## HISTORICAL SKETCH.

The United States Military Academy is a school for the practical and theoretical training of cadets for the military service. Upon completing its course satisfactorily, cadets are eligible for promotion and commission as second lieutenants in any arm or corps of the Army the duties of which they have been judged competent to perform.

The supervision and charge of the Academy are in the War Department under such officer or officers as the Secretary of War may assign to that duty (section 1331, Revised Statutes). In conformity with the provisions of this section, the Chief of Staff has been, by direction of the Secretary, charged with the supervision of matters in the War Department pertaining to the Academy.

The occupation of West Point as a military post took place on January 20, 1778, and has been continuous since that date. The earliest proposal for a military school for the United States was that of Brigadier General Henry Knox, Chief of Artillery (May, 1776). His plans were seconded by Colonel Alexander Hamilton and approved by General Washington, though they were not adopted in the form suggested before 1802, other counsels having temporarily prevailed.

On October 1, 1776, Congress passed a resolution appointing a committee to prepare a plan for "A Military Academy at the Army." The result was the resolution of June 20, 1777, providing for a Corps of Invalids "to serve as a military school for young gentlemen previous to their being appointed to marching regiments." The invalid Corps was organized in July, 1777, and in 1781, at the request of Washington, was marched from Philadelphia to form part of the garrison at West Point, where an engineer school, a laboratory, and a library had already been established in three separate buildings.

On March 30, 1779, the Board of War adopted regulations for the Corps of Engineers and for the Sappers and Miners. These were promulgated in orders, July 30, 1779, by George Washington and provided for a plan of instruction to be carried into effect after approval by the Board and by the General-in-Chief. The plan contemplated lectures, by engineer officers, on fortification, mining, reconnaissance, encampments and the like. Practical experiments in gunnery were conducted at West Point as early as February, 1780. In 1783, after the cessation of hostilities, Washington, having been called upon for his views as to the peace establishment, laid the matter of a Military Academy before his officers at Newburg. He referred to it again in his message on December 3, 1793. The law of May 9, 1794, authorized the organization of a Corps of Artillerists and Engineers with two cadets to a company, thus creating the new grade of "cadet" in the American Army. A school for the Artillerists and Engineers, and for the cadets attached to the Corps, was established, on the recommendation of Washington, by order, at West Point in 1794. The destruction of its buildings by fire, in 1796, caused its suspension. In July, 1801, the Secretary of War directed that all the cadets of the Corps of Artillerists should report at West Point for instruction, and in September, a school was opened with four army officers and a civilian as administrators and instructors.

An Act of Congress approved March 16, 1802, authorized the President to organize and establish a Corps of Engineers to consist of five officers and ten cadets, and provided that it should be stationed at West Point, in the State of New York, and should constitute a Military Academy. The Academy with ten cadets present, was formally opened July 4, the year of the Act.

Acts of Congress, in 1802 and 1808, authorized 40 cadets from the Artillery, 100 from the Infantry, 16 from the Dragoons, and 20 from the Riflemen; few of these were appointed, and no provision was made for them at the Academy. In 1810, the Academy was deprived of nearly all means of instruction, and officers and cadets had difficulty in obtaining their pay. During most of the year 1811, and a part of 1812, although war was imminent, academic instruction was practically abandoned. In

March, 1812, the Academy was without a single instructor. Up to and including this time, 88 cadets had been graduated; they had entered without mental or physical examination, at all ages from 12 to 34, and at various times during the year.

By Act of Congress of April 29, 1812, the Academy was reorganized. The provisions of this Act have furnished the general principles upon which the Military Academy has since been conducted and controlled; a more adequate corps of professors was authorized; a maximum of 250 cadets was fixed; and the age and the mental requisites for admission were prescribed.

In 1817, under the provisions of the Act of 1812, and the able superintendency of Major Sylvanus Thayer, Corps of Engineers, the present era in the Academy's history opened.

Until 1843, a prescribed residence was not a legal qualification for appointment, but the selection of one cadet from each Congressional district had grown to be customary. In this year the custom became the law, Congress prescribing that the Corps of Cadets should consist of one from each Congressional district, one from each Territory one from the District of Columbia, and ten from the United States at large, to be appointed by the President.

By the Acts of Congress approved May 4, 1916, and June 8, 1926, the Corps of Cadets as now constituted consists of two from each Congressional district, two from each Territory, four from the District of Columbia, two from Porto Rico, four from each State at large and one hundred and twenty-two from the United States at large, two of whom are appointed upon the recommendation of the Vice President, and twenty of whom are selected from among the honor graduates of educational institutions having officers of the Regular Army detailed as professors of military science and tactics under existing law or any law hereafter enacted for the detail of officers of the Regular Army to such institutions, and which institutions are designated as "honor" schools, upon the determination of their relative standing at the last preceding annual inspection regularly made by the War Department. They shall be appointed by the President and shall, with the exception of the one hundred and twenty-two appointed from the United States at large, be actual residents of the Congressional or Territorial district, or of the District of Columbia, or of the island of Porto Rico, or of the States, respectively, from which they purport to be appointed. The President is also authorized to appoint cadets from among enlisted men, in number as nearly equal as practicable, of the Regular Army and the National Guard, between the ages of nineteen and twenty-two years, who have served as enlisted men not less than one year, to be selected under such regulations as the President may prescribe, but the total number so selected shall not exceed one hundred and eighty at one time. The increase provided for in the Act of May 4, 1916, was divided into four annual increments which were as nearly equal as practicable and were equitably distributed among the sources from which appointments are authorized. Under these Acts, and under the apportionment of Members of Congress according to the 13th Census, the maximum number of cadets is 1374.

In addition to the 1,334 mentioned above, the Secretary of War is authorized to permit not exceeding four Filipinos, to be designated, one for each class, by the Governor General of the Philippine Islands, to receive instruction at the United States Military Academy: "*Provided*, That the Filipinos undergoing instruction shall receive the same pay, allowances, and emoluments as are authorized by law for cadets at the Military Academy appointed from the United States, to be paid out of the same appropriations: *And provided further*, That said Filipinos undergoing instruction on graduation shall be eligible only to commissions in the Philippine Scouts. And the provisions of section 1321, Revised Statutes, are modified in the case of the Filipinos undergoing instruction, so as to require them to engage to serve for eight years, unless sooner discharged, in the Philippine Scouts." (35 Stats., 441.)

The total number of graduates, including foreigners receiving instruction under Acts of Congress, from 1802 to June 12, 1926, inclusive, is 8022.

## COMMENDATORY REFERENCES TO THE ACADEMY

"I have duly received your letter of the 28th ultimo, enclosing a copy of what you had written to the Secretary of War, on the subject of a Military Academy.

