HISTORICAL SKETCH.

The United States Military Academy is a school for the practical and theoretical training of cadets for the military service. Upon completing its course satisfactorily, cadets are eligible for promotion and commission as second lieutenants in any arm or corps of the Army the duties of which they have been judged competent to perform.

The supervision and charge of the Academy are in the War Department under such officer or officers as the Secretary of War may assign to that duty (section 1331, Revised Statutes). In conformity with the provisions of this section, the Chief of Staff has been, by direction of the Secretary, charged with the supervision of matters in the War Department pertaining to the Academy.

The occupation of West Point as a military post took place on January 20, 1778, and has been continuous since that date. The earliest proposal for a military school for the United States was that of Brigadier General Henry Knox, Chief of Artillery (May, 1776). His plans were seconded by Colonel Alexander Hamilton and approved by General Washington, though they were not adopted in the form suggested before 1802, other counsels having temporarily prevailed.

On October 1, 1776, Congress passed a resolution appointing a committee to prepare a plan for "A Military Academy at the Army." The result was the resolution of June 20, 1777, providing for a Corps of Invalids "to serve as a military school for young gentlemen previous to their being appointed to marching regiments." The invalid Corps was organized in July, 1777, and in 1781, at the request of Washington, was marched from Philadelphia to form part of the garrison at West Point, where an engineer school, a laboratory, and a library had already been established in three separate buildings.

On March 30, 1779, the Board of War adopted regulations for the Corps of Engineers and for the Sappers and Miners. These were promulgated in orders, July 30, 1779, by George Washington and provided for a plan of instruction to be carried into effect after approval by the Board and by the General-in-Chief. The plan contemplated lectures, by engineer officers, on fortification, mining, reconnaissance, encampments and the like. Practical experiments in gunnery were conducted at West Point as early as February, 1780. In 1783, after the cessation of hostilities, Washington, having been called upon for his views as to the peace establishment, laid the matter of a Military Academy before his officers at Newburg. He referred to it again in his message on December 3, 1793. The law of May 9, 1794, authorized the organization of a Corps of Artillerists and Engineers with two cadets to a company, thus creating the new grade of "cadet" in the American Army. A school for the Artillerists and Engineers, and for the cadets attached to the Corps, was established, on the recommendation of Washington, by order, at West Point in 1794. The destruction of its buildings by fire, in 1796, caused its suspension. In July, 1801, the Secretary of War directed that all the cadets of the Corps of Artillerists should report at West Point for instruction, and in September, a school was opened with four army officers and a civilian as administrators and instructors.

An Act of Congress approved March 16, 1802, authorized the President to organize and establish a Corps of Engineers to consist of five officers and ten cadets, and provided that it should be stationed at West Point, in the State of New York, and should constitute a Military Academy. The Academy with ten cadets present, was formally opened July 4, the year of the Act.

Acts of Congress, in 1802 and 1808, authorized 40 cadets from the Artillery, 100 from the Infantry, 16 from the Dragoons, and 20 from the Riflemen; few of these were appointed, and no provision was made for them at the Academy. In 1810, the Academy was deprived of nearly all means of instruction, and officers and cadets had difficulty in obtaining their pay. During most of the year 1811, and a part of 1812, although war was imminent, academic instruction was practically abandoned. In March, 1812, the Academy was without a single instructor. Up to and including this time, 88 cadets had been graduated; they had entered without mental or physical examination, at all ages from 12 to 34, and at various times during the year.

By Act of Congress of April 29, 1812, the Academy was reorganized. The provisions of this Act have furnished the general principles upon which the Military Academy has since been conducted and controlled; a more adequate corps of professors was authorized; a maximum of 250 cadets was fixed; and the age and the mental requisites for admission were prescribed.

In 1817, under the provisions of the Act of 1812, and the able superintendence of Major Sylvanus Thayer, Corps of Engineers, the present era in the Academy's history opened.

Until 1843, a prescribed residence was not a legal qualification for appointment, but the selection of one cadet from each Congressional district had grown to be customary. In this year the custom became the law, Congress prescribing that the Corps of Cadets should consist of one from each Congressional district, one from each Territory, one from the District of Columbia, and ten from the United States at large, to be appointed by the President.

By the Act of Congress, approved June 7, 1935, the Corps of Cadets, as now constituted, consists of three for each Senator, three for each Representative, three for the Delegate in Congress from the Territory of Alaska, three for the Delegate in Congress from the Territory of Hawaii, three for the Resident Commissioner from Puerto Rico, one for the Governor of the Panama Canal Zone, five for the District of Columbia, twenty for the sons of deceased officers, twenty for the sons of deceased enlisted men, forty for Honor Scholars, three for the Vice-President, eighty-nine for The President, ninety for the Regular Army and ninety for the National Guard, or a total of 1,960.

In addition to the 1,960 mentioned above, the Secretary of War is authorized to permit not exceeding four Filipinos, to be designated, one for each class, by the Governor General of the Philippine Islands, to receive instruction at the United States Military Academy: "Provided, That the Filipinos undergoing instruction shall receive the same pay, allowances, and emoluments as are authorized by law for cadets at the Military Academy appointed from the United States, to be paid out of the same appropriations: And provided further, That said Filipinos undergoing instruction on graduation shall be eligible only to commissions in the Philippine Scouts. And the provisions of section 1321, Revised Statutes, are modified in the case of the Filipinos undergoing instruction, so as to require them to engage to serve for eight years, unless sooner discharged, in the Philippine Scouts." (35 Stats., 441.)

