Construct a rectangle equivalent to a given square, and having the difference of its base and altitude equal to a given line.

English Grammar.—Candidates must have a good knowledge of *English grammar*; they must be able to define the terms used therein; to define the parts of speech; to give inflections, including declension, conjugation and comparison; to give the corresponding masculine and feminine gender-nouns; to give and apply the ordinary rules of syntax.

They must be able to parse correctly any ordinary sentence; giving the subject of each verb, the governing word of each objective case, the word for which each pronoun stands or to which it refers, the words between which each preposition shows the relation, precisely what each conjunction and each relative pronoun connects, what each adjective and adverb qualifies or limits, the construction of each infinitive, and generally to show a good knowledge of the function of each word in the sentence.

They must be able to correct in sentences or extracts any ordinary grammatical errors.

It is not required that any particular text-book shall be followed; but the definitions, parsing, and corrections must be in accordance with good usage and common sense.

The following questions were used at a recent examination :

I. Give the principal parts (present tense, past tense, and past participle) of the following verbs: 1. choose; 2. crow; 3. freeze; 4. slay; 5. stick; 6. fly; 7. sit; 8. burst.

II. Write the plurals of the following words: 1. motto; 2. fairy; 3. money; 4. belief; 5. axis; 6. synopsis; 7. man-of-war; 8. Norman; 9. M.

III. Write the feminine forms of the following words: 1. hero, 2. mankind; 3. murderer; 4. testator; 5. priest; 6. ambassador; 7. Englishman; 8. poet; 9. emperor.

IV. Write the possessive case of the following words: 1. men; 2. I; 3. it; 4. boys; 5. they; 6. prince; 7. King John; 8. King of Italy; 9. Henry the Fourth.

Define the following: 1. Personal pronoun. 2. Preposition.

Purse the words in italics in the following sentence:

Other things being equal, it is obvious that the writer who has most words to choose from is most likely to find in his assortment just the word which he needs at a given moment.

Correct all the errors in the following sentences: 7. I should not have asked like you did for twice the money.

- | | |
|---|--|
| 1. It was not her that did it. | 8. Are either of these places marked on the map? |
| 2. Who do you take him to be? | 9. Two fatal errors underliad his theory. |
| 3. He surely don't expect me to do it. | 10. Except you go with me, I shall stay at home. |
| 4. Neither by you nor he was it considered necessary. | 11. You or he is in the wrong. |
| 5. Each have their own faults. | 12. Here comes Smith and two other men. |
| 6. How do you know when its coming? | |

English Composition and English Literature.—Candidates must have a fair knowledge of the general principles and leading rules of composition. Their knowledge will be tested by the correction of errors in the selection and right use of words, of errors in the construction of sentences, by their proficiency in variety of expression, and by their ability to write a letter in the correct form.

They must have a fair knowledge of the names of the most prominent American and English authors and the names of their principal works.

Questions similar to the following are likely to be used:

Indicate the errors in the selection and use of words in the following sentences by underscoring the errors and writing the correct word above the incorrect:

1. He had exceptionable opportunities for learning the language.
2. A century transpired before it was revisited.
3. King Edward VII. replaced Queen Victoria on the throne of England.
4. I was continually aggravated by his conduct.
5. There were not less than twenty persons present.

Correct the following errors in construction of sentences:

1. The teacher should repress the practice of throwing stones, as far as possible.
2. The French having nearly lost 5000 men, became discouraged.
3. The picture of the king hung on the wall behind the door, covered with a cloth.
4. He made no petition, though he did not like the new representative quite as well as his colleagues.
5. He did not pretend to abolish French music but only to cultivate it.

For variety, change the following sentences into another correct form and still keep the same meaning:

- | | |
|---|--|
| If that be granted the rest is easily proved. | 4. He was the first that entered. |
| 2. We hope we shall have the pleasure of seeing you. | 5. His disease was one that cannot be cured. |
| 3. A man that has little sense is seldom aware of the fact. | |

Write the following letter in proper form to Charles Smith at 2121 Mount Vernon Avenue, Baltimore, Maryland, giving proper address and complimentary conclusion:

March 2 1900 philadelphia pa 8131 Eighth street

by this mail I send you two copies of the book ordered by you the 13th ultimo hoping they will prove satisfactory

hamlin and Co.

What author wrote: 1. Gulliver's Travels. 2. Macbeth. 3. Pilgrim's Progress. 4. Childe Harold.

Name one work of each of the following authors: 1. Tennyson. 2. Hawthorne. 3. Milton. 4. Spencer.

Geography.—Candidates will be required to pass a satisfactory examination, in *descriptive geography* and the elements of *physical geography*. A preponderance of weight is attached to a knowledge of the geography of the United States.

In descriptive geography of the United States, candidates should be thoroughly informed as to its general features and boundaries (both with respect to neighboring countries, and latitude and longitude); its adjacent oceans, seas, bays, gulfs, sounds, straits, and islands; its lakes, the location and extent of its mountain ranges; the sources, directions, and terminations of the important rivers, the names of their principal tributaries, and at what points, if any, these rivers break through highlands on their way to the ocean; the water routes of communication from one part of the country to another; the location and termination of important railroad lines; the boundaries of the several States and Territories and their order along the coasts, frontiers and principal rivers; the locations and boundaries of the island possessions; and the names and locations of the capitals and other important cities of the several States, Territories and Island possessions.