"The establishment of an Institution of this kind, upon a respectable and extensive basis, has ever been considered by me as an object of primary importance to this country; and while I was in the Chair of Government, I omitted no proper opportunity of recommending it, in my public speeches and other ways, to the attention of the Legislature. But I never undertook to go into a detail of the organization of such an academy; leaving this task to others whose pursuits in the paths of science, and attention to the arrangements of such institutions, had better qualified them for the execution of it. For the same reason I must now decline making any observations on the details of your plan; and as it has already been submitted to the Secretary of War, through whom it would naturally be laid before Congress, it might be too late for alterations if any should be suggested.

"I sincerely hope that the subject will meet with due attention, and that the reasons for its establishment which you have so clearly pointed out in your letter to the Secretary, will prevail upon the Legislature to place it upon a permanent and respectable footing."—*George Washington.* (*Letter to Alexander Hamilton dated Mount Vernon, 12 December, 1799, two days before General Washington died.*)

"I recommend to your fostering care, as one of our safest means of national defense, the Military Academy. This institution has already exercised the happiest influence upon the moral and intellectual character of our Army; and such of the graduates as from various causes may not pursue the profession of arms will be scarcely less useful as citizens. Their knowledge of the military art will be advantageously employed in the militia service, and in a measure secure to that class of troops the advantages which in this respect belong to standing armies."—*Andrew Jackson.* (*Extract from his First Message to Congress December, 1829.*)

"I give it as my fixed opinion, that but for our graduated cadets, the war between the United States and Mexico might, and probably would, have lasted some four or five years, with, in its first half, more defeats than victories falling to our share; whereas, in less than two campaigns, we conquered a great country and a peace, without the loss of a single battle or skirmish."—*Winfield Scott.* (*Extract from a letter written by him July 25, 1860, to Lieutenant Ives, Secretary to the U. S. Military Academy Commission.*)

"The foregoing considerations naturally bring to mind the Military Academy at West Point. I believe that the great service which it has rendered the country was never more conspicuous than it has been during the past two years. The faithful and efficient services of its graduates since the declaration of war with Spain have more than repaid the cost of the institution since its foundation. They have been too few in number and most heavily burdened."—*Elihu Root.* (*Extract from his report as Secretary of War, June 30, 1899.*)

"This institution has completed its first hundred years of life. During that century no other educational institution in the land has contributed so many names as West Point has contributed to the honor roll of the nation's greatest citizens."—*Theodore Roosevelt.* (*Extract from his address at the Centennial Exercises U. S. Military Academy, June 11, 1902.*)

## CLASSIFICATION OF CADETS.

The Cadets are arranged in four distinct classes, corresponding with the four years of study. The Cadets employed on the first year's course constitute the *Fourth Class;* those on the second year's course the *Third Class;* those on the third year's course the *Second Class;* and those on the fourth year's course the *First Class.*

The academic year commences on the 1st of July. On, or before, that date the result of the examination held in the preceding month is announced and Cadets are advanced from one class to another. At no other time is a Cadet advanced from one class to another, unless prevented by sickness, or authorized absence, from attending the aforesaid examination; in such a case a special examination is granted; but in no case is a Cadet advanced from one class to another without having satisfied the Academic Board of his proficiency in each branch of study pursued by his class.

*Names marked thus * in the following pages are regarded as distinguished cadets, their total proportional parts on the general merit roll of the class at the close of the term in the preceding June having exceeded ninety-two per cent of the possible total. A complete list of distinguished cadets by classes, and the subjects in which they particularly excel, will be found in the following pages.*

*Cadets whose names are marked thus † were found deficient, and* turned back, *to join the next succeeding class.*

*Cadets whose names are marked thus ‡ were found deficient, and* discharged.

*Note.*—The full and complete name of each and every Cadet, place of birth, date of birth, and source of appointment is set forth in the alphabetical index to be found in the back of this Register.

# Information Relative to the Appointment and Admission of Cadets to the United States Military Academy, West Point, N. Y.

[Communications relating to matters connected with the Military Academy should be addressed to The Adjutant General of the Army, Washington, D. C.]

## THE MILITARY ACADEMY

1. The United States Military Academy is an institution established by the Government for the practical and theoretical training of young men for the military service. Its cadets are given a comprehensive and general education of collegiate grade and a sufficient basic military training to enable them to enter upon the duties of second lieutenant in any branch of the Army to which they may be individually assigned.

2. Direction and supervision of the Military Academy are vested by law in the War Department under such officer or officers as the Secretary of War may select, and, in accordance with this provision, the Chief of Staff has been designated as the officer in charge of all matters pertaining to the institution.

## COURSE OF PROCEDURE FOR CANDIDATES

3. The candidate for a cadetship, assuming that he is unmarried and that at the time of his proposed entrance he will come within the prescribed age limits, must follow the steps outlined below. He must first obtain an appointment to a vacancy, existing or prospective. He must then demonstrate that he measures up to certain physical and educational standards. His physical fitness is determined by examination; his educational qualifications may be shown by examination or by the submission of certain prescribed certificates. If he be accepted, he reports at the academy on the first week day in July and, prior to admission, he is required to take the oath of allegiance *and to subscribe to an engagement to serve the United States for a time subsequent to his graduation.* (See par. 48.)

## COURSE AS A CADET

4. Upon admission to the academy, he enters upon a four-year course of study and training. The academic year extends from September 1 to June 4, the greater part of the remainder of the year being spent in camp and devoted to military training. At the end of his second year at the academy he is granted a furlough of about 10 weeks, which, with the exception of a few days during Christmas week of his second, third, and fourth years, is the only extended vacation which he receives. During the time that he remains a cadet, he is paid at the rate of $1,072 per annum. Upon graduation he may be commissioned as a second lieutenant in one of the branches of the Army.

The points brought out briefly in the paragraphs above are explained in detail in the following pages.

## STRENGTH OF THE CORPS OF CADETS

5. The maximum authorized strength of the Corps of Cadets, excepting four Filipinos, is 1,334, appointed in number and from sources as follows:

| | |
|---|---|
| 4 from each State at large | 192 |
| 2 from each congressional district | 870 |
| 2 from each Territory | 4 |
| 4 from the District of Columbia | 4 |
| 2 from natives of Porto Rico | 2 |
| 82 from the United States at large [1] | 82 |
| 180 from among the enlisted men of the Regular Army and of the National Guard, in number as nearly equal as practicable | 180 |
| Total | 1,334 |

[1] Of whom 2 are appointed upon the recommendation of the Vice President and 20 are selected from among the honor graduates of those educational institutions which have officers of the Regular Army detailed as professors of military science and tactics and which upon the determination of their relative standing at the last preceding annual inspection regularly made by the War Department were designated as "honor military schools."