An act of Congress approved May 25, 1933, provides "That the Superintendents of the United States Naval Academy, the United States Military Academy, and the United States Coast Guard Academy may, under such rules and regulations as the Secretary of the Navy, the Secretary of War, and the Secretary of the Treasury may prescribe, confer the degree of bachelor of science upon all graduates of their respective academies, from and after the date of the accrediting of said academies by the Association of American Universities." The U. S. Military Academy was accredited by the Association of American Universities on October 31, 1925. The degree of bachelor of science was conferred retroactively by certificate upon all graduates in the classes of 1926 to 1933, inclusive. For succeeding classes this degree is regularly conferred at the time of graduation.

The total number of graduates, including foreigners receiving instruction under Acts of Congress, from 1802 to June 12, 1936, inclusive, is 16,735.

COMMENDATORY REFERENCES TO THE ACADEMY.

"I have duly received your letter of the 28th ultimo, enclosing a copy of what you had written to the Secretary of War, on the subject of a Military Academy.

"The establishment of an Institution of this kind, upon a respectable and extensive basis, has ever been considered by me as an object of primary importance to this country; and while I was in the Chair of Government, I omitted no proper opportunity of recommending it, in my public speeches and other ways, to the attention of the Legislature. But I never undertook to go into a detail of the organization of such an academy; leaving this task to others whose pursuits in the paths of science, and attention to the arrangements of such institutions, had better qualified them for the execution of it. For the same reason I must now decline making any observations on the details of your plan; and as it has already been submitted to the Secretary of War, through whom it would naturally be laid before Congress, it might be too late for alterations if any should be suggested."

"I sincerely hope that the subject will meet with due attention, and that the reasons for its establishment which you have so clearly pointed out in your letter to the Secretary, will prevail upon the Legislature to place it upon a permanent and respectable footing."—*George Washington. (Letter to Alexander Hamilton dated Mount Vernon, 12 December, 1799, two days before General Washington died.)*

"I recommend to your fostering care, as one of our safest means of national defense, the Military Academy. This institution has already exercised the happiest influence upon the moral and intellectual character of our Army; and such of the graduates as from various causes may not pursue the profession of arms will be scarcely less useful as citizens. Their knowledge of the military art will be advantageously employed in the militia service, and in a measure secure to that class of troops the advantages which in this respect belong to standing armies."—*Andrew Jackson. (Extract from his First Message to Congress December, 1829.)*

"I give it as my fixed opinion, that but for our graduated cadets, the war between the United States and Mexico might, and probably would, have lasted some four or five years, with, in its first half, more defeats than victories falling to our share; whereas, in less than two campaigns, we conquered a great country and a peace, without the loss of a single battle or skirmish."—*Winfield Scott. (Extract from a letter written by him July 25, 1860, to Lieutenant Ives, Secretary to the U. S. Military Academy Commission.)*

"The foregoing considerations naturally bring to mind the Military Academy at West Point. I believe that the great service which it has rendered the country was never more conspicuous than it has been during the past two years. The faithful and efficient services of its graduates since the declaration of war with Spain have more than repaid the cost of the institution since its foundation. They have been too few in number and most heavily burdened."—*Elihu Root. (Extract from his report as Secretary of War, June 30, 1899.)*

COMMENDATORY REFERENCES TO THE ACADEMY (Continued)

"This institution has completed its first hundred years of life. During that century no other educational institution in the land has contributed so many names as West Point has contributed to the honor roll of the nation's greatest citizens."—*Theodore Roosevelt. (Extract from his address at the Centennial Exercises U. S. Military Academy, June 11, 1902.)*

"In the World War, West Point again demonstrated its supreme value to the country in the hour of need. Our great overseas army was made and led by West Point men and the incredible swiftness with which it was trained for its great task is a tribute to the fineness of the raw material and also to the leadership generated by West Point. In all walks of life character is the indispensable basis of enduring success. West Point does many things for its men, but the highest quality it gives them is character and in the emergency of the World War, our success rested upon the character of our leaders. It, therefore, finally rested upon West Point."—*Newton D. Baker. (Extract from a letter written by him March 27, 1928, to Major General William R. Smith, Superintendent, U. S. Military Academy.)*

"What the Academy stands for has always been my guide throughout my military career, and to have approached the high ideals of duty, honor and service to the country that are the real spirit of West Point, has to me a meaning that nothing else has. The longer I live, and the further I have gone on in the service, the more I reverence the things that inspire the heart and soul of young men at West Point.

I can only add that West Point has again, in this war, demonstrated its usefulness and justified itself a hundred times over in furnishing to this great American Army in Europe the splendid men who have served here in the old West Point spirit."—*Extracts from a letter from General John J. Pershing, January 11, 1929.*

NOTE.—The selection of the superintendents of the Military Academy was confined to the Corps of Engineers from the establishment of the institution, March 16, 1802, till the passage of the law of July 13, 1866, which opened it to the entire Army. By the act of June 12, 1866, the local rank of Colonel was conferred upon the Superintendent.

1 Major Williams resigned June 20, 1803, on a point of command, and pending its settlement until April 19, 1805, when he again returned to service as Chief Engineer, no permanent Superintendent of the Military Academy was appointed, the command devolving upon the senior officer of the Corps of Engineers present for duty.

