## HISTORICAL SKETCH.

The United States Military Academy is a school for the practical and theoretical training of cadets for the military service. Upon completing its course satisfactorily, cadets are eligible for promotion and commission as second lieutenants in any arm or corps of the Army the duties of which they have been judged competent to perform.

The supervision and charge of the Academy are in the War Department under such officer or officers as the Secretary of War may assign to that duty (section 1331, Revised Statutes). In conformity with the provisions of this section, the Chief of Staff has been, by direction of the Secretary, charged with the supervision of matters in the War Department pertaining to the Academy.

The occupation of West Point as a military post took place on January 20, 1778, and has been continuous since that date. The earliest proposal for a military school for the United States was that of Brigadier General Henry Knox, Chief of Artillery (May, 1776). His plans were seconded by Colonel Alexander Hamilton and approved by General Washington, though they were not adopted in the form suggested before 1802, other counsels having temporarily prevailed.

On October 1, 1776, Congress passed a resolution appointing a committee to prepare a plan for "A Military Academy at the Army." The result was the resolution of June 20, 1777, providing for a Corps of Invalids "to serve as a military school for young gentlemen previous to their being appointed to marching regiments." The invalid Corps was organized in July, 1777, and in 1781, at the request of Washington, was marched from Philadelphia to form part of the garrison at West Point, where an engineer school, a laboratory, and a library had already been established in three separate buildings.

On March 30, 1779, the Board of War adopted regulations for the Corps of Engineers and for the Sappers and Miners. These were promulgated in orders, July 30, 1779, by George Washington and provided for a plan of instruction to be carried into effect after approval by the Board and by the General-in-Chief. The plan contemplated lectures, by engineer officers, on fortification, mining, reconnaissance, encampments and the like. Practical experiments in gunnery were conducted at West Point as early as February, 1780. In 1783, after the cessation of hostilities, Washington, having been called upon for his views as to the peace establishment, laid the matter of a Military Academy before his officers at Newburg. He referred to it again in his message on December 3, 1793. The law of May 9, 1794, authorized the organization of a Corps of Artillerists and Engineers with two cadets to a company, thus creating the new grade of "cadet" in the American Army. A school for the Artillerists and Engineers, and for the cadets attached to the Corps, was established, on the recommendation of Washington, by order, at West Point in 1794. The destruction of its buildings by fire, in 1796, caused its suspension. In July, 1801, the Secretary of War directed that all the cadets of the Corps of Artillerists should report at West Point for instruction, and in September, a school was opened with four army officers and a civilian as administrators and instructors.

An Act of Congress approved March 16, 1802, authorized the President to organize and establish a Corps of Engineers to consist of five officers and ten cadets, and provided that it should be stationed at West Point, in the State of New York, and should constitute a Military Academy. The Academy with ten cadets present, was formally opened July 4, the year of the Act.

Acts of Congress, in 1802 and 1808, authorized 40 cadets from the Artillery, 100 from the Infantry, 16 from the Dragoons, and 20 from the Riflemen; few of these were appointed, and no provision was made for them at the Academy. In 1810, the Academy was deprived of nearly all means of instruction, and officers and cadets had difficulty in obtaining their pay. During most of the year 1811, and a part of 1812, although war was imminent, academic instruction was practically abandoned. In

March, 1812, the Academy was without a single instructor. Up to and including this time, 88 cadets had been graduated; they had entered without mental or physical examination, at all ages from 12 to 34, and at various times during the year.

By Act of Congress of April 29, 1812, the Academy was reorganized. The provisions of this Act have furnished the general principles upon which the Military Academy has since been conducted and controlled; a more adequate corps of professors was authorized; a maximum of 250 cadets was fixed; and the age and the mental requisites for admission were prescribed.

In 1817, under the provisions of the Act of 1812, and the able superintendency of Major Sylvanus Thayer, Corps of Engineers, the present era in the Academy's history opened.

Until 1843, a prescribed residence was not a legal qualification for appointment, but the selection of one cadet from each Congressional district had grown to be customary. In this year the custom became the law, Congress prescribing that the Corps of Cadets should consist of one from each Congressional district, one from each Territory one from the District of Columbia, and ten from the United States at large, to be appointed by the President.

By the Acts of Congress approved May 4, 1916, and June 8, 1926, the Corps of Cadets as now constituted consists of two from each Congressional district, two from each Territory, four from the District of Columbia, two from Porto Rico, four from each State at large and one hundred and twenty-two from the United States at large, two of whom are appointed upon the recommendation of the Vice President, and twenty of whom are selected from among the honor graduates of educational institutions having officers of the Regular Army detailed as professors of military science and tactics under existing law or any law hereafter enacted for the detail of officers of the Regular Army to such institutions, and which institutions are designated as "honor" schools, upon the determination of their relative standing at the last preceding annual inspection regularly made by the War Department. They shall be appointed by the President and shall, with the exception of the one hundred and twenty-two appointed from the United States at large, be actual residents of the Congressional or Territorial district, or of the District of Columbia, or of the island of Porto Rico, or of the States, respectively, from which they purport to be appointed. The President is also authorized to appoint cadets from among enlisted men, in number as nearly equal as practicable, of the Regular Army and the National Guard, between the ages of nineteen and twenty-two years, who have served as enlisted men not less than one year, to be selected under such regulations as the President may prescribe, but the total number so selected shall not exceed one hundred and eighty at one time. The increase provided for in the Act of May 4, 1916, was divided into four annual increments which were as nearly equal as practicable and were equitably distributed among the sources from which appointments are authorized. Under these Acts, and under the apportionment of Members of Congress according to the 13th Census, the maximum number of cadets is 1374.

In addition to the 1,374 mentioned above, the Secretary of War is authorized to permit not exceeding four Filipinos, to be designated, one for each class, by the Governor General of the Philippine Islands, to receive instruction at the United States Military Academy: "*Provided*, That the Filipinos undergoing instruction shall receive the same pay, allowances, and emoluments as are authorized by law for cadets at the Military Academy appointed from the United States, to be paid out of the same appropriations: *And provided further*, That said Filipinos undergoing instruction on graduation shall be eligible only to commissions in the Philippine Scouts. And the provisions of section 1321, Revised Statutes, are modified in the case of the Filipinos undergoing instruction, so as to require them to engage to serve for eight years, unless sooner discharged, in the Philippine Scouts." (35 Stats., 441.)

The total number of graduates, including foreigners receiving instruction under Acts of Congress, from 1802 to June 9, 1928, inclusive, is 8486.

### COMMENDATORY REFERENCES TO THE ACADEMY.

"I have duly received your letter of the 28th ultimo, enclosing a copy of what you had written to the Secretary of War, on the subject of a Military Academy.

"The establishment of an Institution of this kind, upon a respectable and extensive basis, has ever been considered by me as an object of primary importance to this country; and while I was in the Chair of Government, I omitted no proper opportunity of recommending it, in my public speeches and other ways, to the attention of the Legislature. But I never undertook to go into a detail of the organization of such an academy; leaving this task to others whose pursuits in the paths of science, and attention to the arrangements of such institutions, had better qualified them for the execution of it. For the same reason I must now decline making any observations on the details of your plan; and as it has already been submitted to the Secretary of War, through whom it would naturally be laid before Congress, it might be too late for alterations if any should be suggested."

"I sincerely hope that the subject will meet with due attention, and that the reasons for its establishment which you have so clearly pointed out in your letter to the Secretary, will prevail upon the Legislature to place it upon a permanent and respectable footing."—*George Washington. (Letter to Alexander Hamilton dated Mount Vernon, 12 December, 1799, two days before General Washington died.)*

"I recommend to your fostering care, as one of our safest means of national defense, the Military Academy. This institution has already exercised the happiest influence upon the moral and intellectual character of our Army; and such of the graduates as from various causes may not pursue the profession of arms will be scarcely less useful as citizens. Their knowledge of the military art will be advantageously employed in the militia service, and in a measure secure to that class of troops the advantages which in this respect belong to standing armies."—*Andrew Jackson. (Extract from his First Message to Congress December, 1829.)*

"I give it as my fixed opinion, that but for our graduated cadets, the war between the United States and Mexico might, and probably would, have lasted some four or five years, with, in its first half, more defeats than victories falling to our share; whereas, in less than two campaigns, we conquered a great country and a peace, without the loss of a single battle or skirmish."—*Winfield Scott. (Extract from a letter written by him July 25, 1860, to Lieutenant Ives, Secretary to the U. S. Military Academy Commission.)*

"The foregoing considerations naturally bring to mind the Military Academy at West Point. I believe that the great service which it has rendered the country was never more conspicuous than it has been during the past two years. The faithful and efficient services of its graduates since the declaration of war with Spain have more than repaid the cost of the institution since its foundation. They have been too few in number and most heavily burdened."—*Elihu Root. (Extract from his report as Secretary of War, June 30, 1899.)*