### FILIPINO CADETS

6. In addition to the 1,334 mentioned above, the Secretary of War is authorized to permit not exceeding four Filipinos, to be designated, one for each class, by the Governor General of the Philippine Islands, to receive instruction at the United States Military Academy: "*Provided*, That the Filipinos undergoing instruction shall receive the same pay, allowances, and emoluments as are authorized by law for cadets at the Military Academy appointed from the United States, to be paid out of the same appropriations: *And provided further*, That said Filipinos undergoing instruction, on graduation shall be eligible only to commissions in the Philippine Scouts. And the provisions of section 1321, Revised Statutes, are modified in the case of Filipinos undergoing instruction, so as to require them to engage to serve for eight years, unless sooner discharged, in the Philippine Scouts." (35 Stat., 441.)

### APPOINTMENTS, HOW MADE

7. The numbers mentioned above represent the maximum allowed at the Military Academy at any one time from the respective sources; consequently, no appointment can be made from any source except to fill a vacancy therefrom.

All appointments are made by the President and as follows:

From States at large and from congressional districts, upon the recommendations of the respective Senators and Representatives in Congress.

From the Territories, upon the recommendations of the respective Delegates in Congress.

From the District of Columbia, upon the recommendations of the commissioners thereof.

From Porto Rico, upon the recommendation of the Resident Commissioner.

(Those cadets appointed from States at large, from congressional districts, from the Territories, from the District of Columbia, and from the island of Porto Rico, must, under the law, be *actual residents* thereof, respectively.)

From among the honor graduates of educational institutions designated as "honor military schools," upon the recommendations of the heads of the respective schools.

From among the enlisted men of the National Guard of the States and Territories, and of the island of Porto Rico, upon the recommendations of the respective governors thereof.

From among the enlisted men of the National Guard of the District of Columbia, upon the recommendation of the commanding general of the District Militia.

From among the enlisted men of the Regular Army, upon the recommendations of the commanding generals of the respective corps areas and territorial departments.

Appointments from the United States at large (excepting those from "honor military schools" and those appointed upon the recommendation of the Vice President) are made by the President upon his own selection, and as the result of a competitive examination, identical in every respect with the regular entrance examination.

### SELECTION OF CANDIDATES

8. **From States at large, congressional districts, and Territories.**—The selection of candidates, by competitive examination or otherwise, for appointment from any State at large or congressional district, is entirely in the hands of the Senator or Representative in Congress who has the vacancy at his disposal, and all applications for appointment from those sources should be addressed to the proper Senator or Representative.

For each vacancy from a State at large, or congressional or Territorial district, *three candidates* should be nominated, one to be named as *principal*, one as *first alternate*, and one as *second alternate*. The first alternate, if qualified, will be admitted in the event of the failure of the principal; the second alternate, if qualified, will be admitted in the event of the failure of both the principal and the first alternate.

These candidates must, at date of admission, be between the ages of 17 and 22 years.

9. **From "honor military schools."**—*Honor graduates* of "honor military schools" are selected for appointment as cadets of the United States Military Academy in the following manner:

There is maintained in the office of The Adjutant General of the Army a roster of "honor military schools" as determined by annual War Department inspec-

tions of educational institutions. At an early date in each year The Adjutant General of the Army will anticipate the vacancies in the Corps of Cadets which are open to *honor graduates* and will make an equitable distribution of those vacancies amongst the "honor military schools" and notify them accordingly. Each designated institution will at a specified time notify The Adjutant General of the Army of the name of the selected *honor graduate* from that year's graduating class.

An *honor graduate* of a selected institution will be appointed, without mental examination but subject to a satisfactory physical examination, a cadet of the United States Military Academy upon the certificate of the head of the institution that the appointee is the *honor graduate* of that institution. No student will be rated as *honor graduate* unless he has in his school work shown proficiency in subjects amounting to not less than the 14 units prescribed by the regulations for admission to the United States Military Academy. A certificate (Form II) will be forwarded to the Adjutant of the Academy when the appointment is made. (See par. 22.)

These candidates must, at date of admission, be between the ages of 17 and 22 years.

10. **From the National Guard.**—To be eligible for appointment from the National Guard, an applicant must be an enlisted man of a unit recognized by the Federal Government and must, at date of admission, be between the ages of 19 and 22 years and have served as an enlisted man in the Guard not less than one year. It is not essential that the service shall have been continuous; therefore, former service in the Guard may be counted in determining an applicant's eligibility. Similarly, service with a National Guard organization prior to its recognition by the Federal Government may be considered, the date of enlistment of the soldier governing, and not that of the recognition of the unit. Those applicants who contemplate enlisting in the National Guard for the purpose of being appointed to the Military Academy should do so early enough to enable them to acquire the year of service by the date of admission in the year during which they desire to enter.

For vacancies in the cadetships allotted to enlisted men of the National Guard, the candidates, not exceeding three for each vacancy, will be apportioned, in number as nearly equal as practicable, among the States, the Territories, the District of Columbia, and the island of Porto Rico, according to their enlisted strength. With the exception of the candidates from the District of Columbia, they will be selected by the governors from successful competitors in a PRELIMINARY EXAMINATION to be held between November 1 and November 15 of each year, such examination to be of a scope and nature similar to the regular examination for entrance to the United States Military Academy. The candidates from the National Guard of the District of Columbia will be similarly selected by the commanding general of the District of Columbia Militia.

Each candidate thus selected will be authorized by the War Department to report for the regular Military Academy entrance examination, which he must undergo in competition with the entire number of National Guard candidates, the available vacancies being awarded to those physically qualified candidates making the highest proficient averages in the order of merit established at the last-mentioned examination, irrespective of the State, Territory, or District to which their organizations may belong. The selection being made throughout by competition, alternates can not be considered under any circumstances.

11. **From the Regular Army.**—To be eligible for appointment from the Regular Army, an applicant must be an enlisted man thereof, and must, at date of admission, be between the ages of 19 and 22 years, and have served as an enlisted man in the Army not less than one year. It is not essential that the service shall have been continuous; therefore, prior Army service may be counted in determining a soldier's eligibility. Those applicants who contemplate enlisting in the Army for the purpose of being appointed to the Military Academy should do so early enough to enable them to acquire the year of service by the date of admission in the year during which they desire to enter.