In short, the knowledge should be so complete that a clear mental picture of the whole of the United States is impressed on the mind of the candidate.

In descriptive geography of other countries, candidates should be familiar with the continental areas and grand divisions of the water of the earth's surface; the large bodies of water which in part

or wholly surround the grand divisions of the land; the capes, from what parts they project and into what waters, the principal peninsulas, location, and by what waters embraced; the parts connected by an isthmus; the principal islands, location and surrounding waters; the seas, gulfs, and bays, the coasts they indent, and the waters to which they are subordinate; the straits, the lands they separate, and the waters they connect; the location of the principal lakes; the locations, boundaries, capitals and principal cities of the political divisions of the world.

In physical geography, candidates should be familiar with the relief of the earth's surface; the principal mountain systems, the river systems and watersheds; the coastal and lake plains; and the influence of climate, soil, mineral deposits and other physical features on the resources, industries, commercial relations and development of a country and its people, especially of the United States.

The following questions were used at a recent examination:

1. Name the bodies of water surrounding Europe.
2. Where is 1. Cape St. Vincent, 2. Cape Corrientes, 3. Cape Matapan, 4. Cape Lopez, 5. Cape Comorin, 6. Cape York?
3. Name in order the political divisions of South America which border on the Pacific Ocean and the capital of each.
4. Locate definitely the following islands: 1. Mauritius, 2. Tasmania, 3. Formosa, 4. New Zealand, 5. Madeira, 6. Falkland; to what country does each belong?
5. Where are the gulfs of 1. Bothnia, 2. Guinea, 3. Paria, 4. Salonica, 5. Pechill?
6. What lands are separated and what waters connected by 1. Torres Strait, 2. Hudson Strait, 3. Strait of Malacca?
7. Bound Italy; name its capital, largest river and principal mountain range.
8. Locate definitely the following cities: 1. Vienna, 2. Nankin, 3. Cork, 4. Tunis, 5. Montevideo, 6. Batavia, 7. Suoz, 8. Pretoria.
9. Name in order the waters traversed in sailing from Liverpool, England, to Hong Kong, China.
10. A considerable portion of the boundary line of the United States is along what parallel?
11. Locate definitely the following: 1. Placid Lake, 2. Sabine Pass, 3. Black Hills, 4. Sebago Lake, 5. Cape Lookout, 6. Montauk Point, 7. Wichita Mountains, 8. Lingayen Bay.
12. The meridian of Minneapolis passes through what states?
13. Name the principal rivers that drain Pennsylvania; where do they rise, at what points do they leave the state and at what points, if any, do they break through highlands?
14. Name all the waters traversed in going by the two commercial water routes from Duluth to the Atlantic Ocean.
15. Name the principal ranges of mountains crossed in going by rail from New York to San Francisco; state the rail route assumed to be traveled.
16. Bound precisely the following States and Territories: 1. Montana, 2. Arizona, 3. Arkansas, 4. Wisconsin, 5. Pennsylvania, 6. Georgia. (In bounding, all contiguous states must be mentioned as well as rivers, mountain ranges, etc.)
17. Name the states west of the Mississippi River, drained wholly or in part by it or its tributaries, and give the capital of each.
18. Locate accurately the following cities: 1. Austin, 2. Pensacola, 3. Asheville, 4. Winchester, 5. Allegheny, 6. Iloilo, 7. Oswego, 8. Pasadena, 9. Guthrie, 10. Detroit.
19. Going by water from New Orleans, La., to Pittsburgh, Pa., what States would you pass on the left?
20. How many large islands are there in the Hawaiian group? Which is the largest? Which is the most important?
21. Going westward on the 35th parallel of north latitude, from near Newberne, N.C., what States and large rivers would be crossed?
22. Describe the chief mountain system of the eastern hemisphere, and state what island chains of Asia abound in volcanoes.
23. What are the great river systems of South America? Where are the principal coastal plains?
24. What are the qualifications of a good harbor? Name three of the best harbors on the Atlantic coast one on the Pacific coast.
25. What has made the Middle Atlantic States the principal commercial section of the United States?

History.—The candidate will be required to be familiar with so much of the *history of the United States* and the outlines of *general history* as is contained in the ordinary school histories.

In history of the United States, the examination will include questions concerning early discoveries and settlements; the forms of government in the colonies; the causes, leading events, and results of wars; and prominent events in the history of our Government since its foundation.

In general history, candidates must have a fair knowledge of the general outlines of the history the following nations: Egyptian, Assyrian, Babylonian, Persian, Grecian, and Roman; and of the mediæval and modern history of the European nations.