2 Brig. Major P. G. T. Beauregard, Corps of Engineers, by order of John B. Floyd, Secretary of War, relieved Colonel DeLafield, Jan. 23, 1861, from the superintendency of the Military Academy, but was himself displaced five days later, Jan. 28, 1861, by direction of the succeeding Secretary of War Joseph Holt, the command again devolving upon Colonel DeLafield.

CLASSIFICATION OF CADETS.

The Cadets are arranged in four distinct classes, corresponding with the four years of study. The Cadets employed on the first year's course constitute the *Fourth Class*; those on the second year's course the *Third Class*; those on the third year's course the *Second Class*; and those on the fourth year's course the *First Class*.

The academic year commences on the 1st of July. On, or before, that date the result of the examination held in the preceding month is announced and Cadets are advanced from one class to another. At no other time is a Cadet advanced from one class to another, unless prevented by sickness, or authorized absence, from attending the aforesaid examination; in such a case a special examination is granted; but in no case is a Cadet advanced from one class to another without having satisfied the Academic Board of his proficiency in each branch of study pursued by his class.

Names marked thus * in the following pages are regarded as distinguished cadets. The basis for determining distinguished cadets is as follows: Five per centum of each class, and also for the four year course, provided the cadet has attained a final total for the year, or for graduation, of not less than ninety-one per centum of the maximum possible total. A complete list of distinguished cadets by classes, and the subjects in which they particularly excel, will be found in the following pages.

Cadets whose names are marked thus † were found deficient, and turned back, to join the next succeeding class.

Cadets whose names are marked thus ‡ were found deficient, and discharged.

INFORMATION RELATIVE TO THE APPOINTMENT AND ADMISSION OF CADETS TO THE UNITED STATES MILITARY ACADEMY, WEST POINT, N. Y.

[Communications relating to matters connected with the Military Academy should be addressed to The Adjutant General of the Army, Washington, D. C.]

THE MILITARY ACADEMY

1. The United States Military Academy is an institution established by the Government for the practical and theoretical training of young men for the military service. Its cadets are given a comprehensive and general education of collegiate grade and a sufficient basic military training to enable them to enter upon the duties of second lieutenant in any branch of the Army to which they may be individually assigned.

2. Direction and supervision of the Military Academy are vested by law in the War Department under such officer or officers as the Secretary of War may select, and, in accordance with this provision, the Chief of Staff has been designated as the officer in charge of all matters pertaining to the institution.

HOW TO ENTER THE MILITARY ACADEMY

3. The candidate for a cadetship, who must never have been married and who will at the time of his proposed entrance come within the prescribed age limits, should follow the steps outlined below. He must first obtain an appointment to a vacancy, existing or prospective. He must then demonstrate that he measures up to certain physical and educational standards. His physical fitness is determined by examination; his educational qualifications may be shown by regular mental examination or by the submission of certain prescribed certificates with validating examination, or, in certain special cases, by certificate without mental examination. (See pars. 23 and 24.) If he be accepted, he reports at the academy on the first week day in July and, prior to admission, he is required to take the oath of allegiance and to subscribe to an engagement to serve the United States for a time subsequent to his graduation. (See par. 48.)

COURSE AS A CADET

4. Upon admission to the academy, he enters upon a 4-year course of study and training. The academic year extends from September 1 to June 4, the greater part of the remainder of the year being spent in camp and devoted to military training. At the end of his second year at the academy he is granted a furlough of about 10 weeks, which, with the exception of a few days during Christmas week of his second, third, and fourth years, is the only extended vacation which he receives. During the time that he remains a cadet, he is paid at the rate of \$1,072 per annum. Upon graduation he may be commissioned as a second lieutenant in one of the branches of the Army.

The points brought out briefly in the paragraphs above are explained in detail in the following pages.

STRENGTH OF THE CORPS OF CADETS

5. Under an act of Congress approved June 7, 1935, the Corps of Cadets shall, hereafter, consist of 1,960 cadets, appointed in number and from sources as follows:

6 from each State at large	288
3 from each congressional district	1,305
3 from each Territory (Hawaii and Alaska)	6
5 from the District of Columbia	5
3 from natives of Puerto Rico	3
1 from Panama Canal Zone	1
172 from the United States at large ¹	172
180 from among the enlisted men of the Regular Army and of the National Guard, in number as nearly equal as practicable	180
Total	1,960

¹ Of whom 3 are appointed upon the recommendation of the Vice President, 40 are selected from among the honor graduates of those educational institutions designated as "honor military schools", and 40 are chosen from among the sons of veterans who were killed in action or died prior to July 2, 1921, of wounds received or disease contracted in line of duty during the World War.

FILIPINO CADETS

6. In addition to the 1,960 mentioned above, the Secretary of War is authorized to permit not exceeding four Filipinos, to be designated one for each class by the Governor General of the Philippine Islands, to receive instruction at the United States Military Academy: "Provided, That the Filipinos undergoing instruction shall receive the same pay, allowances, and emoluments as are authorized by law for cadets at the Military Academy appointed from the United States, to be paid out of the same appropriations: *And provided further*, That said Filipinos undergoing instruction, on graduation shall be eligible only to commissions in the Philippine Scouts. And the provisions of section 1321, Revised Statutes, are modified in the case of Filipinos undergoing instruction, so as to require them to engage to serve for 8 years, unless sooner discharged, in the Philippine Scouts." (35 Stat. 441.)