The candidates nominated for cadetships allotted to the enlisted men of the Regular Army shall not exceed three times the number of existing vacancies and shall be equitably distributed among the corps areas and territorial departments by the War Department. If the number of applicants in any corps area or department exceeds the share allotted to it by the War Department, the candidates in such corps area or department will be chosen from the successful competitors in a PRELIMINARY EXAMINATION to be held in the several corps areas and territorial departments between December 1 and December 15, except that in the Philippine Department it is held between November 1 and November 15, such

examination to be of a scope and nature similar to the regular examination for entrance to the United States Military Academy.

Each such candidate will be authorized to report for the regular Military Academy entrance examination, which he must undergo in competition with the entire number of Army candidates, the available vacancies being awarded to those physically qualified competitors making the highest proficient averages, in the order of merit established at the last-mentioned examination, without regard to the corps area or territorial department from which designated. The selection being made throughout by competition, alternates can not be considered under any circumstances.

### EDUCATIONAL QUALIFICATIONS, HOW SHOWN

12. There are *two* methods of meeting the educational requirements for admission to the Military Academy, viz., by successfully passing the regular entrance examination, or by submitting a satisfactory educational certificate in lieu thereof. (See par. 22.)

### ENTRANCE EXAMINATION, WHEN HELD

13. The regular Military Academy entrance examination is held beginning on the first Tuesday in March each year, only one such examination being scheduled annually. Each candidate (unless appointed from the Regular Army) designated to take that examination will receive from the War Department a letter of appointment, and he must appear for examination at the time and place designated therein, before a board of Army officers convened by the War Department. Enlisted men appointed from the Regular Army receive authority from their respective corps area or department commanders to report for examination, and must report at the time and place specified.

The Filipino candidates selected for appointment shall, unless otherwise notified by the War Department, appear for mental and physical examination on the second Tuesday in January of each year before a board of Army officers to be convened at such place in the Philippine Islands as the commanding general of the Philippine Department may designate.

### ENTRANCE EXAMINATION, WHERE HELD

14. The board before which a candidate is directed to appear will be the one convened at the place nearest or most convenient to his home or to the school at which he is in regular attendance.

Following is a list of the places at which the examination is held:

ADMISSION BY CERTIFICATE

22. The Academic Board will consider and *may accept* in lieu of the regular mental examination—

(1) A properly attested certificate (Form II) that the candidate has graduated from a preparatory school or public high school accredited by the United States Military Academy, provided that in his school work he has shown proficiency in subjects amounting to not less than 14 units of the lists given below.

Of the 14 units, 2 must be in algebra, 1 in plane geometry, 1½ in English grammar and composition, 1½ in English literature, and 2 in history. The remaining 6 units may be chosen from the list of optional subjects given hereafter, but can not include commercial or other subjects not included in the list.

If a scrutiny of the certificate submitted shows evidence of low grades or of graduation at an irregular date, the certificate will be rejected.

(2) A properly attested certificate (Form II) that the candidate is in actual attendance in his senior year at a preparatory school or public high school accredited by the United States Military Academy, and has satisfactorily completed three and one-half years' work at such school, provided that the certificate shows specifically by subjects and units the work already completed and also that to be completed by graduation, and provided that the course the candidate is pursuing will, when completed, show proficiency in subjects amounting to not less than 14 units of the list given below and the certificate includes a statement to that effect.

Of the 14 units, 2 must be in algebra, 1 in plane geometry, 1½ in English grammar and composition, 1½ in English literature, and 2 in history. The remaining 6 units may be chosen from the list of optional subjects given hereafter, but can not include commercial or other subjects not included in the list. If a scrutiny of the certificate submitted shows low grades, the certificate will be rejected.

A candidate submitting a certificate showing actual attendance at and prospective graduation from a preparatory school or public high school must as a condition of admission continue his course of study, and submit his diploma or other formal evidence of graduation at the time of entrance to the United States Military Academy. Failure to submit such evidence of graduation will disqualify the candidate for entrance.

(3) A properly attested certificate (Form I) that the candidate is a regularly enrolled student in good standing without condition in a university, college, or technical school accredited by the United States Military Academy, provided that the entrance requirements of the course he is pursuing require proficiency in subjects amounting to not less than 14 units of the list given below.

Of the 14 units, 2 must be in algebra; 1 in plane geometry, 1½ in English grammar and composition, 1½ in English literature, and 2 in history. The remaining 6 units may be chosen from the list of optional subjects given hereafter, but can not include commercial or other subjects not included in the list.

If attendance at college extends over a semester, the full record of academic work at the college, giving subjects taken and grades attained in each, must be submitted on Form I.

Candidates who have taken work in a college or university must submit a certificate, Form I, covering college work. If the college certificate covers one or more complete semesters with grades, it need not be accompanied by a certificate, Form II, covering the candidate's work in high school or preparatory school. If, however, the college certificate, Form I, covers less than one complete semester's work, it must be accompanied by a certificate, Form II, covering the candidates' work in high school or preparatory school. When both college and high-school certificates are submitted, they will be considered together.

A certificate indicating enrollment in or admission to an institution at any other time than that specified in the college register for regular admission or enrollment will not be accepted. If a scrutiny of the certificate submitted shows low grades, the certificate will be rejected.

(4) A properly attested certificate (Form III) from the College Entrance Examination Board that the candidate has shown proficiency in the examinations set by the board in subjects amounting to 14 units from the lists given below. Of the 14 units, 2 must be in algebra, 1 in plane geometry, 1½ in English grammar and composition, 1½ in English literature, and 2 in history. The remaining 6 units may be chosen from the list of optional subjects given hereafter, but can not include commercial or other subjects not included in the list. If a scrutiny of the certificate submitted shows low grades, the certificate will be rejected.

## DEFINITION OF A UNIT OF ADMISSION REQUIREMENTS

39. A unit represents a year's study in any subject in a secondary school, constituting approximately a quarter of a full year's work. A four-year secondary-school curriculum should be regarded as representing not more than 16 units of work.

This statement is designed to afford a standard of measurement for the work done in secondary schools. It takes the four-year high-school course as a basis, and assumes that the length of the school year is from 36 to 40 weeks, that a period is from 40 to 60 minutes in length, and that the study is pursued for four or five periods a week; but under ordinary circumstances a satisfactory year's work in any subject can not be accomplished in less than 120 sixty-minute hours or their equivalent.

## GENERAL INFORMATION AS TO CERTIFICATES

40. All necessary papers, *including a set of blank certificate forms* (except Form III, which is sent only upon application), are furnished by The Adjutant General of the Army to each duly nominated candidate (except where competition is specified) with his letter of appointment.