The following questions show the character of the examination in U. S. History and in General History:

1. What explorations or discoveries did each of the following named persons make? Give the date in each case. a. De Narvaez. b. Coronado. c. Marquette. d. La Salle.
2. Name three colonies that were founded for religious reasons and give the sect or denomination which each was colonized.
3. Who were the Pilgrims?
4. When, and under what circumstances was Delaware separated from Pennsylvania?
5. Give an account of Bacon's Rebellion.
6. When and where did each of the following events occur? a. Meeting of the first Colonial Congress b. Burgoyne's surrender. c. Arnold's treason.
7. Name some important results of each of the following battles of the Revolutionary War: a. Long Island. b. Trenton. c. Brandywine.

8. Name four additions to the Territory of the United States since the Revolutionary War, and give the way each has been acquired.
9. Bound the Territory of the United States at the close of the Revolutionary War.
10. What was the "Massacre of Wyoming"?
11. When, where and for what purpose, did the Constitutional Convention meet? What resulted from its deliberations?
12. What was the "Whiskey Insurrection"?
13. What were the "Allen and Sedition" laws? What was their effect?
14. When and where was the last battle of the War of 1812 fought? Name the commanders on each side.
15. What were the two principal political parties in 1860? Their candidates for the Presidency? Their leading doctrines on the slavery question? Parties. Candidates. Principles.
16. With what foreign nations had the United States unfriendly relations during and at the close of Civil War? Give the cause in each case.
17. Name, with date, three important military events of 1865.
18. What Vice-Presidents have become President? Name the predecessor in each case.
19. Give an account of the "Virginus affair."
20. In what war were the following battles fought? What were the opposing forces? Which side won?
 - a. Ticonderoga b. Monterey. c. Saratoga. d. Stony Point. e. Spottsylvania. f. Lundy's Lane.
1. Into what general periods is the history of Egypt divided?
2. Into what classes was Egyptian society divided?
3. Name one of the great Kings of Assyria.
4. In what region did the Assyrian Kingdom lie?
5. Name the greatest Babylonian King and describe some of his achievements.
6. Who was the founder of the Persian Empire?
7. State the principal events of the reign of Darius I.
8. Into what three general parts was ancient Greece divided, and what was the name of the principal State in each?
9. What was the character of the Spartan people and the nature of their government?
10. What was the character of the Athenian people, and the nature of their government after the expulsion of the tyrants?
11. Name four great battles of the Græco-Persian War, and give the date of any one of them.
12. What was the name of the great war between the Grecian States, and what States were the leaders in it?
13. Give an outline of the conquests of Alexander the Great. In what century did they occur?
14. What was the nature of the early government of Rome?
15. Give the title of the principal officers of the Roman republic, and describe their functions.
16. What were the Punic Wars? How many in number? Name two great Carthaginian and two great Roman generals.
17. Who was Augustus Cæsar? State briefly the principal events of his career.
18. What was the feudal system, and how did it originate?
19. What is meant by the Renaissance?
20. Who was the leader of the Reformation? Describe briefly its nature and principal events.
21. Who was Oliver Cromwell, and what did he establish?
22. What was the cause of the French Revolution, and what did it effect?
23. Under what two forms of government did Napoleon rule France, and what was the "Code Napoleon"?
24. When and under what circumstances was the new German Empire founded?
25. Name some of the more important events of Queen Victoria's reign.

ACADEMIC DUTIES.

The Academic duties and exercises commence on the 1st day of September and continue until about the 5th of June. Examinations of the several classes are held in December and June. At the December examination cadets, who are found to be proficient in their studies, are arranged according to merit in each subject. At the June examination they are similarly arranged and they are also assigned general standing in the class as determined by their standings in the various subjects. When a subject of study is completed during a term an examination concluding the work in that subject is sometimes held. Cadets deficient in studies at any examination are discharged from the Academy unless for special reasons the Academic Board recommends otherwise. Cadets exceeding at any time the maximum number of demerits allowed for six months are immediately reported to the Academic Board as deficient in conduct and are discharged.

PHYSICAL EXAMINATION.

All cadets are examined physically in June of each year and those found physically disqualified to continue with the course or, in case of the first class, for commission in the Army, are discharged.

VACATIONS AND LEAVES OF ABSENCE.

Academic duties are suspended from the completion of the June examinations until the end of August. During this period cadets live in camp and are engaged in military duties and exercises and in receiving practical instruction in military and other subjects. Academic duties are also suspended from the close of the semi-annual examination, about December 23rd, until January 2nd, and on the Friday and Saturday preceding the last Sunday in March. All duties and exercises, as far as practicable, are suspended on New Year's Day, February 22nd, May 30th, July 4th, Thanksgiving Day and Christmas Day.

Cadets of the first, second and third classes are allowed short leaves of from four to six days at Christmas, if their conduct during the preceding six months has been satisfactory. Cadets of the first class, having satisfactory conduct records, are allowed leaves, not to exceed 75 hours, at the beginning of the summer encampment and leaves not to exceed 27 hours at Thanksgiving. Excepting these short leaves for good conduct, cadets are allowed but one leave of absence during the four years course. As a rule this leave is granted at the end of the first two years and extends from the middle of June to the 28th of August.