"This institution has completed its first hundred years of life. During that century no other educational institution in the land has contributed so many names as West Point has contributed to the honor roll of the nation's greatest citizens."—*Theodore Roosevelt. (Extract from his address at the Centennial Exercises U. S. Military Academy, June 11, 1902.)*

"In the World War, West Point again demonstrated its supreme value to the country in the hour of need. Our great overseas army was made and led by West Point men and the incredible swiftness with which it was trained for its great task is a tribute to the fineness of the raw material and also to the leadership generated by West Point. In all walks of life character is the indispensable basis of enduring success. West Point does many things for its men, but the highest quality it gives them is character and in the emergency of the World War, our success rested upon the character of our leaders. It, therefore, finally rested upon West Point."—*Newton D. Baker. (Extract from a letter written by him March 27, 1928, to Major General William R. Smith, Superintendent, U. S. Military Academy.)*

NOTE.—The selection of the Superintendents of the Military Academy was confined to the Corps of Engineers from the establishment of the Institution, March 16, 1802, till the passage of the law of July 13, 1866, which opened it to the entire Army. By the Act of June 13, 1838, the local rank of Colonel was conferred upon the Superintendent. 1 Major Williams resigned June 20, 1803, on a point of command, and pending his settlement until April 19, 1805, when he again returned to service as Chief Engineer, no permanent Superintendent of the Military Academy was appointed the command devolving upon the senior officer of the Corps of Engineers present for duty. 2 Bvt. Major P. G. T. Beauregard, Corps of Engineers, by order of John B. Floyd, Secretary of War, relieved Colonel Delafield, Jan. 23, 1861, from the superintendency of the Military Academy, but was himself displaced five days later, Jan. 28, 1861, by direction of the succeeding Secretary of War, Joseph Holt, the command again devolving upon Colonel Delafield.

## CLASSIFICATION OF CADETS.

---

The Cadets are arranged in four distinct classes, corresponding with the four years of study. The Cadets employed on the first year's course constitute the *Fourth Class*; those on the second year's course the *Third Class*; those on the third year's course the *Second Class*; and those on the fourth year's course the *First Class*.

The academic year commences on the 1st of July. On, or before, that date the result of the examination held in the preceding month is announced and Cadets are advanced from one class to another. At no other time is a Cadet advanced from one class to another, unless prevented by sickness, or authorized absence, from attending the aforesaid examination; in such a case a special examination is granted; but in no case is a Cadet advanced from one class to another without having satisfied the Academic Board of his proficiency in each branch of study pursued by his class.

*Names marked thus \* in the following pages are regarded as distinguished cadets, their total proportional parts on the general merit roll of the class at the close of the term in the preceding June having exceeded ninety-two per cent of the possible total. A complete list of distinguished cadets by classes, and the subjects in which they particularly excel, will be found in the following pages.*

*Cadets whose names are marked thus † were found deficient, and turned back, to join the next succeeding class.*

*Cadets whose names are marked thus ‡ were found deficient, and discharged.*

*Note.*—The full and complete name of each and every Cadet, place of birth, date of birth, and source of appointment is set forth in the alphabetical index to be found in the back of this Register.

**Information Relative to the Appointment and Admission of Cadets to the United States Military Academy, West Point, N. Y.**

[Communications relating to matters connected with the Military Academy should be addressed to The Adjutant General of the Army, Washington, D. C.]

**THE MILITARY ACADEMY**

1. The United States Military Academy is an institution established by the Government for the practical and theoretical training of young men for the military service. Its cadets are given a comprehensive and general education of collegiate grade and a sufficient basic military training to enable them to enter upon the duties of second lieutenant in any branch of the Army to which they may be individually assigned.

2. Direction and supervision of the Military Academy are vested by law in the War Department under such officer or officers as the Secretary of War may select, and, in accordance with this provision, the Chief of Staff has been designated as the officer in charge of all matters pertaining to the institution.

**COURSE OF PROCEDURE FOR CANDIDATES**

3. The candidate for a cadetship, assuming that he is unmarried and that at the time of his proposed entrance he will come within the proscribed age limits, must follow the steps outlined below. He must first obtain an appointment to a vacancy, existing or prospective. He must then demonstrate that he measures up to certain physical and educational standards. His physical fitness is determined by examination; his educational qualifications may be shown by examination or by the submission of certain prescribed certificates. If he be accepted, he reports at the academy on the first week day in July and, prior to admission, he is required to take the oath of allegiance and to subscribe to an engagement to serve the United States for a time subsequent to his graduation. (See par. 47.)

**COURSE AS A CADET**

4. Upon admission to the academy, he enters upon a four-year course of study and training. The academic year extends from September 1 to June 4, the greater part of the remainder of the year being spent in camp and devoted to military training. At the end of his second year at the academy he is granted a furlough of about 10 weeks, which, with the exception of a few days during Christmas week of his second, third, and fourth years, is the only extended vacation which he receives. During the time that he remains a cadet, he is paid at the rate of \$1,072 per annum. Upon graduation he may be commissioned as a second lieutenant in one of the branches of the Army.

The points brought out briefly in the paragraphs above are explained in detail in the following pages.

**STRENGTH OF THE CORPS OF CADETS**

5. The maximum authorized strength of the Corps of Cadets, excepting four Filipinos, is 1,374, appointed in number and from sources as follows:

4 from each State at large.....	192
2 from each congressional district.....	870
2 from each Territory.....	4
4 from the District of Columbia.....	4
2 from natives of Porto Rico.....	2
122 from the United States at large <sup>1</sup> .....	122
180 from among the enlisted men of the Regular Army and of the National Guard, in number as nearly equal as practicable.....	180
Total.....	1,374

<sup>1</sup> Of whom 2 are appointed upon the recommendation of the Vice President, 20 are selected from among the honor graduates of those educational institutions which have officers of the Regular Army detailed as professors of military science and tactics and which upon the determination of their relative standing at the last preceding annual inspection regularly made by the War Department were designated as "honor military schools," and 40 are chosen from among the sons of veterans who were killed in action or died prior to July 2, 1921, of wounds received or disease contracted in line of duty during the World War.

## FILIPINO CADETS

6. In addition to the 1,374 mentioned above, the Secretary of War is authorized to permit not exceeding four Filipinos, to be designated one for each class by the Governor General of the Philippine Islands, to receive instruction at the United States Military Academy: "Provided, That the Filipinos undergoing instruction shall receive the same pay, allowances, and emoluments as are authorized by law for cadets at the Military Academy appointed from the United States, to be paid out of the same appropriations: And provided further, That said Filipinos undergoing instruction, on graduation shall be eligible only to commissions in the Philippine Scouts. And the provisions of section 1321, Revised Statutes, are modified in the case of Filipinos undergoing instruction, so as to require them to engage to serve for eight years, unless sooner discharged, in the Philippine Scouts." (35 Stat. 441.)

### APPOINTMENTS, HOW MADE

7. The numbers mentioned above represent the maximum allowed at the Military Academy at any one time from the respective sources; consequently, no appointment can be made from any source except to fill a vacancy therefrom.

All appointments are made by the President and as follows:

From States at large and from congressional districts, upon the recommendations of the respective Senators and Representatives in Congress.

From the Territories, upon the recommendations of the respective Delegates in Congress.

From the District of Columbia, upon the recommendations of the commissioners thereof.

From Porto Rico, upon the recommendation of the Resident Commissioner.

(Those cadets appointed from States at large, from congressional districts, from the Territories, from the District of Columbia, and from the island of Porto Rico, must, under the law, be *actual residents* thereof, respectively.)

From among the honor graduates of educational institutions designated as "honor military schools," upon the recommendations of the heads of the respective schools.

From among the enlisted men of the National Guard of the States and Territories, and of the island of Porto Rico, upon the recommendations of the respective governors thereof.

From among the enlisted men of the National Guard of the District of Columbia, upon the recommendation of the commanding general of the District Militia.

From among the enlisted men of the Regular Army, upon the recommendations of the commanding generals of the respective corps areas and territorial departments.

Appointments from the United States at large (excepting those from "honor military schools," those chosen from among the sons of deceased World War veterans, and those appointed upon the recommendation of the Vice President) are made by the President upon his own selection, and as the result of a competitive examination, identical in every respect with the regular entrance examination.

### SELECTION OF CANDIDATES

8. From States at large, congressional districts, and Territories.—The selection of candidates, by competitive examination or otherwise, for appointment from any State at large or congressional district, is entirely in the hands of the Senator or Representative in Congress who has the vacancy at his disposal, and all applications for appointment from those sources should be addressed to the proper Senator or Representative.