*Any candidate who contemplates submitting a certificate shall, immediately upon receiving his appointment, forward to the Adjutant, United States Military Academy, West Point, N. Y., the names and addresses of all educational institutions from which he expects to obtain certificates, in order that information as to the status of those institutions may be procured before the arrival of the certificates.*

Certificates should be submitted not later than February 1. A certificate received between February 1 and the examination will receive consideration, but, in view of the short time left to the academic board to investigate its value, no assurance will be given that such certificate can be acted on in time to exempt the candidate from the mental examination.

*Candidates who submit certificates on a date which does not allow the academic board sufficient time to investigate their value and notify them regarding the final action thereon prior to the day set for the examination should proceed with the regular examination.*

Candidates who are informed that their certificates have been accepted must present themselves at the regular time and place, as herein prescribed, for physical examination.

A candidate whose certificate qualifications have been approved *conditionally* (that is, approved provided he completes his regular high school or preparatory school course with good grades, and graduates) must bring with him, and present on the day he reports for admission, his diploma or certificate of graduation, together with a certified statement of the grades attained in his academic work, in order that the Academic Board of the Military Academy may determine whether or not sufficient and satisfactory work has been accomplished to remove his condition. The foregoing does not apply to a candidate whose certificate has been approved *unconditionally.*

A certificate which is accepted as satisfactory for one examination will be regarded as satisfactory for any other examination which may be set for entrance with the same class.

Any certificate accepted for one class and presented for a succeeding class should be accompanied with a full statement of the candidate's educational work in the interim, and both certificate and statement will be subject to careful scrutiny by the academic board.

Inasmuch as candidates from the United States at large, the Regular Army, and the National Guard are appointed to vacancies in the order of merit competitively established as a result of the regular entrance examination, such candidates are not permitted to submit educational certificates in lieu of that examination.

### REQUIREMENTS AS TO AGE, HEIGHT, AND PHYSICAL CONDITION

41. *Candidates are eligible for admission from the day they are 17 (or 19 if from the Regular Army or from the National Guard) until the day they become 22 years of age, on which latter day they are not eligible. The age requirements for all candidates, as well as the service requirements for appointment from the Army and from the National Guard, are statutory and can not be waived.*

No candidate shall be admitted who is less than 5 feet 4 inches in height, or who is deformed or afflicted with any disease or infirmity which would render him unfit for the military service, or who has, at the time of presenting himself, any disorder of an infectious or immoral character.

All candidates must be unmarried.

Each candidate must, on reporting at West Point, present a certificate showing successful vaccination within one year; or a certificate of two vaccinations, made at least a month apart, within three months.

### PRELIMINARY PHYSICAL EXAMINATION

42. Each candidate designated as principal or alternate for appointment as a cadet of the Military Academy should ascertain as soon as practicable whether or not he has any physical defect that would disqualify him for admission or any that should be corrected by treatment before presenting himself for examination. For this purpose he should immediately cause himself to be examined by a physician, preferably a medical officer of the Regular Army. The preliminary physical examination is of great importance to the candidate as it should enable him to determine if he has any physical defect which might subsequently prevent his appointment.

The presentation by an appointee of his letter of conditional appointment, with a request for physical examination, or the presentation by a prospective appointee of a letter signed by a Member of Congress stating that the bearer is a candidate for cadet appointment and requesting that he be physically examined, will be sufficient authority for an Army surgeon at any military post to make the desired physical examination. Upon completion of this examination, the Army surgeon will inform the candidate of the result, and, in case a disability be found, whether such disability is believed to be permanent and disqualifying for military service, or whether it is believed to be of a temporary or curable nature. The examination is to be regarded as preliminary only and in no manner to affect the decision of the regular medical examining board.

## REGULAR PHYSICAL EXAMINATION

43. The physical examination of all candidates taking the mental examination begins in the afternoon of the third day and is continued daily until completed, but those candidates who upon reporting at the place of examination present evidence that they have been excused from the mental examination under the provisions of the certificate privilege, or as the result of having qualified mentally at a previous examination, are usually examined physically as soon as possible after reporting and are not required to wait until the schedule of mental examinations has been completed.

Teeth.*—No candidate will be accepted unless he has a minimum of 6 serviceable, natural masticating teeth above and 6 below, opposing, and also 4 serviceable, natural incisors above and 4 below, opposing. Therefore, the minimum requirement consists of a total of 12 masticating teeth and 8 incisor teeth, all of which must be so opposed as to serve the purposes of incision and mastication. Well-crowned teeth or single-tooth replacements by a standard method of bridge work may be considered serviceable, natural teeth.

Teeth properly filled with permanent filling material will be considered serviceable, natural teeth. Teeth containing unfilled cavities, or those showing signs of focal infection or involved with pyorrhea pockets even though all cavities are properly filled, will not be considered serviceable teeth.

## ADMISSION TO THE ACADEMY

47. **Date of admission.**—Candidates who fully conform to the requirements set forth in the preceding paragraphs, and who report in person to the Superintendent on the first week day in July, before 12 o'clock, noon, shall be admitted as cadets of the United States Military Academy, and shall receive their warrants of appointment as soon as practicable. Candidates are received beginning at 8.30 a. m., and it is to their advantage to report as soon as practicable after that hour.

48. **Engagement to serve.**—Immediately after reporting to the Superintendent for admission, and before receiving their warrants of appointment, candidates are required to sign, in the presence of the Superintendent, or of some officer deputed by him, engagements for service in the following form:

I, ———— ————, of the State (or Territory) of ————, aged ———— years, ———— months, do hereby engage (with consent of my parent or guardian) that from the date of my admission as a cadet of the United States Military Academy I will serve in the Army of the United States for eight years unless sooner discharged by competent authority.

In the presence of ———— ————.

In the case of the Filipino cadets, the engagement shall be made to serve in the Philippine Scouts. (See sec. 1321, R. S.)

49. **Oath of allegiance.**—Each cadet shall, previous to his admission to the academy, take and subscribe an oath or affirmation in the following form:

I, ———— ————, do solemnly swear that I will support the Constitution of the United States and bear true allegiance to the National Government; that I will maintain and defend the sovereignty of the United States paramount to any and all allegiance, sovereignty, or fealty I may owe to any State, county, or country whatsoever, and that I will at all times obey the legal orders of my superior officers and the rules and articles governing the Armies of the United States. (Sec. 1320, R. S.)

Sworn to and subscribed at ——— this ——— day of ———, nineteen hundred and ———, before me.