PAY OF CADETS.

The pay of a cadet is \$500 per year and one ration per day, or commutation therefor at thirty cents per day. The total is \$609.50, to commence with his admission to the Academy. The actual and necessary traveling expenses of candidates from their homes to the Military Academy are credited to their accounts *after* their admission as cadets.

No cadet is permitted to receive money, or any other supplies, from his parents, or from any person whomsoever, without the sanction of the Superintendent. A *most rigid* observance of this regulation is urged upon all parents and guardians, as its violations would make distinctions between cadets which it is the especial desire to avoid; the pay of a cadet is sufficient, with proper economy, for his support.

Each cadet must keep himself supplied with the following mentioned articles, viz.:

*Eight white shirts; two gray shirts; *eight summer undershirts; *six winter undershirts; *four night shirts; twelve white linen collars; twelve pairs of white linen cuffs; *eight pairs of summer drawers; *six pairs of winter drawers; *eight pairs of socks; *twelve pocket handkerchiefs; one black tie; *twelve towels; two clothes bags, made of ticking; two pairs of uniform shoes; six pairs of uniform white gloves; two sets of white belts; *one clothes brush; *one hair-brush; *one tooth-brush; *one comb; one mattress; one pillow; four pillow-cases; six sheets; two blankets; one quilted bed cover; one chair; one tumbler; *one trunk; one account book; one wash basin.

Candidates are authorized to bring with them the articles marked *.

Cadets are required to wear the prescribed uniform. All articles of their uniform are of a designated pattern, and are sold to cadets at West Point at regulated prices.

DEPOSIT PRIOR TO ADMISSION.

Immediately after admission candidates must be provided with an outfit of uniform, &c., the cost of which is about \$160. This sum, or at least \$100 thereof, *must be deposited with the Treasurer of the Academy before the candidate is admitted.* It is best for the candidate to take with him no more money than he needs for traveling expenses and for his parents to send the required deposit by draft, payable to the Treasurer, U. S. Military Academy. The deposit is credited at once to the cadet's account; it is not returned to his parents. Upon graduation a cadet who has exercised proper economy will have sufficient money to his credit with the Treasurer of the Academy to purchase his uniform and equipment as an officer.

PROMOTION AFTER GRADUATION.

The attention of applicants and candidates is called to the following provisions of an Act of Congress approved May 17, 1886, to regulate the promotion of graduates of the United States Military Academy:—

“That when any cadet of the United States Military Academy has gone through all its classes and received a regular diploma from the Academic Staff, he may be promoted and commissioned as a second lieutenant in any arm or corps of the Army in which there may be a vacancy and the duties of which he may have been judged competent to perform; and in case there shall not at the time be a vacancy in such arm or corps, he may, at the discretion of the President, be promoted and commissioned in it as an additional second lieutenant, with the usual pay and allowances of a second lieutenant, until a vacancy shall happen.”

RECITATION SCHEDULE AT U. S. MILITARY ACADEMY.

(In effect at close of Academic Year, June, 1907. The law providing for the admission of cadets in March instead of June, which takes effect in 1908, will modify this schedule.)

The fourth class is that class in its first year of attendance at the Academy. Cadets are admitted to the fourth class only and can advance but one class each year.

CLASS	TERM †	DEPARTMENT	SUBJECTS	Period of Recitation		REMARKS
				Length in Minutes	*No. per Week	
FOURTH	FIRST	Mathematics..... } Modern Languages..... } Tactics..... }	Algebra.....	80	3	Sept. 1 to Nov. 30.

			Ordnance and Gunnery.....	60	2 }	
			Law.....	60	5 }	
		Tactics.....	Hippology.....	60	3	During February.

* Bracketed figures indicate numbers of periods for alternate weeks.

† The first term opens September 1 and closes about December 23. The second term opens January 2 and closes about June 4.

DEPARTMENT OF TACTICS.

ALL CLASSES.

New cadets, upon reporting for duty, are given Infantry recruit instruction with gymnastic and calisthenic exercises until they join the battalion in camp.

Practical instruction is given during the summer encampment, and from September 1st to November 1st, and from March 15th to June 1st, in cavalry, artillery and infantry drill regulations, in target practice with the rifle, revolver, mountain gun and field gun, and in Military Engineering.

During the summer encampment, cadets of the third and fourth classes are also taught swimming and dancing, and those of the first class, the service of sea-coast artillery and sub-marine defense at Fort Totten, N. Y.; all classes participate in exercises in minor tactics, practice marches, problems and practical field work, in which the employment of all arms is exemplified.

Practical instruction in fencing and gymnastic exercises is given to the fourth class from September 15th to March 15th, and to the other classes from November 1st to March 15th.

Instruction in riding is given to the first class during the encampment and from September 1st to June 1st, excepting the month of February; to the second class, from November 1st to March 31st, and to the third class from November 1st to March 15th and during the summer encampment. Instruction with English pad saddles is given to the first class, and in polo to the first and second classes.

Paymaster's Manual. U. S.	Army Register. U. S.