For each vacancy from a State at large, or congressional or Territorial district, three candidates should be nominated, one to be named as *principal*, one as *first alternate*, and one as *second alternate*. The first alternate, if qualified, will be admitted in the event of the failure of the principal; the second alternate, if qualified, will be admitted in the event of the failure of both the principal and the first alternate.

These candidates must, at date of admission, be between the ages of 17 and 22 years.

9. From "honor military schools."—*Honor graduates* of "honor military schools" are selected for appointment as cadets of the United States Military Academy in the following manner:

There is maintained in the office of The Adjutant General of the Army a roster of "honor military schools" as determined by annual War Department inspec-

tions of educational institutions. At an early date in each year The Adjutant General of the Army will anticipate the vacancies in the Corps of Cadets which are open to *honor graduates* and will make an equitable distribution of those vacancies amongst the "honor military schools" and notify them accordingly. Each designated institution will at a specified time notify The Adjutant General of the Army of the name of the selected *honor graduate* from that year's graduating class.

An *honor graduate* of a selected institution will be appointed, without mental examination but subject to a satisfactory physical examination, a cadet of the United States Military Academy upon the certificate of the head of the institution that the appointee is the *honor graduate* of that institution. No student will be rated as *honor graduate* unless he has in his school work shown proficiency in subjects amounting to not less than the 14 units prescribed by the regulations for admission to the United States Military Academy. A certificate (Form II) will be forwarded to the adjutant of the academy when the appointment is made. (See par. 23.)

These candidates must, at date of admission, be between the ages of 17 and 22 years.

10. **From among sons of deceased World War veterans.**—An act of Congress approved June 8, 1926, authorized 40 cadets to be appointed by the President from among the sons of officers, soldiers, sailors, and marines of the Army, Navy, and Marine Corps of the United States who were killed in action or died prior to July 2, 1921, of wounds or injuries received, or disease contracted in line of duty during the World War; one-half to be appointed from among the sons of officers and one-half from among the sons of warrant officers, soldiers, sailors, and marines.

Candidates appointed under this act must be between the ages of 17 and 22 years and meet the usual physical requirements, and will be required to undergo the regular entrance examination competitively, the vacancies available from this source being awarded to those physically qualified competitors who make the highest proficient ratings in the order of merit established by the examination mentioned. There is no restriction as to residence in the case of these appointees.

No form is prescribed for making application, which should be by letter addressed to The Adjutant General of the Army, showing the full name, date of birth, and address of the applicant, and the name, rank, and organization of his father, together with a brief statement showing the time and cause of his death. If the father of the applicant was an enlisted man, his serial number should also be given.

11. **From the National Guard.**—To be eligible for appointment from the National Guard, an applicant must be an enlisted man of a unit recognized by the Federal Government and must, at date of admission, be between the ages of 19 and 22 years and have served as an enlisted man in the guard not less than one year. It is not essential that the service shall have been continuous; therefore, former service in the guard may be counted in determining an applicant's eligibility. Similarly, service with a National Guard organization prior to its recognition by the Federal Government may be considered, the date of enlistment of the soldier governing, and not that of the recognition of the unit. Those applicants who contemplate enlisting in the National Guard for the purpose of being appointed to the Military Academy should do so early enough to enable them to acquire the year of service by the date of admission in the year during which they desire to enter.

For vacancies in the cadetships allotted to enlisted men of the National Guard, the candidates, not exceeding three for each vacancy, will be apportioned, in number as nearly equal as practicable, among the States, the Territories, the District of Columbia, and the island of Porto Rico, according to their enlisted strength. With the exception of the candidates from the District of Columbia, they will be selected by the governors from successful competitors in a **PRELIMINARY EXAMINATION** to be held between November 1 and November 15 of each year, such examination to be of a scope and nature similar to the regular examination for entrance to the United States Military Academy. The candidates from the National Guard of the District of Columbia will be similarly selected by the commanding general of the District of Columbia Militia.

Each candidate thus selected will be authorized by the War Department to report for the regular Military Academy entrance examination, which he must undergo in competition with the entire number of National Guard candidates, the available vacancies being awarded to those physically qualified candidates

making the highest proficient averages in the order of merit established at the last-mentioned examination, irrespective of the State, Territory, or District to which their organizations may belong. The selection being made throughout by competition, alternates can not be considered under any circumstances.

12. **From the Regular Army.**—To be eligible for appointment from the Regular Army, an applicant must be an enlisted man thereof, and must, at date of admission, be between the ages of 19 and 22 years, and have served as an enlisted man in the Army not less than one year. It is not essential that the service shall have been continuous; therefore, prior Army service may be counted in determining a soldier's eligibility. Those applicants who contemplate enlisting in the Army for the purpose of being appointed to the Military Academy should do so early enough to enable them to acquire the year of service by the date of admission in the year during which they desire to enter.

The candidates nominated for cadetships allotted to the enlisted men of the Regular Army shall not exceed three times the number of existing vacancies and shall be equitably distributed among the corps areas and territorial departments by the War Department. If the number of applicants in any corps area or department exceeds the share allotted to it by the War Department, the candidates in such corps area or department will be chosen from the successful competitors in a PRELIMINARY EXAMINATION to be held in the several corps areas and territorial departments between December 1 and December 15, except that in the Philippine Department it is held between November 1 and November 15, such examination to be of a scope and nature similar to the regular examination for entrance to the United States Military Academy.

Each such candidate will be authorized to report for the regular Military Academy entrance examination, which he must undergo in competition with the entire number of Army candidates, the available vacancies being awarded to those physically qualified competitors making the highest proficient averages, in the order of merit established at the last-mentioned examination, without regard to the corps area or territorial department from which designated. The selection being made throughout by competition, alternates can not be considered under any circumstances.

#### EDUCATIONAL QUALIFICATIONS, HOW SHOWN

13. There are *two* methods of meeting the educational requirements for admission to the Military Academy, viz, by successfully passing the regular entrance examination, or by submitting a satisfactory educational certificate in lieu thereof. (See par. 23.)

#### ENTRANCE EXAMINATION, WHEN HELD

14. The regular Military Academy entrance examination is held beginning on the first Tuesday in March each year, only one such examination being scheduled annually. Each candidate (unless appointed from the Regular Army) designated to take that examination will receive from the War Department a letter of appointment, and he must appear for examination at the time and place designated therein, before a board of Army officers convened by the War Department. Enlisted men appointed from the Regular Army receive authority from their respective corps area or department commanders to report for examination, and must report at the time and place specified.

The Filipino candidates selected for appointment shall, unless otherwise notified by the War Department, appear for mental and physical examination on the second Tuesday in January of each year before a board of Army officers to be convened at such place in the Philippine Islands as the commanding general of the Philippine Department may designate.

#### ENTRANCE EXAMINATION, WHERE HELD

15. The board before which a candidate is directed to appear will be the one convened at the place nearest or most convenient to his home or to the school at which he is in regular attendance.

20. English grammar.—Candidates must have a good knowledge of *English grammar*; they must be able to define the terms used therein; to define the parts of speech; to give inflections, including declension, conjugation, and comparison; to give the corresponding masculine and feminine gender nouns; to give and apply the ordinary rules of syntax.

They must be able to parse correctly any ordinary sentence, giving the subject of each verb, the governing word of each objective case, the word for which each pronoun stands or to which it refers, the words between which each preposition shows the relation, precisely what each conjunction and each relative pronoun connect, what each adjective and adverb qualify or limit, the construction of each infinitive, and generally to show a good knowledge of the function of each word in the sentence.

They must be able to correct in sentences or extracts any ordinary errors of grammar.

It is not required that any particular textbook shall be followed; but the definitions, parsing, and corrections must be in accordance with good usage and common sense.

D.; (2) mediæval and modern history, from the death of Charlemagne to the outbreak of the French Revolution, 814 A. Inasmuch as a radical change was made in 1924 in the type of examination in history, questions used prior to March 1, 1924, would be of no value to a candidate, and are, therefore, omitted.

## ADMISSION BY CERTIFICATE

23. The Academic Board will consider and *may accept* in lieu of the regular mental examination—

(1) A properly attested certificate (Form II) that the candidate has graduated from a preparatory school or public high school accredited by the United States Military Academy, provided that in his school work he has shown proficiency in subjects amounting to not less than 14 units of the lists given below.

Of the 14 units, 2 must be in algebra, 1 in plane geometry,  $1\frac{1}{2}$  in English grammar and composition,  $1\frac{1}{2}$  in English literature, and 2 in history. The remaining 6 units may be chosen from the list of optional subjects given hereafter, but can not include commercial or other subjects not included in the list.

If a scrutiny of the certificate submitted shows evidence of low grades or of graduation at an irregular date, the certificate will be rejected.