## DEPOSIT UPON ENTRANCE

50. Immediately after admission each candidate must be provided with an outfit of uniform, etc., the cost of which is about $250. This sum, or an amount which, in addition to the mileage allowance mentioned in paragraph 51 will equal $250, must be deposited with the treasurer of the academy before the candidate is admitted. It is best for the candidate to take with him no more money than he needs for traveling expenses and for his parents to send the required deposit by draft, payable to the treasurer, United States Military Academy. The deposit is credited at once to the cadet's account. Upon graduation a cadet who has exercised proper economy will have sufficient money to his credit with the treasurer of the academy to purchase his uniform and equipment as an officer.

## PAY OF CADETS

51. The pay of a cadet is $780 per year and commutation of rations at 80 cents per day, to commence with his admission to the academy. The total is $1,072.

Mileage, at 5 cents per mile, while proceeding from his home to the Military Academy is credited to the account of each cadet after his admission to the academy.

A cadet's initial deposit, together with his salary, is sufficient to meet his actual needs at the academy. It is not sufficient, however, to meet, in addition, the expenses of leaves of absence, especially if these involve considerable travel.

Obtaining money from outside sources is regarded with disfavor, unless it be for the purpose of liquidating indebtedness at the cadet store or of defraying the expenses of a leave of absence.

## UNIFORM AND SUPPLIES

52. Cadets are required to wear the prescribed uniform. All articles of their uniform and equipment, including bedding, shoes, and underwear, are of a designated pattern, and are sold to cadets at West Point at regulated prices. It is not necessary for candidates to make special preparation for their stay at the academy, although there is no objection to their bringing with them such supplies of underwear, toilet accessories, etc., as they may have. Should a trunk be brought it should be of the Army trunk locker type 29¾ by 16 by 12 inches in size and in good condition. If a candidate does not have such a trunk, he should wait until his arrival at the academy to procure one. Everything needed can be secured from the cadet store at West Point.

## ACADEMIC DUTIES

53. There are two terms of academic instruction: September 1–December 23, and January 2–June 4. A semiannual examination is held December 26–31, and an annual examination June 5–12. At the December examination cadets who are found to be proficient in subjects they have completed during the preceding term are arranged according to merit in each subject. At the June examination they are similarly arranged and they are also assigned general standing in the class as determined by their standings in the various subjects. When a subject of study is completed during a term an examination concluding the work in that subject is sometimes held. Cadets deficient in studies at any examination are discharged from the academy unless for special reasons the academic board recommends otherwise. Cadets exceeding at any time the maximum number of demerits allowed for six months are reported to the academic board as deficient in conduct.

The courses of instruction in the various departments are outlined on pages 41 to 49, inclusive.

## DEPARTMENT OF TACTICS

54. *New cadets.*—New cadets report for duty at the Military Academy on July 1. They are quartered separately from the corps and are given intensive training in Infantry recruit instruction and military courtesies, and a course of corrective and upbuilding physical training.

After approximately one month of the above training the new cadets join the corps for guard and ceremonies, but remain in their separate quarters. The remainder of the first summer is devoted to basic training in the technique of Infantry and Field Artillery.

At the end of the first summer the fourth class (new cadets) is fully incorporated into the corps. The military training during the remainder of the year carries on the basic instruction in Infantry and Field Artillery.

*Third class.*—The military training in the third class year continues the basic instruction, taking up Coast Artillery, riding and Cavalry training, signal communications, and field engineering.

*Second class.*—The second class is absent during the summer. The remainder of the year is utilized to complete and review the basic instruction of the first two years and to take up the subject of minor tactics.

*First class.*—The first class year is devoted primarily to developing qualities of command and leadership, instruction in minor tactics of separate and combined arms, and imparting information of a general nature that officers should have. In other words, the basic training having been completed, cadets are now given the necessary instruction to fit them to exercise the functions of the lowest grade of any branch in which they may be commissioned, with particular attention to methods of training.

*All classes.*—Instruction in swimming and dancing begins in the fourth class year and continues for each cadet until he is declared proficient. Practical instruction in fencing, gymnastic exercises, boxing, wrestling, swimming, and all forms of athletics is given to all classes.

Instruction in equitation is given to the first, second, and third classes throughout the academic year.

Special emphasis is given musketry and marksmanship and each cadet is required to fire qualification courses with rifle and pistol. The purpose of this work is twofold: (1) To develop good shots and (2) to give instruction in methods of training.

## DEPARTMENT OF CIVIL AND MILITARY ENGINEERING

55. *Surveying.*—The course in surveying is required of all cadets of the fourth class. It comprises 40 periods in the spring term.

The instruction is both theoretical and practical. The theoretical instruction includes the theory and use of chain and tape, compass, transit and stadia, level and level rod, orientation, triangulation, profile and differential leveling, computation and plotting, and the surveying methods applicable to map making.

A short time is devoted to the theory and application of the slide rule, which is used in calculations.

The practical instruction consists in the use of the surveying instruments in making maps, laying out of roads, staking out buildings for construction, and laying out of camps.

Textbooks: Surveying, by Breed & Hosmer; The Slide Rule, by Alexander.

*Civil engineering.*—This course is required of all cadets of the first class. It comprises 85 periods, beginning January 1.

The instruction is theoretical, being illustrated by lectures and engineering models. It includes the mechanics of engineering and the application of the principles of engineering to engineering structures, as dams, walls, roads, railways, bridges, water supply, etc.

Textbook: Civil Engineering, by Fiebeger.

A *special course in bridge design* is given in 10 periods of the term to those cadets who have shown a marked proficiency in civil engineering.

*Fortifications.*—This course is required of all cadets of the first class. It comprises 20 periods in the spring term.

Eight periods of instruction are devoted to study of the theory of fortifications; and the remainder of the course is devoted to lectures and practical problems in fortification. The theory includes the evolution of fortification and the principles of laying out and methods of construction of defenses; the problems are devoted principally to fortification by units not larger than a company; the lectures cover the history of the important field and permanent fortifications in past wars and the developments from one type to another, with the lessons learned from their use in war.

Textbooks: Elements of Fortification, by the department of engineering; Fortification, by the department of engineering.

*Army engineering.*—This course is required of all cadets of the first class. It comprises 25 periods in the spring term.

The instruction is theoretical, and is illustrated with models of military engineering constructions.

The instruction is devoted to the application of the principles and practice of civil and mechanical engineering to military conditions. It comprises military mapping, military roads and railways, construction of military shelters, military ports and terminals, siege works, camouflage, demolitions, military bridges, and the application of gas engines to the needs of the military service in different branches of the United States Army.

Textbook: Army Engineering, by the department of engineering.

## DEPARTMENT OF NATURAL AND EXPERIMENTAL PHILOSOPHY

### Second Class

56. The course in natural and experimental philosophy extends throughout the second-class year. The slide rule, precision of measurements and graphical methods, elementary mechanics and properties of matter, wave motion, sound and light, in the order named, are taught during the first term. Technical mechanics is taught during the greater part of the second term. This subject is followed by short courses in hydraulics, aerodynamics, and general astronomy, in the order mentioned.