DEPARTMENT OF MATHEMATICS.

FOURTH AND THIRD CLASSES.

The course in Mathematics begins with the fourth class year and continues for nearly two years (ending April 15, of the third class year). Algebra and the elements of Geometry alternate daily during the first term of the fourth class year, an examination being held in each of these subjects in December. Algebra is then pursued, alternating with Trigonometry, until the end of March, when both of these subjects are concluded by an examination. The analytical study of the Conic Sections finishes the work of the fourth class, and is the subject of an examination in June.

The course in Algebra covers the entire subject as generally taught in colleges and universities, but the student is expected to have already mastered elementary algebra to include the progressions and the solution of the quadratic equation. The simpler parts of the subject are therefore only briefly reviewed. The course in elementary Geometry includes the books that relate to the plane and those that relate to space, but the student is expected to have mastered the former, so that they are merely rapidly reviewed. Both plane and spherical Trigonometry are studied, and the analytical course in the Conic Sections includes the discussion of the general equation of the second degree.

The first term of the third class year begins with Analytical Solid Geometry alternating with Descriptive Geometry. The former is a brief course ending with an examination about October 22. It includes the general discussion of surfaces of the second degree. In Descrip-

tive Geometry, besides the elementary problems with the right line and plane, the representation and intersection of conicoids are studied, as well as their tangent planes. This subject also includes perspective, shades and shadows, and, for the upper part of the class, spherical projections. The examination in Descriptive Geometry is held in December at the termination of this course.

The subject of the Calculus is taken up at the beginning of the second term of the third class year and is completed by an examination about April 12th. The Differential and Integral Calculus are studied separately. A small portion of the class, comprising the most advanced students, takes a brief course during April in the Theory of Errors and Method of Least Squares.

TEXT BOOKS.

FOURTH CLASS.

Advanced Course in Algebra. Wells.
Elements of Geometry. Phillip and Fisher.
Elements of Plane and Spherical Trigonometry. Crockett.
Conic Sections. C. Smith.
Logarithmic Tables. Newcomb.

THIRD CLASS.

Solid Geometry. C. Smith.
Descriptive Geometry. Church.
Differential Calculus. Bass.
Integral Calculus. D. A. Murray.
Method of Least Squares. Johnson.

DEPARTMENT OF MODERN LANGUAGES.

FOURTH AND THIRD CLASSES.

The course in Modern Languages begins with the fourth class and continues for two years, ending in June of the third class year.

The first term, fourth class, September 1st to about December 22d, is taken up by a study of the principles of Composition and Rhetoric, and by a short study of the history of the English Language and English Literature. In this course there are 56 advance lessons and 22 review lessons.

Synonyms are studied throughout the course in Modern Languages.

An examination is held in December after the completion of the above course in English.

The second term, fourth class, January 2d to about June 4th, is devoted to the study of French. In this course there are 108 lessons, the first five of which are devoted solely to pronunciation. Each day's lesson after the fifth consists of one or more verbs, a grammar lesson, and beginning with the 19th lesson, an exercise in reading, either at sight or after preparation.

An examination is held in June after the completion of the above course.

The first term of the third class is devoted to the study of French. This course consists of 92 lessons. Each day's lesson consists of one or more verbs, a grammar lesson, reading either after preparation or at sight, and one or two French idioms. A French newspaper and a French military journal are used in reading in this course. The newspaper is used for sight reading.

An examination is held in December after the completion of this course.

The second term, third class, is devoted to the study of Spanish, and to an additional course of 40 lessons in English Composition. In the Spanish course, there are 128 lessons, the first five of which are devoted solely to pronunciation. Thereafter each lesson consists of one or more verbs, a grammar lesson, and beginning with the 19th lesson, a reading from an assigned exercise. Cadets are also required to read at sight from a Spanish newspaper.

In addition to the above course in Spanish, there are 40 lessons, beginning April 15, devoted to conversation only.

Beginning April 15, there is an additional course in English, devoted to composition and to military and civil correspondence, a composition or theme being required every week. During this period, each cadet is required to read a group of four books, each group consisting of a novel, a poem, an essay, and a play. At the end of the course, each cadet is required to hand in a written composition on one of these books and an oral examination is also held at the end of the course.

TEXT BOOKS.

FOURTH CLASS.

English:—Composition and Rhetoric. Williams.
How to Write Clearly. Abbott.
English Language. Meiklejohn.

- French:— French Pronunciation. De Peiffer.
 Treatise on the Conjugation of French Verbs. Castarède.
 First Book in French. Downer.
 French Grammar. Fraser and Squair.
 Elementary French Reader. Douay.

THIRD CLASS.

- French:— Treatise on the Conjugation of French Verbs. Castarède.
 French Grammar. Fraser and Squair.
 Lessons in Idiomatic French. Hennequin.
 Le Petit Parisien. Kron.
 College Series of French Plays, Vol. II. Bôcher.
 Cours de Lecture et de Traduction, Vol. II. Roemer.
 Revue Militaire des Armées Étrangères.
 Le Figaro.
- Spanish:— Spanish Verb and Spanish Pronunciation. Traub.
 Spanish Grammar. Monsanto and Languellier.
 Spanish Grammar. Garner.
 El Castellano Actual. Roman y Salamero.
 Las Novedades.
 El Capitán Veneno.
 Elementary Spanish Reader. Ramsey.
- English:— Principles of Composition. Pearson.