APPOINTMENTS, HOW MADE

7. The numbers mentioned above represent the maximum allowed at the Military Academy at any one time from the respective sources; consequently, no appointment can be made from any source except to fill a vacancy therefrom.

All appointments are made by the President and as follows:

From States at large and from congressional districts, upon the recommendations of the respective Senators and Representatives in Congress.

From the Territories, upon the recommendations of the respective Delegates in Congress.

From the District of Columbia, upon the recommendations of the commissioners thereof.

From Puerto Rico, upon the recommendation of the resident commissioner.

(Those cadets appointed from States at large, from congressional districts, from the Territories, from the District of Columbia, and from the island of Puerto Rico, must, under the law, be *actual residents* thereof, respectively.)

From among the sons of civilians of the Panama Canal Zone and the Panama Railroad, resident on the Zone, upon the recommendation of the Governor of the Panama Canal Zone.

From among the honor graduates of educational institutions designated as "honor military schools", upon the recommendations of the heads of the respective schools.

From among the enlisted men of the National Guard of the States and Territories, and of the island of Puerto Rico, upon the recommendations of the respective governors thereof.

From among the enlisted men of the National Guard of the District of Columbia, upon the recommendation of the commanding general of the District Militia.

From among the enlisted men of the Regular Army, upon the recommendations of the commanding generals of the respective corps areas and territorial departments.

Appointments from the United States at large (excepting those from "honor military schools", those chosen from among the sons of deceased World War veterans, and those appointed upon the recommendation of the Vice President) are made by the President upon his own selection, and as the result of a competitive examination, identical in every respect with the regular entrance examination.

SELECTION OF CANDIDATES

8. **From States at large, congressional districts, and Territories.**—The selection of candidates, by competitive examination or otherwise, for appointment from any State at large or congressional district, is entirely in the hands of the Senator or Representative in Congress who has the vacancy at his disposal, and all applications for appointment from those sources should be addressed to the proper Senator or Representative.

For each vacancy from a State at large, or congressional or Territorial district, *three candidates* should be nominated, one to be named as *principal*, one as *first alternate*, and one as *second alternate*. The first alternate, if qualified, will be admitted in the event of the failure of the principal; the second alternate, if qualified, will be admitted in the event of the failure of both the principal and the first alternate.

These candidates must, at date of admission, be between the ages of 17 and 22 years.

9. **From "honor military schools."**—*Honor graduates* of "honor military schools" are selected for appointment as cadets of the United States Military Academy in the following manner:

There is maintained in the office of The Adjutant General of the Army a roster of "honor military schools" as determined by annual War Department inspections of educational institutions. At an early date in each year The Adjutant General of the Army will anticipate the vacancies in the Corps of Cadets which are open to *honor graduates* and will make an equitable distribution of those vacancies amongst the "honor military schools" and notify them accordingly. Each designated institution will at a specified time notify The Adjutant General of the Army of the names of the selected honor graduates designating them as principal, first alternate, and second alternate. In considering graduates for this designation the institution is not limited to those graduating during the current year.

An honor graduate, designated as principal, of a selected institution will be appointed a cadet of the United States Military Academy upon the certificate of the head of the institution that the appointee is an honor graduate of that institution of a year for which the institution was designated an honor military school. An honor graduate with an academic standing in the upper 10 percent of his class is admitted without mental examination and subject to a satisfactory physical examination. All other honor graduates are appointed subject to validating examinations in English, algebra, and geometry, as well as physical examination. No student will be rated as honor graduate unless he has in his school work shown proficiency in subjects amounting to not less than the 15 units prescribed by the regulations for admission to the United States Military Academy. A certificate (form II) will be forwarded to the adjutant of the academy when the appointment is made. (See pars. 23 and 24.) In the case of a candidate who graduated earlier than the year of his appointment, exemption from the entrance examinations will not be granted if his educational work subsequently to his graduation has not been satisfactory. In the event that the honor graduate designated as principal does not accept the appointment or fails to qualify for admission, the first alternate will, if qualified, be appointed; and in the event that neither the principal nor the first alternate qualifies, the second alternate will, if qualified, be appointed.

These candidates must at date of admission be between the ages of 17 and 22 years.

10. From among sons of deceased World War veterans.—An act of Congress approved June 8, 1926, authorized 40 cadets to be appointed by the President from among the sons of officers, soldiers, sailors, and marines of the Army, Navy, and Marine Corps of the United States who were killed in action or died prior to July 2, 1921, of wounds or injuries received, or disease contracted in line of duty during the World War; one-half to be appointed from among the sons of officers and one-half from among the sons of warrant officers, soldiers, sailors, and marines.

Candidates appointed under this act must be between the ages of 17 and 22 years and meet the usual physical requirements, and will be required to undergo the regular entrance examination competitively, the vacancies available from this source being awarded to those physically qualified competitors who make the highest proficient ratings in the order of merit established by the examination mentioned. There is no restriction as to residence in the case of these appointees.

No form is prescribed for making application, which should be by letter addressed to The Adjutant General of the Army, showing the full name, date of birth, and address of the applicant, and the name, grade, and organization of his father, together with a brief statement showing the time and cause of his death. If the father of the applicant was an enlisted man, his serial number should also be given.