(2) A properly attested certificate (Form II) that the candidate is in actual attendance in his senior year at a preparatory school or public high school accredited by the United States Military Academy, and has satisfactorily completed three and one-half years' work at such school, provided that the certificate shows specifically by subjects and units the work already completed and also that to be completed by graduation, and provided that the course the candidate is pursuing will, when completed, show proficiency in subjects amounting to not less than 14 units of the list given below and the certificate includes a statement to that effect.

Of the 14 units, 2 must be in algebra, 1 in plane geometry,  $1\frac{1}{2}$  in English grammar and composition,  $1\frac{1}{2}$  in English literature, and 2 in history. The remaining 6 units may be chosen from the list of optional subjects given hereafter, but can not include commercial or other subjects not included in the list. If a scrutiny of the certificate submitted shows low grades, the certificate will be rejected.

A candidate submitting a certificate showing actual attendance at and prospective graduation from a preparatory school or public high school must as a condition of admission continue his course of study, and submit his diploma or other formal evidence of graduation at the time of entrance to the United States Military Academy. Failure to submit such evidence of graduation will disqualify the candidate for entrance.

(3) A properly attested certificate (Form I) that the candidate is a regularly enrolled student in good standing without condition in a university, college, or technical school accredited by the United States Military Academy, provided that the entrance requirements of the course he is pursuing require proficiency in subjects amounting to not less than 14 units of the list given below.

Of the 14 units, 2 must be in algebra, 1 in plane geometry,  $1\frac{1}{2}$  in English grammar and composition,  $1\frac{1}{2}$  in English literature, and 2 in history. The remaining 6 units may be chosen from the list of optional subjects given hereafter, but can not include commercial or other subjects not included in the list.

If attendance at college extends over a semester, the full record of academic work at the college, giving subjects taken and grades attained in each, must be submitted on Form I.

Candidates who have taken work in a college or university must submit a certificate, Form I, covering college work. If the college certificate covers one or more complete semesters with grades, it need not be accompanied by a certificate, Form II, covering the candidate's work in high school or preparatory school. If, however, the college certificate, Form I, covers less than one complete semester's work, it must be accompanied by a certificate, Form II, covering the candidate's work in high school or preparatory school. When both college and high school certificates are submitted, they will be considered together.

A certificate indicating enrollment in or admission to an institution at any other time than that specified in the college register for regular admission or enrollment will not be accepted. If a scrutiny of the certificate submitted shows low grades, the certificate will be rejected.

(4) A properly attested certificate (Form III) from the College Entrance Examination Board that the candidate has shown proficiency in the examinations set by the board in subjects amounting to 14 units from the lists given below. Of the 14 units, 2 must be in algebra, 1 in plane geometry,  $1\frac{1}{2}$  in English grammar and composition,  $1\frac{1}{2}$  in English literature, and 2 in history. The remaining 6 units may be chosen from the list of optional subjects given hereafter, but can not include commercial or other subjects not included in the list. If a scrutiny of the certificate submitted shows low grades, the certificate will be rejected.

This statement is designed to afford a standard of measurement for the work done in secondary schools. It takes the four-year high-school course as a basis, and assumes that the length of the school year is from 36 to 40 weeks, that a period is from 40 to 60 minutes in length, and that the study is pursued for four or five periods a week; but under ordinary circumstances a satisfactory year's work in any subject can not be accomplished in less than 120 sixty-minute hours or their equivalent.

## GENERAL INFORMATION AS TO CERTIFICATES

38. All necessary papers, *including a set of blank certificate forms* (except Form III, which is sent only upon application), are furnished by The Adjutant General of the Army to each duly nominated candidate (except where competition is specified) with his letter of appointment.

*Any candidate who contemplates submitting a certificate shall, immediately upon receiving his appointment, forward to the Adjutant, United States Military Academy, West Point, N. Y., the names and addresses of all educational institutions from which he expects to obtain certificates, in order that information as to the status of those institutions may be procured before the arrival of the certificates.*

Certificates should be submitted not later than February 1. A certificate received between February 1 and the examination will receive consideration, but, in view of the short time left to the academic board to investigate its value, no assurance will be given that such certificate can be acted on in time to exempt the candidate from the mental examination. Certificates received at West Point too late for full investigation and appraisal before 9 o'clock a. m. on the first Tuesday in March of each year will be returned to the candidates concerned without action.

*Candidates who submit certificates on a date which does not allow the academic board sufficient time to investigate their value and notify them regarding the final action thereon prior to the day set for the examination should proceed with the regular examination.*

Candidates who are informed that their certificates have been accepted must present themselves at the regular time and place, as herein prescribed, for physical examination.

A candidate whose certificate qualifications have been approved *conditionally* (that is, approved provided he completes his regular high school or preparatory school course with good grades, and graduates) must bring with him, and present on the day he reports for admission, his diploma or certificate of graduation, together with a certified statement of the grades attained in his academic work, in order that the Academic Board of the Military Academy may determine whether or not sufficient and satisfactory work has been accomplished to remove his condition. The foregoing does not apply to a candidate whose certificate has been approved *unconditionally*.

A certificate which is accepted as satisfactory for one examination will be regarded as satisfactory for any other examination which may be set for entrance with the same class.

Any certificate accepted for one class and presented for a succeeding class should be accompanied with a full statement of the candidate's educational work in the interim, and both certificate and statement will be subject to careful scrutiny by the academic board.

Inasmuch as candidates from the United States at large, the Regular Army, and the National Guard are appointed to vacancies in the order of merit competitively established as a result of the regular entrance examination, such candidates are not permitted to submit educational certificates in lieu of that examination.

## ACADEMIC PREPARATION FOR ADMISSION TO, AND SUCCESS IN, THE UNITED STATES MILITARY ACADEMY

39. A young man who hopes to enter the United States Military Academy and to succeed in the academic work of the institution should choose his courses carefully in his high school or preparatory school and exert his best efforts to obtain high grades.

If he knows early in his secondary school course of the possibility of his receiving an appointment to West Point, his problem is easy to solve. In order to qualify for admission by certificate he will learn from a study of the foregoing paragraphs that he *must* complete the following subjects with high grades:

	Units
Mathematics A1 (algebra, to quadratics), one year's work.....	1
Mathematics A2 (algebra, quadratics, and beyond), one year.....	1
Mathematics C (plane geometry), one year.....	1
English (both 1 and 2, including English grammar, composition, and literature), three years' work.....	3
History (any two courses, as outlined), two years' work.....	2

The satisfactory completion of these subjects will give a candidate eight of the units required for admission, provided each has been taken for the period designated above. If, however, a subject has not been studied for the time indicated, credit can be claimed only for the portion covered. Thus, suppose mathematics A2 has been studied for only one term instead of throughout a year; only  $\frac{1}{2}$  unit can be claimed for this subject, and the candidate must submit evidence that the content of his course has satisfied the Military Academy requirements. It must always be remembered that, as stated in paragraph 37, a unit can be claimed only for a subject pursued for an entire academic year.

Assuming that the candidate has had the requisite time in the above courses, he is then free to select from other courses offered by his secondary school any six units among those in the acceptable list given above (under Optional, paragraph 24). A study of the West Point curriculum will reveal that in the early years of the course the subjects of mathematics, French, and English occupy the major part of the academic time, and that the course throughout is of a scientific nature. It would be advisable, therefore, for the prospective candidate to choose his secondary school courses with these facts in mind. He might well, for example, shape his course, in addition to the required subjects already mentioned, to include the following:

	Units
Mathematics B (advanced algebra), one-half year.....	$\frac{1}{2}$
Mathematics E (trigonometry), one-half year.....	$\frac{1}{2}$
(If these subjects are not available in the regular school curriculum, either physics or chemistry, taken for an entire school year, may well be substituted.)	
English (continue for a regular four years secondary school course).....	1
French A (elementary), taken for two years.....	2
French B (intermediate), taken for one year.....	1

These subjects, giving credit for five units, added to the previous required subjects, will make a total of 13 units. The remaining unit necessary to satisfy the 14 unit requirement for certificate qualification for admission may well be selected from the following:

	Units
Physics, one year.....	1
Chemistry, one year.....	1
Mechanical drawing, one year.....	1
Spanish, two years.....	2
History, any additional course, one year.....	1
Latin 1 (grammar), one year.....	1
Latin 2 (elementary composition), one year.....	1
(The full list of optional subjects, with their respective unit weights, is given in paragraph 24 of this pamphlet.)	