BOOKS OF REFERENCE.

- English:— Thesaurus of English Words and Phrases. Roget.
 International Dictionary. Webster.
 Synonyms Discriminated. Smith.
- French:— French Pronouncing Dictionary. Spiers and Surene.
 Military Technical Dictionary. Willcox.
- Spanish:— New Spanish-English and English-Spanish Dictionary. Appleton.

DEPARTMENT OF DRAWING.

THIRD AND SECOND CLASSES.

The course in Drawing is carried on through the third class and second class years.

It begins with instruction in the use of drawing instruments and practice exercises in line work, and proceeds to the construction of twenty-eight problems in the application of Plane Geometry. Following this, Descriptive Geometry is taken up concurrently with theoretical instruction in the Department of Mathematics, and a set of practical problems in plane and curved surfaces, with developments, shades shadows and perspective, is constructed. The number and difficulty of the problems vary with the capacity of the student. A short course of lettering is then pursued, after which the subject of Topography is begun, starting with contour problems, and the study of terrain conformation; next conventional signs, American and foreign, are taught; after which studies in map reading, American and foreign, are given by question-sheets and written examinations. These are followed by a finished map, figured and lettered, based upon some one of the issues of the U. S. Geological Survey. After a short practice in the laying of flat and graded color washes, the latter part of the academic year is taken up with the theory, and practice in the field, of military topographical reconnaissance.

Theoretical instruction in the above subjects is given by text books (department pamphlets) and by lectures.

The graphical work of the second class year begins with a study of building construction consisting of a plan, section, and elevation drawing of a barrack for a company of infantry; this is worked out to scale from detail sheets and printed specifications. Upon completion of this, the class is divided according to probable standing and corps assignment at time of graduation, and subjects in civil and military engineering, ordnance and machine design, and building construction work, are assigned according to this rating. This work completes the course in technical drawing at the end of January. At that time, free-hand drawing is begun with the study of block forms, passing into structural form. Memory drawing and free-hand mechanical sketching, followed by military field sketching, from the flat and in the field, close the course.

Theoretical instruction on the second class course is given by text books (department pamphlets) and lectures. The latter include: eight lectures on Building Construction; three on the History and Development of Architecture; two on Masterpieces of Painting and Sculpture; two on Military Field Sketching; one on Outline and Free-hand Drawing; one on Axometric Projection. The class is taken in the spring to the Metropolitan Museum of Art, New York City, and its members are required to write a thesis upon certain works specified for examination.

DEPARTMENT OF NATURAL AND EXPERIMENTAL PHILOSOPHY.

SECOND CLASS.

The course in Natural and Experimental Philosophy begins with the third academic year. Mechanics is studied during the first term. The text used is Michie's "Elements of Analytical Mechanics." This is supplemented by a book of notes containing explanations and practical problems. Many of the principles are illustrated by apparatus in the lecture and section rooms, and the students are required to repeat and explain these experiments. The course aims to be as complete as possible with the limitation that it can be properly covered in a term of 90 days by students having a proficient knowledge of the calculus; the treatment is sufficiently mathematical to furnish a confident basis for advanced work in the technical staff corps after graduation. The more difficult applications are taken by the best students in a special course of nine advance lessons, while the remainder of the class is occupied with a supplementary review of fundamental principles.

During the second term about 112 lessons are allotted to this department. The first half of this time is devoted to the subjects of Sound and Light. The authorized text book is Gordon's "Sound and Light."

Astronomy is studied in the remainder of the second term. The texts used are Young's "General Astronomy" and Michie and Harlow's "Practical Astronomy." The principal aim of this course, in addition to its important value in educational development, is to furnish an ample basis for the establishment of stations in explorations and surveys.

TEXT BOOKS.

Elements of Analytical Mechanics. Michie. Sound and Light. Gordon.

General Astronomy. Young.

Practical Astronomy. Michie and Harlow.

NOTE.—Numerous standard works on the general subjects covered by the course are available for reference both to cadets and instructors.

DEPARTMENT OF CHEMISTRY, MINERALOGY AND GEOLOGY.

SECOND CLASS.

This department embraces two branches of Physics not included in its title, namely Heat and Electricity.

The course begins with the third academic year and extends throughout the year, exercises, recitations, laboratory work or lectures taking place on all week days.

Commencing with the first term, September 1st, the subjects of Heat and General Chemistry alternate daily until the completion of the former subject, about October 18th, after which the Chemistry exercises are held daily until the close of the term.

During this term all members of the class whose progress, as shown by the recitations, warrants it, are given laboratory practice in Chemistry. This practice begins with chemical manipulations and proceeds in the usual general order of elementary laboratory work. The laboratory exercises are one hour and fifty minutes long. It is generally possible to give all parts of the class some laboratory experience; the amount of this work, however, varies with the aptitude of the student from a few hours to fifty-five or sixty hours.