11. From the National Guard.—To be eligible for appointment from the National Guard, an applicant must be an enlisted man of a unit recognized by the Federal Government and must, at date of admission, be between the ages of 19 and 22 years, and have served as an enlisted man in the Guard not less than 1 year. It is not essential that the service shall have been continuous; therefore, former service in the Guard may be counted in determining an applicant's eligibility. Similarly, service with a National Guard organization prior to its recognition by the Federal Government may be considered, the date of enlistment of the soldier governing, and not that of the recognition of the unit. Those applicants who contemplate enlisting in the National Guard for the purpose of being appointed to the Military Academy should do so early enough to enable them to acquire the year of service by the date of admission in the year during which they desire to enter.

For vacancies in the cadetships allotted to enlisted men of the National Guard, the candidates, not exceeding three for each vacancy, will be appointed, in number as nearly equal as practicable, among the States, the Territories, the District of Columbia, and the island of Puerto Rico, according to their enlisted

strength. With the exception of the candidates from the District of Columbia they will be selected by the governors from successful competitors in a PRELIMINARY EXAMINATION to be held between August 1 and November 15 of each year, such examination to be of a scope and nature similar to the regular examination for entrance to the United States Military Academy. The candidates from the National Guard of the District of Columbia will be similarly selected by the commanding general of the District of Columbia Militia.

Each candidate thus selected will be authorized by the War Department to report for the regular Military Academy entrance examination, which he must undergo in competition with the entire number of National Guard candidates, the available vacancies being awarded to those physically qualified candidates making the highest proficient averages in the order of merit established at the State, Territory, or District to which being made throughout by competitive circumstances. (See par. 14.)

12. From the Regular Army.—To be eligible for appointment from the Regular Army, an applicant must be an enlisted man thereof, and must, at date of admission, be between the ages of 19 and 22 years, and have served as an enlisted man in the Army not less than 1 year. It is not essential that the service shall have been continuous; therefore, prior Army service may be counted in determining a soldier's eligibility. Those applicants who contemplate enlisting in the Army for the purpose of being appointed to the Military Academy should do so early enough to enable them to acquire the year of service by the date of admission in the year during which they desire to enter.

The candidates nominated for cadetships allotted to the enlisted men of the Regular Army shall not exceed three times the number of existing vacancies and shall be equitably distributed among the corps areas and territorial departments by the War Department. If the number of applicants in any corps area or department exceeds the share allotted to it by the War Department, the candidates in such corps area or department will be chosen from the successful competitors in a PRELIMINARY EXAMINATION to be held in the several corps areas and territorial departments between December 1 and December 15, except that in the Philippine Department it is held between November 1 and November 15, such examination to be of a scope and nature similar to the regular examination for entrance to the United States Military Academy.

Each such candidate will be authorized to report for the regular Military Academy entrance examination, which he must undergo in competition with the entire number of Army candidates, the available vacancies being awarded to those physically qualified competitors making the highest proficient averages, in the order of merit established at the last-mentioned examination, without regard to the corps from which designated. The selection being made alternates cannot be considered under any

EDUCATIONAL QUALIFICATIONS, HOW SHOWN

13. There are three methods of meeting the educational requirements for admission to the Military Academy, viz:

- a. *By successfully passing the regular entrance examination, or,*
- b. *By submitting a satisfactory educational certificate (secondary school) to be validated by special examination, or,*
- c. *By submitting an educational certificate (college) which does not need a validating examination.* (See pars. 23 and 24.)

ENTRANCE EXAMINATION, WHEN HELD

14. The regular Military Academy entrance examination and the examination for validating certain classes of certificates are held beginning on the first Tuesday in March each year. Each candidate designated to take one of these examinations will receive from the War Department a letter of appointment, and he must appear for examination at the time and place designated therein before a board of Army officers convened by the War Department. Enlisted men appointed from the Regular Army also receive authority from the War Department to report for examination, and must report at the time and place specified. No other regular mental examination is held during the year. The failure of candidates holding noncompetitive appointments to appear for examination unless prevented by sickness or other unavoidable cause shall vacate the appointment; the failure of candidates holding competitive appointments to report for examination for any cause shall vacate the appointment.

A second validating examination is held on June 21 at West Point, N. Y., but is only for emergency vacancies which remain unfilled or occur after the March

examination. Candidates appointed to such emergency vacancies must qualify by certificate or by certificate supplemented by the validating examination mentioned above.

Candidates in the Philippine Islands selected for appointment shall, unless otherwise notified by the War Department, appear for mental and physical examination on the second Tuesday in January of each year before a board of Army officers to be convened at such place in the Philippine Islands as the commanding general of the Philippine Department may designate.

ENTRANCE EXAMINATION, WHERE HELD

15. The board before which a candidate is directed to appear will be the one convened at the place nearest or most convenient to his home or to the school at which he is in regular attendance.

Following is a list of the places at which the examination is held:

Army Building, 39 Whitehall Street, New York, N. Y.	Letterman General Hospital, Presidio of San Francisco, Calif.
Army and Navy General Hospital, Hot Springs National Park, Ark.	Fitzsimons General Hospital, Denver, Colo.
Army Medical Center, Washington, D. C.	Fort Lewis, Wash.
Army Base, Boston, Mass.	Fort McPherson, Ga.
William Beaumont General Hospital, El Paso, Tex.	Fort Missoula, Mont.
Canal Zone (such place as the com- manding general, Panama Canal Department, may designate).	Fort Omaha, Nebr.
Fort Douglas, Salt Lake City, Utah.	United States Army Supply Base, New Orleans, La.
Fort Benjamin Harrison, Ind.	San Juan, P. R.
Fort Sam Houston, Tex.	Fort Sheridan, Ill.
Jefferson Barracks, Mo.	Fort Sill, Okla.
Fort Leavenworth, Kans.	Fort Snelling, Minn.
	Schofield Barracks, Honolulu, Hawaii.
	Sternberg General Hospital, Manila, P. I.