Numerous lectures by the head of the department and visiting scientists are given during the course. In addition to many demonstrations in the section rooms, approximately 30 formal laboratory experiments are performed.

In all there are 225 recitation periods, each of 1 hour and 25 minutes duration, six attendances per week. Each laboratory period is of 2 hours' duration.

The entire course in so far as the subjects undertaken are concerned, besides being of general educational value and training, is intended as a thorough preparation for engineering and other technical subjects taught during the first-class year.

A brief statement of the courses given and of the textbooks used follows:

#### FIRST TERM

*The slide rule.*—Two periods only, based on "Notes on the Slide Rule" prepared in the department. This short course is intended as a refresher course following theoretical instruction given in another department during the fourth-class year. Following these two days' instruction on the practical use of the slide rule and after about two weeks' use in the section room, appropriate use of the slide rule for computations in the department is obligatory.

*Precision of measurements and graphical methods.*—Approximately eight periods are devoted to this subject, which is presented in "Notes on Precision of Measure-

ments and Graphical Methods," prepared in the department and based on the text "Precision of Measurements and Graphical Methods"—Goodwin, 1919 edition. In addition to the theoretical instruction, three or four laboratory exercises are presented in this subject.

*General physics.*—Seventy periods in all. The subjects of elementary mechanics, properties of matter, wave motion, sound and light, only, in general physics are assigned to this department. The text used is "General Physics"—Ferry, 2d Edition—and the subjects enumerated are given to the extent they are covered in that text. In addition numerous original problems are presented and solved. Laboratory apparatus is used for the qualitative demonstration of practically every principle covered in these subjects. Numerous formal laboratory exercises are likewise given as a part of this course.

Upon completion of the advance and partial review of the above-described work a written general review of approximately 15 periods is given, followed by the semiannual examination. This completes the work of the first term.

SECOND TERM

*Technical mechanics.*—Seventy periods. The text used is "Technical Mechanics"—Maurer, 5th Edition. The upper part of the class takes the entire text The lower part of the class omits certain selected problems and portions of the text. Numerous original problems are presented in addition to those given in the text. In connection with this subject several laboratory exercises of a more or less advanced nature are presented.

*Hydraulics.*—Approximately 20 periods. The text used is "Textbook on Hydraulics"—Russell. The upper part of the class takes the entire text. The lower part of the class usually omits Chapter IX and certain of the more difficult problems.

*Aerodynamics.*—Eighteen periods. "Simple Aerodynamics and The Airplane"—Montieth, is used as a text and is supplemented by various Air Service information circulars, aeronautical magazines, and reports of the Advisory Committee for Aeronautics. The entire text is taken, and is supplemented by approximately 70 original problems.

*Astronomy.*—Ten periods. The text used is "An Introduction to Astronomy"—Moulton. This course is conducted as a combination reading and lecture course. A portion of each period is devoted to a lecture in which full use is made of astronomical slides. The remainder of the period is devoted to observation, conferences, and quizzes. The entire text is covered.

Upon completion of the advance and partial review of the work indicated above a written general review of approximately 12 periods is given, followed by the annual examination. This completes the work of the second term.

DEPARTMENT OF MATHEMATICS

THIRD AND FOURTH CLASSES

57. The course in mathematics begins with the fourth-class year and continues through the third-class year.

In the fourth-class year algebra is completed in alternation, first with geometry, then with trigonometry. Plane analytical geometry is begun.

In the third-class year plane and solid analytical geometry and descriptive geometry are completed in alternation. The calculus and least squares finish the course.

The course in algebra covers the entire subject as generally taught in college, but the student is expected already to have mastered elementary algebra to include the progressions and the solution of the quadratic equation. Elementary geometry includes the books that relate to the plane and those that relate to space, but the student is expected to have mastered the former. Trigonometry includes the complete solution of plane and spherical triangles. Analytical geometry includes the discussion of the general equation of the second degree in the plane and the particular forms of the equation of the second degree in space.

Descriptive geometry includes the orthographic projections of the right line, the plane, ruled surfaces and surfaces of revolution, tangent planes and intersection of surfaces. It also takes the subjects of shades and shadows, perspective, isometric projections and spherical projections.

The course in differential and integral calculus covers the ground of the usual college textbook, including briefly the subject of ordinary differential equations. The method of least squares, given to selected sections, includes the deduction of the facility curve, the formulæ for the error, and the distribution of error.

## DEPARTMENT OF CHEMISTRY, ETC.

### Second Class

58. This department embraces the subjects of chemistry, heat, and electricity.

The course begins September 1 of the third academic year and extends throughout this year; exercises, recitations, laboratory work, or lectures take place on all week days.

Commencing September 1, general chemistry and heat occupy the time until the close of the term in December, recitations or other exercises being had daily.

During this term all members of the class whose progress, as shown by their recitations, warrants it, are given laboratory practice in chemistry. This practice begins with chemical manipulations and proceeds in the usual general order of elementary laboratory work. The laboratory exercises are two hours long. It is generally possible to give all parts of the class some laboratory experience; the amount of this work, however, varies with the aptitude of the student from a few hours to 30 or more.

This term closes with an examination upon the essential parts of the entire course, which all cadets who have not shown a required proficiency in daily work must take.

The course in heat is short, but it is a comprehensive elementary course intended to embrace what is most applicable to subsequent work at the academy and what is most useful in general education.

In chemistry the course is a descriptive general one, based upon a concise statement of the more essential principles of chemistry, and includes that class of information deemed most important to nonspecialists, together with an accurate and logical treatment of many useful applications of chemistry.

Beginning January 2, the subject of electricity is taken daily. This term also closes with an examination, covering the essential parts of the subject studied during the term, which all cadets who have not shown a required proficiency in daily work must take.

The course in electricity is a brief exposition of the leading electrical phenomena and their relations to each other. It includes a study of the general principles of the subject and of the typical machines, generators, motors, and transformers, together with the more important uses of electricity. The laboratory exercises give experience with a number of the machines and in the use of a great variety of apparatus employed in the numerous forms of electrical measurements. In this term the laboratory work is a part of the electrical course, and all cadets enter the laboratory. All laboratory work is performed under the immediate supervision of an instructor.

*Textbooks*

Notes on Heat.—Robinson.
Descriptive General Chemistry.—Tillman.
Practical Chemistry (Laboratory Guide).—Clowes.
Elements of Electricity.—Robinson.