The first term closes with an examination upon the essential parts of the entire course, which all cadets who have not shown a prescribed proficiency in daily work must take.

The course in Heat is short but it is a comprehensive elementary course intended to embrace what is most applicable to subsequent work at the Academy and what is most useful in general education. In Chemistry the course is a descriptive general one, based upon a concise statement of the more essential principles of Chemistry, and includes that class of chemical information deemed most important to non-specialists, together with an accurate and logical treatment of many useful applications of Chemistry.

During the second term the daily exercises alternate between Electricity, and Mineralogy and Geology. During February and April only half the class attends daily. The course in Geology is a brief but scientific presentation of the essential elements of this branch of science.

The Mineralogy is an eminently practical course consisting of the descriptive study and the practical determination of the important minerals. The lithological and palæontological part of Geology is accompanied in study by the continued practical examination of the objects described.

The course in Electricity is a brief exposition of the leading electrical phenomena and their relations to each other. It includes a study of the general principles of the subject and of the typical machines, generators, motors and transformers, together with the more important uses of electricity. The laboratory exercises give experience with a number of the machines and in the use of a great variety of apparatus employed in the numerous forms of electric measurements. In this term the laboratory work is a part of the electrical course and all cadets enter the laboratory. All laboratory work is performed under the immediate supervision of an instructor.

The second term like the first, closes with an examination covering the essential parts of the three subjects embraced.

TEXT BOOKS.

Elementary Lessons in Heat. Tillman.
 Descriptive General Chemistry. Tillman.
 Practical Chemistry. (Laboratory Guide.) Clowes.
 Elements of Geology. Le Conte.
 Important Minerals and Rocks. Tillman.
 Elementary Lessons in Electricity and Magnetism. S. P. Thompson.

During both terms the standard works on the respective subjects are available for reference both to cadets and instructors.

DEPARTMENT OF MILITARY HYGIENE.

SECOND CLASS.

The course in Military Hygiene for the second class begins on or about the 15th of April and continues into June. It consists of ten lectures and ten recitations for each half of the class, given on alternate days and ending by a written examination on the subjects treated.

The course covers the essential points in Military Hygiene, with especial reference to tropical service; the elements of Physiology and Personal Hygiene; and the effects of stimulants and narcotics upon the human system.

During the summer camp, five lectures with exercises, are given to the first class on the use of the First Aid Packet and emergencies. In this course, cadets are taught the location of the principal blood vessels and means of stopping hemorrhage, etc. While on the march, at the end of each day, the surgeon on duty with the Corps explains the sanitary advantages or disadvantages of the camp sites and the principles of camp cooking.

TEXT BOOK.

Personal Hygiene. Woodhull.

REFERENCE BOOKS.

Military Hygiene. Woodhull.
 Theory and Practice of Military Hygiene. Munson.
 Epitome of Tripler's Manual. Greenleaf.
 Manual of Practical Hygiene. Parkes.

DEPARTMENT OF CIVIL AND MILITARY ENGINEERING.

FIRST CLASS.

The course in Civil and Military Engineering and the Art of War is confined to the first class year.

The course in Civil Engineering begins September 1st and is completed during the first term, which closes with the Christmas holidays. It comprises brief treatises on the mechanics of civil engineering, framed and masonry structures, the materials of engineering, water supply and sewerage.

The course in Military Engineering and the Art of War begins on January 2nd and closes on the 3rd of June. Military Engineering embraces the study of field and permanent fortifications and siege works. The Art of War embraces the study of the organization of armies, employment of the different arms in combination, logistics and strategy. To familiarize the students with its principles, lectures are delivered on military subjects and the principal operations of about twenty selected campaigns are studied. During this course the students

are taken to the battlefield of Gettysburg to familiarize them with the effects of topography on the employment of troops in the field.

TEXT BOOKS.

Civil Engineering. Fiebeger.	Siege Works. Mercur.
Field Fortifications. Fiebeger.	Organization and Tactics. Wagner.
Permanent Fortifications. Fiebeger.	Field Service Regulations. U. S.
Department Pamphlet on Strategy.	
Department Pamphlet on Campaigns and Battles.	
Department Pamphlet on Campaign and Battle of Gettysburg.	

BOOKS OF REFERENCE.

Cambria Steel Hand-book on Structural Steel.

The department possesses a good reference library of standard engineering works.

DEPARTMENT OF LAW AND HISTORY.

FIRST CLASS.

The subjects of Law and History are taught in the first class year.

Each cadet is required to recite upon the day's lesson orally in reply to questions, or from subject headings placed on the blackboard, or by written answers to questions covering the leading points of the entire lesson. After recitation cadets are usually directed to selected readings in the reference library of the department, in connection with the lesson or subject.

At the end of each term those cadets who have not established their proficiency in either subject to the satisfaction of the Academic Board, are subject to an examination thereon.

HISTORY.