A typical four-year secondary school course which in academic work meets the entrance requirements and should give an excellent foundation for successfully taking the work in the Military Academy would be as follows:

#### FRESHMAN YEAR, SECONDARY SCHOOL

	Units
Algebra to quadratics.....	1
English.....	1
History, ancient.....	1
French A (beginner's, first year).....	1
	4

#### SOPHOMORE YEAR, SECONDARY SCHOOL

Algebra, quadratics and beyond.....	1
English.....	1
History, European.....	1
French A (beginner's, completed).....	1
	4

JUNIOR YEAR, SECONDARY SCHOOL		Units
Plane geometry	-----	1
English	-----	1
History (United States)	-----	1
French B (intermediate)	-----	1
		4
SENIOR YEAR, SECONDARY SCHOOL		
Advanced algebra, one term	-----	$\frac{1}{2}$
Trigonometry, one term	-----	$\frac{1}{2}$
(Or physics, or chemistry, for an entire academic year, 1 unit.)		
English	-----	1
Physics (or chemistry)	-----	1
Mechanical drawing (or biology, etc., list of optional subjects given on p. 27)	-----	1
		4
Total acceptable units for admission	-----	16

If the prospective candidate learns when he has partly finished his secondary school course, of the possibility of an appointment to the Military Academy and desires to shape his course to give him the best preparation, his problem may be more difficult. Suppose, for example, that he has elected during his freshman and sophomore years in the secondary school some studies not on the acceptable list at the Military Academy—studies such as typewriting, stenography, bookkeeping, business accounting, woodworking, machine-shop work, sociology, principles of democracy, economics, business arithmetic, business law, animal husbandry, agriculture—he will find that he must choose his subjects for the remainder of the course with the greatest care in order to give him not only the necessary units for certificate qualification but also the desirable foundation for success in the course at the Military Academy.

Thus, to give a concrete example, suppose that a young man has taken the following work during his first two years in his secondary school:

FRESHMAN YEAR, SECONDARY SCHOOL		Units
Algebra to quadratics, acceptable for West Point	-----	1
English, acceptable for West Point	-----	1
History (United States), acceptable for West Point	-----	1
Typewriting, not acceptable	-----	—
Elementary bookkeeping, not acceptable	-----	—
		3
SOPHOMORE YEAR, SECONDARY SCHOOL		
Plane geometry, acceptable for West Point	-----	1
English, acceptable for West Point	-----	1
General science, acceptable for West Point	-----	1
Stenography, not acceptable	-----	—
Business accounting, not acceptable	-----	—
Woodworking, not acceptable	-----	—
		3

Suppose, then, at the end of sophomore year he decides to shape his course to qualify him for admission to and success in the Military Academy. He has at the time only six acceptable units. He must elect subjects for the remaining two years of secondary school work which will be acceptable at West Point and will be of direct assistance to him in his course there after he enters. A young man in this situation might arrange his course for the last two years as follows:

JUNIOR YEAR, SECONDARY SCHOOL		Units
Algebra, quadratics and beyond, acceptable for West Point	-----	1
English, acceptable for West Point	-----	1
History (ancient), acceptable for West Point	-----	1
French (beginner's, first year), acceptable for West Point	-----	1
		4
SENIOR YEAR, SECONDARY SCHOOL		
Advanced algebra, one term, acceptable for West Point	-----	$\frac{1}{2}$
Trigonometry, one term, acceptable for West Point	-----	$\frac{1}{2}$
(Or physics, or chemistry, for an entire academic year, if the above mathematics courses are not included in the regular secondary school curriculum, 1 unit.)		
History (European), acceptable for West Point	-----	1
French (beginner's, completed), acceptable for West Point	-----	1
Mechanical drawing, or physics or chemistry, etc.	-----	1
		4

He will thus, although he did not in his first two years in the secondary school direct his course to that end, have at graduation the 14 units required for certificate qualification and, if his work has been thoroughly done, will also have a good foundation for success in the academic work at the Military Academy.

If a young man does not undertake until very late in his secondary school course to shape his work for West Point, and if he has up to that time been pursuing a course containing many subjects not acceptable at West Point, he will find it impossible in a short time to elect and pursue successfully as a part of his regular curriculum enough units in acceptable subjects to qualify him for admission by certificate. He must expect his certificate to be rejected and must, in case he receives an appointment, prepare himself to take the regular entrance examinations.

It must be remembered in all cases that the secondary school itself must be one accredited by the United States Military Academy, and that evidence of low grades or of graduation at an irregular date will be sufficient to cause rejection of the certificate qualifications of a candidate.

#### REQUIREMENTS AS TO AGE, HEIGHT, AND PHYSICAL CONDITION

40. *Candidates are eligible for admission from the day they are 17 (or 19 if from the Regular Army or from the National Guard) until the day they become 22 years of age, on which latter day they are not eligible. The age requirements for all candidates, as well as the service requirements for appointment from the Army and from the National Guard, are statutory and can not be waived.*

No candidate shall be admitted who is less than 5 feet 4 inches in height, or who is deformed or afflicted with any disease or infirmity which would render him unfit, for the military service, or who has, at the time of presenting himself, any disorder of an infectious or immoral character.

All candidates must be unmarried.

Each candidate must, on reporting at West Point, present a certificate showing successful vaccination within one year; or a certificate of two vaccinations, made at least a month apart, within three months.

#### PRELIMINARY PHYSICAL EXAMINATION

41. Each candidate designated as principal or alternate for appointment as a cadet of the Military Academy should ascertain as soon as practicable whether or not he has any physical defect that would disqualify him for admission or any that should be corrected by treatment before presenting himself for examination. For this purpose he should immediately cause himself to be examined by a physician, preferably a medical officer of the Regular Army. The preliminary physical examination is of great importance to the candidate as it should enable him to determine if he has any physical defect which might subsequently prevent his appointment.

The presentation by an appointee of his letter of conditional appointment, with a request for physical examination, or the presentation by a prospective appointee of a letter signed by a Member of Congress stating that the bearer is a candidate for cadet appointment and requesting that he be physically examined, will be sufficient authority for an Army surgeon at any military post to make the desired physical examination. Upon completion of this examination, the Army surgeon will inform the candidate of the result, and in case a disability be found, whether such disability is believed to be permanent and disqualifying for military service, or whether it is believed to be of a temporary or curable nature. The examination is to be regarded as preliminary only and in no manner to affect the decision of the regular medical examining board.

#### REGULAR PHYSICAL EXAMINATION

42. The physical examination of all candidates taking the mental examination begins in the afternoon of the third day and is continued daily until completed, but those candidates who upon reporting at the place of examination present evidence that they have been excused from the mental examination under the provisions of the certificate privilege, or as the result of having qualified mentally at a previous examination, are usually examined physically as soon as possible after reporting and are not required to wait until the schedule of mental examinations has been completed.

## PHYSICAL REQUIREMENTS

The following-named conditions are causes for rejection: The total loss of an ear, marked hypertrophy or atrophy, or disfiguring deformity of the organ; atresia of the external auditory canal, or tumors of this part; acute or chronic suppurative otitis media, or chronic catarrhal otitis media; mastoiditis, acute or chronic; existing perforation of the membrana tympani from any cause whatever.

Hyperopia, hyperopic astigmatism, or compound hyperopic astigmatism, with vision less than 20/20 without glasses, is cause for rejection. Both eyes must be free from acute or chronic disease. In the record of all examinations the acuity of vision without glasses, and also with glasses when the acuity is less than 20/20, will be given for each eye separately; in the latter case, the correction will also be noted on the report of physical examination.

The following-named conditions are also causes for rejection: Manifest disturbance of muscle balance; esophoria of more than 10 prism diopters, exophoria of more than 5 prism diopters, or hyperphoria of more than one-half prism diopter; color blindness for red, green, or violet; trachoma, or xerophthalmia; chronic conjunctivitis; pterygium encroaching upon the cornea; complete or extensive destruction of the eyelids, disfiguring cicatrices, adhesions of the lids to each other or to the eyeball; inversion or eversion of the eyelids, or lagophthalmus; trichiasis, ptosis, blepharospasm, or chronic blepharitis; epiphora, chronic dacryocystitis, or lachrymal fistula; chronic keratitis, ulcers of the cornea, staphyloma, or corneal opacities encroaching on the pupillary area and reducing the acuity of vision below the standard noted above; irregularities in the form of the iris, or anterior or posterior synechiae sufficient to reduce the visual acuity below the standard; opacities of the lens or its capsule, sufficient to reduce the acuity of vision below the standard, or progressive cataract of any degree; extensive coloboma of the choroid or iris, absence of pigment, glaucoma, iritis, or extensive or progressive choroiditis; retinitis, detachment of the retina, neuroretinitis, optic neuritis, or atrophy of the optic nerve; loss or disorganization of either eye, or pronounced exophthalmus; pronounced nystagmus, or permanent or well-marked strabismus; diplopia, or night blindness; abnormal conditions of the eyes due to disease of the brain; malignant tumors of lids or eyeballs; asthenopia accompanying any ocular defect.