SCHEDULE OF MENTAL EXAMINATIONS

16. Schedule of examinations is as follows:

REGULAR EXAMINATION

First day.—Report and instructions, 9 a. m. to 11 a. m., 2 hours. History, 1:30 to 5:30 p. m., 4 hours.

Second day.—Algebra, 9 a. m. to 1 p. m., 4 hours. English grammar, composition, and literature, part I (English grammar and composition), 2:30 to 4:30 p. m., 2 hours.

Third day.—Geometry, 9 a. m. to 1 p. m., 4 hours. English grammar, composition, and literature, part II (composition and literature), 2:30 to 4:30 p. m., 2 hours.

(For a more complete description of the examination and for sample questions, see appendix A, p. 25.)

VALIDATING EXAMINATION

First day.—Report and instructions, 9 a. m. to 11 a. m., 2 hours. English grammar, composition, and literature, part I (English grammar and composition), 2 p. m. to 3 p. m., 1 hour.

Second day.—Algebra, 9:30 a. m. to 12:30 p. m., 3 hours. English grammar, composition, and literature, part II (composition and literature), 3 p. m. to 5 p. m., 2 hours.

Third day.—Geometry, 9:30 a. m. to 12:30 p. m., 3 hours.

(For a more complete description of the examination and for sample questions, see appendix B, p. 51.)

ADMISSION BY REGULAR MENTAL EXAMINATION. (SEE PAR. 13a)

17. All candidates take the regular mental examination who cannot qualify under paragraph 23 or paragraph 24 below.

Inasmuch as candidates from the United States at large, the Regular Army, and the National Guard are appointed to vacancies in the order of merit competitively established as a result of the regular mental entrance examination, such candidates are not permitted to submit educational certificates in lieu of that examination, and therefore cannot qualify under paragraph 23 or 24 below.

18. Algebra.—Candidates will be required to pass a satisfactory examination in that portion of algebra which includes the following range of subjects: Definitions and notations; the fundamental laws; the fundamental operations, viz: Addition, subtraction, multiplication, and division; factoring; highest common factor; lowest common multiple; fractions, simple and complex; simple or linear equations with one unknown quantity; simultaneous simple or linear equations with two or more unknown quantities; graphical representation and solution of linear equations with two unknowns; involution, including the formation of the squares and cubes of polynomials; binomial theorem with positive integral exponents; evolution, including the extraction of the square and cube roots of polynomials and of numbers; theory of exponents; radicals, including reduction and fundamental operations, rationalization, equations involving radicals; quadratic equations; equations of quadratic form; simultaneous quadratic equations; ratio and proportion; arithmetical and geometrical progressions. Candidates will be required to solve problems involving any of the principles or methods contained in the foregoing subjects.

Sets of questions used at recent examinations will be found in appendix A, page 25.

19. Plane geometry.—Candidates will be required to give accurate definitions of the terms used in *plane geometry*, to demonstrate any proposition of plane geometry as given in the ordinary textbooks, and to solve simple geometrical problems, either by a construction or by an application of algebra.

Sets of questions used at recent examinations will be found in appendix A, page 25.

20. English grammar.—Candidates must have a good knowledge of *English grammar*; they must be able to define the terms used therein; to define the parts of speech; to give inflections, including declension, conjugation, and comparison; to give the corresponding masculine and feminine gender nouns; to give and apply the ordinary rules of syntax.

They must be able to parse correctly any ordinary sentence, giving the subject of each verb, the governing word of each objective case, the word for which each pronoun stands or to which it refers, the words between which each preposition shows the relation, precisely what each conjunction and each relative pronoun connect, what each adjective and adverb qualify or limit, the construction of each infinitive, and generally to show a good knowledge of the function of each word in the sentence.

They must be able to correct in sentences or extracts any ordinary errors of grammar.

It is not required that any particular textbook shall be followed; but the definitions, parsing, and corrections must be in accordance with good usage and common sense.

Sets of questions used at recent examinations will be found in appendix A, page 25.

21. English composition and English literature.—Candidates will be required:

1. By the writing of short themes on subjects chosen by themselves within the limits set by the examination paper, to prove (a) their ability to spell, capitalize, and punctuate, and (b) their mastery of the elementary principles of composition, including paragraphing and sentence structure.

2. To give evidence of intelligent acquaintance with the plays of Shakespeare which are most commonly used in preparatory and high schools.

3. To exhibit a fair knowledge of the history of English and American literature and of the names and lives of most prominent authors and of the names of their principal works.

Sets of questions used at recent examinations will be found in appendix A, page 25.

22. History.—Candidates will be required to pass a satisfactory examination in (a) United States history and (b) ancient history.

The examination in United States history will cover: Early discovery and settlements; the forms of government in the Colonies; the birth and development of a constitutional form of government; the causes, leading events, and results of wars; important events in the political and economic history of the Nation from its foundation to and including the national election of 1928; the location of places, areas, boundaries, and routes of outstanding historical significance.