The course in History begins September 1st and ends about December 22d, and consists of the study of a condensed General History of the World. In many respects the course is an advanced study of the subject as required of candidates by the entrance examinations of the Academy. Special attention is given to sociology and political science, by verbal instruction, by the insertion at the proper places in the text of articles upon such subjects as: "The Origin of the Village Community"; "The Oriental Empires"; "Taxtaking and Legislating Empires"; "The Roman Constitution," etc., and by requiring cadets in the preparation of their answers to refer to relevant books and articles designated by the instructors. Instruction in Historical Geography is given by use of outline maps in connection with recitations. In addition to such lectures of the department as are given in any time available therefor, the present course embraces a series of eight lectures (by Dr. James H. Canfield Columbia University) upon the following subjects, viz.:

The Beginning of Civilization.	What the Germans have Accomplished.
Early Oriental Civilization.	The Influence of France.
The Advance made by the Greeks.	The Place and Value of the English.
The Roman State.	Modern Western Civilization.

LAW.

The course in Law begins on January 2d each year and extends to June. It covers instruction in the following subjects:

- | | |
|-------------------------|---|
| 1. The Elements of Law. | 3. International Law. |
| 2. Constitutional Law. | 4. Military Law and the Practice of Courts-Martial. |

In addition to the recitations, "Cases" involving important points of law are given out for study and cadets are required to state the legal conclusions to be drawn therefrom.

Lectures are also given upon the various subjects taught, so far as the limits of time allotted to this course permit, and practical instruction is given in the organization, method of procedure, making up the record, etc., of general courts-martial.

TEXT BOOKS.

Duruy's General History of the World.	Grosvenor.
The Elements of Law.	Davis, G. B.
Constitutional Law.	Davis, E. G.
International Law.	Davis, G. B.
Military Law and The Practice of Courts-Martial.	Dudley.

BOOKS OF REFERENCE.

New Historical Atlas.	Labberton.
Military Government and Martial Law.	Birkhimer.

There is also a reference library of about 2,500 volumes, used daily by the cadets.

DEPARTMENT OF ORDNANCE AND GUNNERY.

FIRST CLASS.

The subject of Ordnance and Gunnery is studied by the cadets of the first class throughout the academic year.

The course of instruction covers the principles involved in the construction and use of all war material. It is broadly divided into two parts: the theoretical and the descriptive. The theoretical part includes the study of the action of explosives, the study of interior and exterior ballistics, the theories of gun and carriage construction, and the principles of gunnery. The principles studied are applied in the solution of problems of a practical nature and in practical work with ballistic instruments.

The descriptive part of the course covers the processes of manufacture of powders, guns, gun carriages, projectiles and armor; and describes the small arms, cannon, machine and rapid fire guns in use in the United States service, with the carriages, ammunition and accessory appliances required for their service. The department is well supplied with models, which are used in conjunction with the text.

In connection with the course, visits are made to Watervliet Arsenal, where the processes of gun construction are observed, and to the Ordnance Proving Grounds at Sandy Hook, where actual firings from the several classes of guns are observed, including usually one or more shots against armor, and where the latest developments in war material are seen.

TEXT BOOK.

Ordnance and Gunnery. Lissak.

BOOKS OF REFERENCE.

Ballistic Tables. Ingalls.

Mathematical Tables. Ludlow.

Publications of Ordnance Department. U. S.

DEPARTMENT OF PRACTICAL MILITARY ENGINEERING.

THIRD, SECOND AND FIRST CLASSES.

During the summer encampment cadets of the third class are instructed in the use and adjustment of surveying instruments, in surveying methods, and in keeping and plotting notes. Each cadet receives about four hours of instruction per day for twelve days.

The second class receives instruction in Signalling with the flag and heliograph either during the fall or spring drill season.

The first class during the fall and spring drill season and during the summer encampment receives instruction in the following subjects:

Field geometry; profiling, deflading; road location; stream discharge measurements; use of field ovens; filtration of water; and felling timber with explosives; knots and lashings; making gabions, fascines; wire entanglements; the use of gins, shears, derricks; raising masts; gun emplacements; field latrines; revetments; military mines; use of screw and hydraulic jacks; spar bridges; mounted reconnaissance; mixing and placing concrete; rafts of casks; putting up pile driver; building pile dock; ponton bridges with wooden and canvas pontons; trestle bridge with Birago trestle; loading bridge material on wagons.

Cadets are marked on all of the above practical work and proficiency is required. No text books are used, but cadets have access to a complete line of books of reference.

THE LIBRARY.

Cadets and officers have free access to the library which comprises some 60,000 books, maps and manuscripts. The collection contains substantially all standard books on the subjects taught in the Academy and is especially complete in military subjects. Its card catalogues (about 130,000 cards) are arranged with the special object of saving the time of cadets. The library is open on week days from 8 A. M. to 9:30 P. M.

HEADQUARTERS UNITED STATES MILITARY ACADEMY,

WEST POINT, N. Y., June 30, 1907.

BY ORDER OF COLONEL SCOTT:

J. W. Coe

Captain, Coast Artillery Corps, *Adjutant.*