*c. Teeth*.—No candidate will be accepted unless he has a minimum of 6 serviceable, natural masticating teeth above and 6 below, opposing, and also 4 serviceable, natural incisors above and 4 below, opposing. Therefore, the minimum requirement consists of a total of 12 masticating teeth and 8 incisor teeth, all of which must be so opposed as to serve the purposes of incision and mastication. Well-crowned teeth or single-tooth replacements by a standard method of bridge work may be considered serviceable, natural teeth.

Teeth properly filled with permanent filling material will be considered serviceable, natural teeth. Teeth containing unfilled cavities, or those showing signs of focal infection or involved with pyorrhea pockets even though all cavities are properly filled, will not be considered serviceable teeth.

The following-named conditions are further causes for disqualification if found to exist to such a degree as would immediately or subsequently impair the efficiency of the candidate.

44. MINIMUM STANDARDS OF PHYSICAL PROPORTIONS FOR HEIGHT, WEIGHT, AND CHEST MEASUREMENT FOR ALL CANDIDATES EXCEPT FILIPINOS

The requirements of the following tables of physical proportions are minimum for growing youths and are for guidance in connection with the other data of the examination, a consideration of all of which will determine the candidate's physical eligibility. Mere fulfillment of the requirements of the standard tables does not determine eligibility.

The physical requirements should be those of the age at the birthday nearest the time of the examination. Fractions greater than one-half inch will be considered as an additional inch of height, but candidates must be at least 64 inches in height.

ADMISSION TO THE ACADEMY

46. Date of admission.—Candidates who fully conform to the requirements set forth in the preceding paragraphs, and who report in person to the superintendent on the first week day in July, before 12 o'clock, noon, shall be admitted as cadets of the United States Military Academy and shall receive their warrants of appointment as soon as practicable. Candidates are received beginning at 8.00 a. m., and it is to their advantage to report as soon as practicable after that hour. The Military Academy operates on daylight-saving time beginning the last Sunday in April.

47. Engagement to serve.—Immediately after reporting to the superintendent for admission, and before receiving their warrants of appointment, candidates are required to sign, in the presence of the superintendent or of some officer deputed by him, engagements for service in the following form:

I, \_\_\_\_\_, of the State (or Territory) of \_\_\_\_\_, aged \_\_\_\_\_ years, \_\_\_\_\_ months, do hereby engage (with consent of my parent or guardian) that from the date of my admission as a cadet of the United States Military Academy I will serve in the Army of the United States for eight years unless sooner discharged by competent authority.

In the presence of \_\_\_\_\_.

#### DEPOSIT UPON ENTRANCE

49. Immediately after admission each candidate must be provided with an outfit of uniform, etc., the cost of which is about \$300. This sum, or an amount which, in addition to the mileage allowance mentioned in paragraph 50 will equal \$300, must be deposited with the treasurer of the academy before the candidate is admitted. It is best for the candidate to take with him no more money than he needs for traveling expenses and for his parents to send the required deposit by draft, payable to the treasurer, United States Military Academy. The deposit is credited at once to the cadet's account. Upon graduation a cadet who has exercised proper economy will have sufficient money to his credit with the treasurer of the academy to purchase his uniform and equipment as an officer.

In the case of the Filipino cadets the engagement shall be made to serve in the Philippine Scouts. (See sec. 1321, R. S.)

48. **Oath of allegiance.**—Each cadet shall, previous to his admission to the academy, take and subscribe an oath or affirmation in the following form:

I, \_\_\_\_\_, do solemnly swear that I will support the Constitution of the United States and bear true allegiance to the National Government; that I will maintain and defend the sovereignty of the United States paramount to any and all allegiance, sovereignty, or fealty I may owe to any State, county, or country, whatsoever; and that I will at all times obey the legal orders of my superior officers and the rules and articles governing the Armies of the United States. (Sec. 1320, R. S.)

Sworn to and subscribed at \_\_\_\_\_ this \_\_\_\_\_ day of \_\_\_\_\_, nineteen hundred and \_\_\_\_\_, before me.

#### DEPOSIT UPON ENTRANCE

49. Immediately after admission each candidate must be provided with an outfit of uniform, etc., the cost of which is about \$250. This sum, or an amount which, in addition to the mileage allowance mentioned in paragraph 50 will equal \$250, must be deposited with the treasurer of the academy before the candidate is admitted. It is best for the candidate to take with him no more money than he needs for traveling expenses and for his parents to send the required deposit by draft, payable to the treasurer, United States Military Academy. The deposit is credited at once to the cadet's account. Upon graduation a cadet who has exercised proper economy will have sufficient money to his credit with the treasurer of the academy to purchase his uniform and equipment as an officer.

#### PAY OF CADETS

50. The pay of a cadet is \$780 per year and commutation of rations at 80 cents per day, to commence with his admission to the academy. The total is \$1,072.

Mileage, at 5 cents per mile, while proceeding from his home to the Military Academy is credited to the account of each cadet after his admission to the academy.

A cadet's initial deposit, together with his salary, is sufficient to meet his actual needs at the academy. It is not sufficient, however, to meet, in addition, the expenses of leaves of absence, especially if these involve considerable travel.

Obtaining money from outside sources is regarded with disfavor, unless it be for the purpose of liquidating indebtedness at the cadet store or of defraying the expenses of a leave of absence.

#### UNIFORM AND SUPPLIES

51. Cadets are required to wear the prescribed uniform. All articles of their uniform and equipment, including bedding, shoes, and underwear, are of a designated pattern, and are sold to cadets at West Point at regulated prices. It is not necessary for candidates to make special preparation for their stay at the academy, although there is no objection to their bringing with them such supplies of underwear, toilet accessories, etc., as they may have. Should a trunk be brought it should be of the Army trunk locker type, 29 $\frac{3}{4}$  by 16 by 12 inches in size, and in good condition. If a candidate does not have such a trunk, he should wait until his arrival at the academy to procure one. Everything needed can be secured from the cadet store at West Point.

#### ACADEMIC DUTIES

52. There are two terms of academic instruction: September 1–December 23 and January 2–June 4. A semiannual examination is held December 26–31, and an annual examination June 5–12. At the December examination cadets who are found to be proficient in subjects they have completed during the preceding term are arranged according to merit in each subject. At the June examination they are similarly arranged and they are also assigned general standing in the class as determined by their standings in the various subjects. When a subject of study is completed during a term an examination concluding the work in that subject is sometimes held. Cadets deficient in studies at any examination are discharged from the academy unless for special reasons the academic board recommends otherwise. Cadets exceeding at any time the maximum number of demerits allowed for six months are reported to the academic board as deficient in conduct.

The courses of instruction in the various departments are outlined on pages 42 to 50, inclusive.

THE CORPS AT REVIEW

## DEPARTMENT OF TACTICS

53. *New cadets.*—New cadets report for duty at the Military Academy on the first week day in July. They are quartered separately from the corps and are given intensive training in Infantry recruit instruction, military courtesies, guard duty, marksmanship, and a course of corrective and upbuilding physical training.

After approximately one month of the above training the new cadets join the corps for guard and ceremonies, but remain in their separate quarters. The remainder of the first summer is devoted to basic training in the technique of Infantry, in guard duty, methods of study, swimming, dancing, and lectures on hygiene.

At the end of the first summer the fourth class (new cadets) is fully incorporated into the corps. The military training during the remainder of the year carries on the basic instruction in Infantry and Field Artillery.

*Third class.*—The military training in the third class year continues the basic instruction, taking up Coast Artillery, riding, signal communications, field engineering, map reading, and hippology.

*Second class.*—The second class is absent during the summer. The remainder of the year is utilized to complete and review the basic instruction of the first two years and to take up the subject of minor tactics.

*First class.*—The first class year is devoted primarily to developing qualities of command and leadership, instruction in minor tactics of separate and combined arms, and imparting information of a general nature that officers should have. In other words, the basic training having been completed, cadets are now given the necessary instruction to fit them to exercise the functions of the lowest grade of any branch in which they may be commissioned, with particular attention to methods of training.

*All classes.*—Instruction in swimming and dancing begins in the fourth class year and continues for each cadet until he is declared proficient. Practical instruction in fencing, gymnastic exercises, boxing, wrestling, swimming, and all forms of athletics is given to all classes.

Instruction in equitation is given to the first, second, and third classes.

Special emphasis is given musketry and marksmanship and each cadet is required to fire qualification courses with rifle and pistol. The purpose of this work is twofold: (1) To develop good shots and (2) to give instruction in methods of training.