The examination in ancient history will cover the period 750 B.C. to 814 A.D., emphasizing the rise, development, and decline of Greek and Roman civilization. It will also include the history of Mediterranean states in the

period specified, and the development of western Europe after the break-up of the Roman Empire. The location of places, areas, boundaries, and routes of outstanding historical importance will be required.

Sets of questions used in recent examinations will be found in appendix A, page 25.

ADMISSION BY CERTIFICATE AND VALIDATING EXAMINATIONS. (SEE PAR. 136)

23. The academic board will consider and may accept in lieu of the regular mental entrance examination a certificate² with validating examination in the following cases:

(1) A properly attested certificate (form II) that the candidate has graduated from a preparatory school or public high school accredited by the United States Military Academy, provided that in his school work he has shown proficiency in subjects amounting to not less than 15 units of the list given below in paragraph 25.

Of the 15 units, 2³ must be in algebra, 1 in plane geometry, 1½ in English grammar and composition, 1½ in English literature, and 2 in history. The remaining 7 units must be chosen from the list of optional subjects, but cannot include commercial or other subjects not included in the list.

If a scrutiny of the certificate submitted shows evidence of low grades or of graduation at an irregular date, the certificate will be rejected.

(2) A properly attested certificate (form II) that the candidate is in actual attendance in his senior year at a preparatory school or public high school accredited by the United States Military Academy and has satisfactorily completed 3½ years' work at such school, provided that the certificate shows specifically by subjects and units the work already completed and also that to be completed by graduation, and provided that the course the candidate is pursuing will, when completed, show proficiency in subjects amounting to not less than 15 units of the list given below, and the certificate includes a statement to that effect.

Of the 15 units, 2³ must be in algebra, 1 in plane geometry, 1½ in English grammar and composition, 1½ in English literature, and 2 in history. The remaining 7 units may be chosen from the list of optional subjects given hereafter, but cannot include commercial or other subjects not included in the list.

If a scrutiny of the certificate submitted shows low grades, the certificate will be rejected.

A candidate submitting a certificate showing actual attendance at, and prospective graduation from, a preparatory or public high school must as a condition of admission continue his course of study and submit his diploma or other formal evidence of graduation at the time of entrance to the United States Military Academy. Failure to submit such evidence of graduation will disqualify the candidate for entrance.

(3) A properly attested certificate (form II) of a candidate accredited as an "honor school" appointee (see par. 9), who has not be graded in academic work in the upper 10 percent of his class, showing specifically by subjects and units the work already completed and also that to be completed by graduation, provided that the course the candidate is pursuing will, when completed, show proficiency in subjects amounting to not less than 15 units of the list given below, and that the certificate includes a statement to that effect.

Of the 15 units, 2³ must be in algebra, 1 in plane geometry, 1½ in English grammar and composition, 1½ in English literature, and 2 in history. The remaining 7 units may be chosen from the list of optional subjects given hereafter, but cannot include commercial or other subjects not included in the list.

If a scrutiny of the certificate submitted shows low grades, the certificate will be rejected.

A candidate whose certificate (form II) has been rejected must take the regular mental entrance examination.

An appointee whose certificate has been accepted subject to a validating examination must show by this examination that he has acquired during his preparatory school work a knowledge of algebra, plane geometry, and English grammar, composition and literature similar to that described in the preceding paragraphs for appointees who enter by the regular mental examination. However, the validating examination will not be as searching as the regular examination, but will be so framed as to determine general knowledge of the subjects without requiring special courses of study in preparation.

Examples of validating examinations will be found in appendix B, page 51.

² For lists of subjects and weights on certificates see par. 25.

³ Candidates from schools so organized as to offer only 1½ years of algebra must clearly show completion of all subject matter of paragraphs 26 and 27 in order to receive credit of 2 units in that subject.

ADMISSION BY CERTIFICATE. (SEE PAR. 13c)

24. The academic board will consider and may accept without other mental requirement:

(1) A properly attested college certificate (form I) that the candidate is a regularly enrolled student in good standing without condition in a university, college, or technical school accredited by the United States Military Academy, provided that the entrance requirements of the course he is pursuing require proficiency in subjects amounting to not less than 15 units of the list given below, and provided further that he has satisfactorily completed one semester's work.

Of the 15 units, 2 must be in algebra, 1 in plane geometry, $1\frac{1}{2}$ in English grammar and composition, $1\frac{1}{2}$ in English literature, and 2 in history. The remaining 7 units may be chosen from the list of optional subjects given hereafter, but cannot include commercial or other subjects not included in the list.

A full record of academic work at the college giving subjects taken and grades attained in each must be submitted on form I.⁴

If a scrutiny of any certificate submitted shows low grades, the certificate will be rejected.

(2) A properly attested certificate (form III) from the college entrance examination board that the candidate has shown proficiency in the examinations set by the board in subjects amounting to 15 units from the list given below.

Of the 15 units, 2 must be in algebra, 1 in plane geometry, $1\frac{1}{2}$ in English grammar and composition, $1\frac{1}{2}$ in English literature, and 2 in history. The remaining 7 units may be chosen from the list of optional subjects given hereafter, but cannot include subjects not in the list. If a scrutiny of the certificate submitted shows low grades, the certificate will be rejected.

(3) A properly attested certificate (form III) from the college entrance examination board that the candidate has shown proficiency in the examinations set by the board in the 8 required units from the list given below, and a properly attested certificate from a preparatory or public high school accredited by the United States Military Academy showing proficiency in 7 units of the optional subjects given hereafter. If a scrutiny of the certificate submitted shows low grades, the certificate will be rejected.