Standard works on the respective subjects are always available for reference, both to cadets and instructors.

## DEPARTMENT OF DRAWING

### SECOND AND THIRD CLASSES

59. The course in drawing extends through the third class year and through two-thirds of the second class year. Attendance is on alternate days for periods of two hours.

The course begins with instruction in the use of instruments and single-stroke lettering. This is followed by detailed instruction in orthographic projection, including problems in descriptive geometry, the preparation of detailed working drawings from models, and finally the preparation of finished assembly drawings of rather complicated mechanisms from data furnished in the shape of detailed drawings. All work is completed in pencil, carefully checked, and then finished in ink.

Along with this work practice is given in freehand technical sketching and the cadet's ability to visualize from the projections is tested by special problems in pictorial representation from the projections. Practice is also given in isometric projection from models and in perspective sketching from models and from orthographic projections.

Instruction in architectural drawing is limited to the preparation of the working plan and elevation of a small masonry building with the necessary lettering and dimensions.

In topographic drawing detailed instruction is given in the principles of map projection, map scales, the various methods of representing ground forms, and the conventional signs and system of rectangular coordinates prescribed for military maps. In addition to practice sheets, each cadet is required to compile and finish in colored inks and accurate large-scale battle map of a small terrain from information furnished him in the form of small-scale general maps, special surveys, airplane photographs, and the coordinates of certain geodetic points.

Detailed instruction in the classroom and in the field is given in topographic and landscape sketching for military purposes, and each cadet is required to make such sketches on difficult ground with every attention to accuracy and neatness.

Instruction is mainly through a loose-leaf system of printed instruction sheets covering the various drawings and phases of the work. These are supplemented by short section-room lectures and blackboard illustrations when necessary. All work is under close supervision of instructors and personal instruction is constantly given.

Textbooks (for reference only): Engineering Drawing—French. Map Reading and Topographical Sketching—Stuart.

## DEPARTMENT OF MODERN LANGUAGES

### SECOND, THIRD, AND FOURTH CLASSES

### DEPARTMENT OF ORDNANCE AND GUNNERY

### FIRST CLASS

62. The course in ordnance and gunnery extends throughout the first class year, one-half of the class attending daily, for a period of 1 hour and 5 minutes, except for a period of 27 days, devoted to hygiene and military art instead of ordnance.

During the first term the course includes a study of the properties, manufacture, care, and use of explosives, the theory of explosives, measurements of velocities, and pressures, interior ballistics, exterior ballistics, projectiles, bombs, pyrotechnics, primers, fuses, ammunition supply, probability of fire, and adjustment of fire.

During the second term the course includes the study of the historical development of arms, materials used in construction of arms, principles of design of guns, carriages, and recoil systems, small arms, machine guns, artillery (field, seacoast, railway, and special), automotive equipment, tanks, tractors, trailers, and fire-control equipment.

The course is supplemented by lectures and by exhibits and models of the various types of arms, ammunition and accessories.

Practical instruction is given in mechanical trades and is devoted to the principal operations performed in the ordinary metal working shops. This includes the use of hand and machine tools, bench and vise work, turning, planing, shaping, drilling, and milling operations, and the forging and hardening processes of metal. The practical instruction is supplemented by lectures and demonstrations on the maintenance, repair, and operation of ordnance matériel in the field.

Textbooks: Ordnance and Gunnery—Tschappat. Department pamphlets on ammunition. War Department publications.

### DEPARTMENT OF MILITARY HYGIENE

63. The course in hygiene covers 30 periods of the cadet's fourth year at the Academy and is required for all cadets. Its basic purpose is the teaching of the principles and practice of military hygiene in such a manner as to prepare the future officer so to care for his own health and that of his men in garrison and the field as to keep the effective strength of his unit as near the maximum as possible "to conserve fighting strength."

Some knowledge of anatomy and physiology is necessary as a foundation for the course and as many cadets enter the academy without such knowledge, a number of the periods, about one-third, is devoted to those subjects and constitutes a subcourse.

The remainder of the course, approximately two-thirds, is devoted to the study of the elements of military hygiene. This subcourse deals mainly with principles, as its brevity precludes much more. It deals in the first part with the recruit and his environment, including personal hygiene, foods and their preparation, hygiene of the barracks, of camps, of moving troops, of hot and cold climates.

The second portion deals with the causes of disease, including remote or predisposing causes, immediate or exciting causes, and carriers of disease.

The third portion deals with the prevention and control of epidemics and the line officer's duties and responsibilities in relation thereto.

Textbook: Ashburn—Elements of Military Hygiene, third edition.

The collection contains substantially all standard books on the subjects taught in the academy, and is especially complete in military subjects. Its card catalogues (about 380,000 cards) are arranged with the special object of saving the time of cadets. The library is open on week days from 9 a. m. to 6 p. m.; on Sundays and holidays from 2 to 4 p. m.

### ANNUAL PHYSICAL EXAMINATION OF CADETS

67. All cadets are examined physically in April of each year, and those found physically disqualified to continue with the course, or, in case of the first class, for commission in the Army, are discharged.

### VACATIONS AND LEAVES OF ABSENCE

68. Academic duties are suspended from the completion of the June examinations until the end of August. During this period cadets are engaged in military duties and exercises and in receiving practical instruction in military and other subjects. Academic duties are also suspended from December 24 until January 2, except for those undergoing examination. All duties and exercises, as far as practicable, are suspended on New Year's Day, February 22, May 30, July 4, Labor Day, Thanksgiving Day, and Christmas Day.

Cadets of the first, second, and third classes not undergoing examinations are allowed leaves at Christmas. Week-end or holiday leaves are granted, not oftener than once each calendar month, to cadets of the first class, provided this privilege does not interfere with academic or military duty and is warranted by

their disciplinary and academic records and money accounts. Excepting such leaves, cadets under ordinary circumstances are allowed but one leave of absence during the four-year course. This leave is granted to those cadets who have successfully completed the third class course of study and extends from the middle of June to the 28th of August.

## PROMOTION AFTER GRADUATION

69. The act of Congress approved May 17, 1886, to regulate the promotion of graduates of the United States Military Academy provides "That when any cadet of the United States Military Academy has gone through all its classes and received a regular diploma from the academic staff, he may be promoted and commissioned as a second lieutenant in any arm or corps of the Army in which there may be a vacancy and the duties of which he may have been adjudged competent to perform." The act approved June 4, 1920 (National Defense Act), section 24e, provides: "Appointment of officers.—Except as otherwise herein provided, appointments shall be made in the grade of second lieutenant, first, from graduates of the United States Military Academy."

NOTE.—The information contained in this circular is subject to change at any time.