## DEPARTMENT OF NATURAL AND EXPERIMENTAL PHILOSOPHY

### SECOND CLASS

55. The course in natural and experimental philosophy extends throughout the second-class year. The slide rule, precision of measurements and graphical methods, elementary mechanics and properties of matter, wave motion, sound and light, and general astronomy, in the order named, are taught during the first term. Technical mechanics is taught during the greater part of the second term. This subject is followed by short courses in hydraulics, and aerodynamics, in the order mentioned.

Numerous lectures by the head of the department and visiting scientists are given during the course. In addition to many demonstrations in the section rooms, approximately 30 formal laboratory experiments are performed.

In all there are 225 recitation periods, each of 1 hour and 25 minutes' duration, six attendances per week. Each laboratory period is of 2 hours' duration.

The entire course in so far as the subjects undertaken are concerned, in addition to its educational and training value, is intended as a thorough preparation for engineering and other technical subjects taught during the first-class year.

A brief statement of the courses given and of the textbooks used follows:

### FIRST TERM

*The slide rule.*—Two periods only, based on "Notes on the Slide Rule" prepared in the department. This short course is intended as a refresher course following theoretical instruction given in another department during the fourth-class year. Following these two days' instruction on the practical use of the

slide rule and after about two weeks' use in the section room, appropriate use of the slide rule for computations in the department is obligatory.

*Precision of measurements and graphical methods.*—Approximately eight periods are devoted to this subject, which is presented in "Notes on Precision of Measurements and Graphical Methods," prepared in the department and based on the text "Precision of Measurements and Graphical Methods"—Goodwin, latest edition. In addition to the theoretical instruction, three or four laboratory exercises are presented in this subject.

*General physics.*—Sixty periods in all. The subjects of elementary mechanics, properties of matter, wave motion, sound and light, only, in general physics are assigned to this department. The text used is "College Physics"—Duff, new edition, revised—and the subjects enumerated are given to the extent they are covered in that text. In addition numerous original problems are presented and solved. Laboratory apparatus is used for the qualitative demonstration of practically every principle covered in these subjects. Numerous formal laboratory exercises are likewise given as a part of this course.

*Astronomy.*—Ten periods. The text used is "Elements of Astronomy"—Fath. This course is conducted as a combination reading and lecture course. A portion of each period is devoted to a lecture in which full use is made of astronomical slides. The remainder of the period is devoted to observation, conferences, and quizzes. The entire text is covered.

Upon completion of the advance and partial review of the above-described work a written general review of approximately 15 periods is given, followed by the semiannual examination. This completes the work of the first term.

#### SECOND TERM

*Technical mechanics.*—Seventy-five periods. The text used is "Technical Mechanics"—Maurer, 5th edition. The upper part of the class takes the entire text. The lower part of the class omits certain selected problems and portions of the text. Numerous original problems are presented in addition to those given in the text. In connection with this subject several laboratory exercises of a more or less advanced nature are presented.

*Hydraulics.*—Approximately 22 periods. The text used is "Textbook on Hydraulics"—Russell. The upper part of the class takes the entire text. The lower part of the class usually omits Chapter IX and certain of the more difficult problems.

*Aerodynamics.*—Twenty periods. "Simple Aerodynamics and the Airplane"—Montieth, is used as a text and is supplemented by various Air Corps information circulars, aeronautical magazines, and reports of the Advisory Committee for Aeronautics. The entire text is taken, and is supplemented by approximately 70 original problems.

Upon completion of the advance and partial review of the work indicated above a written general review of approximately 12 periods is given, followed by the annual examination. This completes the work of the second term.

#### DEPARTMENT OF MATHEMATICS

##### THIRD AND FOURTH CLASSES

56. The course in mathematics begins with the fourth-class year and continues through the third-class year.

In the fourth-class year algebra is completed in alternation, first with geometry, then with trigonometry. Plane analytical geometry is begun.

In the third-class year plane and solid analytical geometry and descriptive geometry are completed in alternation. The calculus and least squares finish the course.

The course in algebra covers the entire subject as generally taught in college, but the student is expected already to have mastered elementary algebra to include the progressions and the solution of the quadratic equation. Elementary geometry includes the books that relate to the plane and those that relate to space, but the student is expected to have mastered the former. Trigonometry includes the complete solution of plane and spherical triangles. Analytical geometry includes the discussion of the general equation of the second degree in the plane and the particular forms of the equation of the second degree in space.

Descriptive geometry includes the orthographic projections of the right line, the plane, ruled surfaces and surfaces of revolution, tangent planes and intersection of surfaces. It also takes the subjects of shades and shadows, perspective, isometric projections, and spherical projections.

The course in differential and integral calculus covers the ground of the usual college textbook, including briefly the subject of ordinary differential equations. The method of least squares, given to selected sections, includes the deduction of the facility curve, the formulae for the error, and the distribution of error.

**DEPARTMENT OF CHEMISTRY, ETC.**

**SECOND CLASS**

57. This department embraces the subjects of chemistry, heat, and electricity. The course begins September 1 of the third academic year and extends throughout this year; exercises, recitations, laboratory work, or lectures take place on all week days.

Commencing September 1, general chemistry and heat occupy the time until the close of the term in December, recitations or other exercises being had daily.

During this term all members of the class whose progress, as shown by their recitations, warrants it, are given laboratory practice in chemistry. This practice begins with chemical manipulations and proceeds in the usual general order of elementary laboratory work. The laboratory exercises are two hours long. It is generally possible to give all parts of the class some laboratory experience; the amount of this work, however, varies with the aptitude of the student from a few hours to 30 or more.

This term closes with an examination upon the essential parts of the entire course, which all cadets who have not shown a required proficiency in daily work must take.

The course in heat is short, but it is a comprehensive elementary course intended to embrace what is most applicable to subsequent work at the academy and what is most useful in general education.

In chemistry the course is a descriptive general one, based upon a concise statement of the more essential principles of chemistry, and includes that class of information deemed most important to nonspecialists, together with an accurate and logical treatment of many useful applications of chemistry.

Beginning January 2, the subject of electricity is taken daily. This term also closes with an examination, covering the essential parts of the subject studied during the term, which all cadets who have not shown a required proficiency in daily work must take.

The course in electricity is a brief exposition of the leading electrical phenomena and their relations to each other. It includes a study of the general principles of the subject and of the typical machines, generators, motors, and transformers, together with the more important uses of electricity. The laboratory exercises give experience with a number of the machines and in the use of a great variety of apparatus employed in the numerous forms of electrical measurements. In this term the laboratory work is a part of the electrical course, and all cadets enter the laboratory. All laboratory work is performed under the immediate supervision of an instructor.

Standard works on the respective subjects are always available for reference, both to cadets and instructors.

## DEPARTMENT OF DRAWING

## SECOND AND THIRD CLASSES

58. The course in drawing extends through the third class year and through two-thirds of the second class year. Attendance is on alternate days for periods of two hours.

The course begins with instruction in the use of instruments and single-stroke lettering. This is followed by detailed instruction in orthographic projection, including problems in descriptive geometry, the preparation of detailed working drawings from models, and finally the preparation of finished assembly drawings of rather complicated mechanisms from data furnished in the shape of detailed drawings. All work is completed in pencil, carefully checked, and then finished in ink.

Along with this work practice is given in freehand technical sketching, and the cadet's ability to visualize from the projections is tested by special problems in pictorial representation from the projections. Practice is also given in isometric projection from models and in perspective sketching from models and from orthographic projections.

Instruction in architectural drawing is limited to the preparation of the working plan and elevation of a small masonry building with the necessary lettering and dimensions.

In topographic drawing detailed instruction is given in the principles of map projection, map scales, the various methods of representing ground forms, and the conventional signs and system of rectangular coordinates prescribed for military maps. The simpler methods of transferring data from air photos to maps are explained and illustrated by problems.

Detailed instruction in the classroom and in the field is given in topographic and landscape sketching for military purposes, and each cadet is required to make such sketches on difficult ground with every attention to accuracy and neatness.

Instruction is mainly through a loose-leaf system of printed instruction sheets covering the various drawings and phases of the work. These are supplemented by short section-room lectures and blackboard illustrations when necessary. All work is under close supervision of instructors and personal instruction is constantly given.

## DEPARTMENT OF MODERN LANGUAGES

## SECOND, THIRD, AND FOURTH CLASSES

59. In this department instruction is given in French and Spanish. The French course extends throughout the first and second years—attendance every other recitation day—188 lessons.

The Spanish course extends throughout the third year—attendance every other recitation day—94 lessons.

Both courses start with a study of pronunciation and grammar. Thereafter instruction is given in composition and idiomatic expression. A group of lectures, in French, on French Civilization is given toward the end of the French course and similar lectures form a part of the Spanish course. Practice in original composition is afforded in connection with these lectures. Conversation is practiced throughout the courses.

## DEPARTMENT OF ORDNANCE AND GUNNERY

## FIRST CLASS

61. The course in ordnance and gunnery extends throughout the first class year, one-half of the class attending daily, for a period of 1 hour and 15 minutes, except for a period of 27 days, devoted to hygiene and military art instead of ordnance.

During the first term the course includes a study of the properties, manufacture, care, and use of explosives, the theory of explosives, measurements of velocities and pressures, interior ballistics, exterior ballistics, projectiles, bombs, primers, fuses, ammunition supply, probability of fire, and adjustment of fire.

During the second term the course includes the study of the historical development of arms, materials used in construction of arms, principles of design of guns, carriages, and recoil systems, small arms, machine guns, artillery (field, seacoast, railway, and special), automotive equipment, tanks, tractors, trailers, and fire-control equipment.

The course is supplemented by lectures and by exhibits and models of the various types of arms, ammunition, and accessories.

Practical instruction is given in mechanical trades and is devoted to the principal operations performed in the ordinary metal-working shops. This includes the use of hand and machine tools, Lench and vise work, turning, planing, shaping, drilling, and milling operations, and the forging and hardening processes of steel.

Textbooks: Ordnance and Gunnery—Tschappat. Department pamphlets. War Department publications.

## DEPARTMENT OF MILITARY HYGIENE

62. The course in hygiene covers 32 periods of the cadet's fourth year at the academy and is required for all cadets. Its basic purpose is the teaching of the principles and practice of military hygiene in such a manner as to prepare the future officer so to care for his own health and that of his men in garrison and the field as to keep the effective strength of his unit as near the maximum as possible "to conserve fighting strength."

Some knowledge of anatomy and physiology is necessary as a foundation for the course, and as many cadets enter the academy without such knowledge a number of the periods, about one-third, is devoted to those subjects and constitutes a subcourse.

The remainder of the course, approximately two-thirds, is devoted to the study of the elements of military hygiene. This subcourse deals mainly with principles, as its brevity precludes much more. It deals in the first part with the recruit and his environment, including personal hygiene, foods and their preparation, hygiene of the barracks, of camps, of moving troops, of hot and cold climates.

The second portion deals with the causes of disease, including remote or predisposing causes, immediate or exciting causes, and carriers of disease.

The third portion deals with the prevention and control of epidemics and the line officer's duties and responsibilities in relation thereto.

Textbook: Ashburn—Elements of Military Hygiene, third edition.

#### DEPARTMENT OF ENGLISH

63. The course in English extends through the cadet's first two years at the Military Academy. Recitation periods are on alternate week days, except Saturdays, throughout the academic year.

#### FOURTH CLASS YEAR

The main purpose of the fourth-class English course is to teach the effective use of plain English in expository writing. Students should know how to spell, how to punctuate, and how to write grammatically, before they enter upon this course. For students who are unfamiliar with the requirements of good usage in spelling, punctuation, or grammar, the English department provides thorough instruction during extra instruction periods. Attendance at this extra instruction is voluntary. Though the regular course does not include a formal review of the principles of grammar, instructors correct and discuss specific grammatical errors in papers submitted throughout the year. By lectures, frequent class room discussions, and supervised visits to the library, instructors seek to stimulate interest in reading good books other than those included in the regular course. The readings assigned in the regular course serve principally as source material for student's themes. Tests for mastery of the minimum requirements of the course are briefly as follows:

*At the end of the fall term.*—Ability to write a well-constructed expository paragraph that shows the student's familiarity with the requirements of good usage in spelling, punctuation, grammar, and sentence structure.

*At the end of the spring term.*—Ability to write a well-constructed expository composition.

September to December

*English analysis and exposition.*—Students are required to learn the principles of exposition, and to apply those principles first in the analysis of compositions, paragraphs, and sentences, and then in the practice of writing well constructed sentences and paragraphs. All papers submitted are corrected, returned, and discussed in personal conferences.

*Tests.*—Instruction and exercise material prepared and issued by the Department of English; Woolley's "Handbook of Composition"; "Webster's Collegiate Dictionary."

January to June

*Expository composition.*—This course is a continuation of the fall term course. Students are required to write numerous expository compositions on material covered in reading assignments. These compositions are usually editorials, character sketches, book reviews, or brief essays. All papers submitted are corrected, returned, and discussed in personal conferences.

Reading assignments include selected portions of the Bible, Stevenson's short stories and essays, and several plays by Shakespeare (one comedy, one history, and one tragedy).

*Texts.*—In addition to those listed above, the Bible; Pierce and Canby's "Selections from Robert Louis Stevenson"; Shakespeare's Comedies, Histories, and Tragedies (Everyman's Library Edition).

#### THIRD CLASS YEAR (entire year)

The object of the third-class English course is twofold: First, to teach cadets to talk effectively, and second, to cultivate in them an appreciation of the aesthetic and intellectual value of literature. The material for the course in talking is

taken from the literature of the Victorian period, from current events, from book reviews, from contemporary drama, and from magazine articles. The course in literature includes a study and discussion of selections from Tennyson, Macaulay, Browning, Carlyle, Arnold, Fitzgerald, Rossetti, Morris, Swinburne, Meredith, Huxley, Emerson, and Stevenson. During the year 10 lectures on the Victorian period are given.

The year's work is designed as a continuation of the fourth class course in English. Mastery of the principles taught in the two years will enable the student to write and talk correctly in plain English.

### DEPARTMENT OF ECONOMICS, GOVERNMENT, AND POLITICAL HISTORY

A special course in the history of the United States from the Civil War until the present day is given to the upper sections during the written general review period of the regular course in the spring term.

Textbook: Bassett—A Short History of the United States.

#### ECONOMICS AND GOVERNMENT

The course in economics and government is required of all cadets during their first class year. Government is given during the fall term; economics during the spring term. Recitation periods are on alternate week days throughout the academic year, except for a period of 27 days given to Military Hygiene and Military Art.

The study of government includes an introductory series of lectures on societal evolution and the origin of modern institutions, lessons in the general principles of modern liberal government, and in the organization and operation of the Government of the United States.

Textbooks: Holt—Elementary Principles of Modern Government. Maxey—The Problem of Government.

The study of economics includes an investigation of the economic organization of modern society, with special reference to the United States, and a consideration of the part money and credit play in the operation of this organization. Near the conclusion of the course, a short series of lessons on the principles of double-entry bookkeeping is introduced.

Textbooks: Clay—Economics for the General Reader. Moulton—The Financial Organization of Society. Twentieth Century Bookkeeping and Accounting, Part I.

#### THE LIBRARY

65. Cadets and officers have free access to the library, which comprises approximately 108,000 volumes, with an extensive collection of maps, manuscripts, and rare books. The collection contains substantially all standard books on the subjects taught in the academy, and is especially complete in military subjects.

Its card catalogues (about 380,000 cards) are arranged with the special object of saving the time of cadets. The library is open on week days from 9 a. m. to 6 p. m.; on Sundays and holidays from 2 to 4 p. m.

#### ANNUAL PHYSICAL EXAMINATION OF CADETS

66. All cadets are examined physically each year, and those found physically disqualified to continue with the course, or, in case of the first class, for commission in the Army, are discharged.

#### VACATIONS AND LEAVES OF ABSENCE

67. Academic duties are suspended from the completion of the June examinations until the end of August. During this period cadets are engaged in military duties and exercises and in receiving practical instruction in military and other subjects. Academic duties are also suspended from December 24 until January 2, except for those undergoing examination. All duties and exercises, as far as practicable, are suspended on New Year's Day, February 22, May 30, July 4, Labor Day, Thanksgiving Day, and Christmas Day.

Cadets of the first, second, and third classes not undergoing examinations are allowed leaves at Christmas. Cadets of the first class are also granted six week-end or holiday leaves throughout the year provided this privilege does not interfere with academic or military duty and is warranted by their disciplinary and academic records and money accounts. Excepting such leaves, cadets under ordinary circumstances are allowed but one leave of absence during the four-year course. This leave is granted to those cadets who have successfully completed the third class course of study and extends from the middle of June to the 28th of August.

#### PROMOTION AFTER GRADUATION

68. The act of Congress approved May 17, 1886, to regulate the promotion of graduates of the United States Military Academy provides: "That when any cadet of the United States Military Academy has gone through all its classes and received a regular diploma from the academic staff, he may be promoted and commissioned as a second lieutenant in any arm or corps of the Army in which there may be a vacancy and the duties of which he may have been adjudged competent to perform." The act approved June 4, 1920 (National Defense Act), section 24e, provides: "Appointment of officers.—Except as otherwise herein provided, appointments shall be made in the grade of second lieutenant, first, from graduates of the United States Military Academy."