(4) A properly attested certificate (form II) of a candidate accredited as an "honor school" appointee (see par. 9) who has been graded in academic work in the upper 10 percent of his class. The certificate will be forwarded to the academic board, United States Military Academy, at the time the appointment is made.

A candidate whose certificate under paragraph 24 has been accepted is excused from the mental examination but must appear for the physical examination.

25. **Subjects and credits.**—The list of subjects and of the corresponding weights in units is as follows:

(a) REQUIRED

Every certificate must show evidence of proficiency in the following subjects:

DEFINITION OF CERTAIN SUBJECTS IN THE ABOVE LIST

26. MATHEMATICS, A1, ALGEBRA TO QUADRATICS, ONE UNIT

The meaning, use, evaluation, and necessary transformations of simple formulas involving ideas with which the pupil is familiar, and the derivation of such formulas from rules expressed in words.

The graph, and graphical representation in general. The construction and interpretation of graphs.

Negative numbers; their meaning and use.

Linear equations in one unknown quantity, and simultaneous linear equations involving two unknown quantities, with verification of results. Problems.

Ratio, as a case of simple fractions; proportion, as a case of an equation between two ratios; variation. Problems.

The essentials of algebraic technique.

Exponents and radicals; simple cases.

Numerical trigonometry.

27. MATHEMATICS, A2, ALGEBRA, QUADRATICS AND BEYOND, ONE UNIT

Numerical and literal quadratic equations in one unknown quantity. Problems.

The binomial theorem for positive integral exponents, with applications.

Arithmetic and geometric series.

Simultaneous linear equations in three unknown quantities.

Simultaneous equations, consisting of one quadratic and one linear equation, or of two quadratic equations of certain types. Graphs.

Exponents and radicals.

Logarithms.

28. MATHEMATICS, B, ALGEBRA, ADVANCED, ONE-HALF UNIT

Theory of equations.

Determinants.

Complex numbers (numerical and geometric treatment), simultaneous quadratics, scales of notation, mathematical induction, permutations and combinations, and probability.

29. MATHEMATICS, C, PLANE GEOMETRY, ONE UNIT

The usual theorems and constructions of good textbooks, including the general properties of plane rectilinear figures; the circle and the measurement of angles; similar polygons; areas; regular polygons and the measurement of the circle.

The solution of numerous original exercises, including loci problems.

Applications to the mensuration of lines and plane surfaces.

30. MATHEMATICS, D, SOLID GEOMETRY, ONE-HALF UNIT

The usual theorems and constructions of good textbooks, including the relations of planes and lines in space; the properties and measurement of prisms, pyramids, cylinders, and cones; the sphere and the spherical triangle.

The solution of numerous original exercises, including loci problems.

Applications to the mensuration of surfaces and solids.

31. MATHEMATICS, E, TRIGONOMETRY, ONE-HALF UNIT

Definition of the six trigonometric functions of angles of any magnitude, as ratios. The computation of five of these ratios from any given one. Functions of 0, 30, 45, 60, and 90, and of angles differing from these by multiples of 90.

Determination, by means of a diagram, of such functions as $\sin (A=90)$ in terms of the trigonometric functions of A.

Circular measure of angles; length of an arc in terms of the central angle in radians.

Proofs of the fundamental formulas, and of simple identities derived from them.

Solution of simple trigonometric equations.

Theory and use of logarithms, without the introduction of work involving infinite series. Use of trigonometric tables, with interpolation.

Derivation of the Law of Sines and the Law of Cosines.

Solution of right and oblique triangles (both with and without logarithms) with special reference to the applications.

32. ENGLISH, A, GRAMMAR AND COMPOSITION, ONE AND ONE-HALF UNITS

The principles of English grammar.

The rules of English composition.

Proficiency in spelling, punctuation, grammar, and composition acquired by repeated oral and written exercises.

33. ENGLISH, B, LITERATURE, ONE AND ONE-HALF UNITS

The study of selected masterpieces in English and American literature.

Familiarity with the nature and characteristics of the different literary forms, as the essay, the novel, and biography in prose, the lyric and the epic in poetry, and the comedy and the tragedy in drama.

Knowledge of the history and development of English and American literature, including acquaintance with the chief periods, as the Elizabethan, the Puritan, the Restoration, and the Victorian, with the leading writers of such periods and with the most important works of each writer.

34. HISTORY, A, ANCIENT HISTORY, ONE UNIT

History down to the death of Charlemagne (814 A.D.) with special reference to Greek and Roman history, and with a short introductory study of the more ancient nations.

35. HISTORY, B, EUROPEAN HISTORY, ONE UNIT

History from the fall of Rome to the present time.

36. HISTORY, C, ENGLISH HISTORY, ONE UNIT

History of England, emphasizing the important epochs and the greater movements and showing the relations of English history to the history of other countries, especially the United States.

37. HISTORY, D, AMERICAN HISTORY WITH OR WITHOUT CIVIL GOVERNMENT, ONE UNIT

The history of the United States and, if civil government is included, a study of the United States Constitution, of the Federal Government with its powers, organization, and operation, and of the relations between the Federal and the State Governments.

DEFINITION OF A UNIT OF ADMISSION REQUIREMENTS

38. A unit represents a year's study in any subject in a secondary school, constituting approximately a quarter of a full year's work. A 4-year secondary school curriculum should be regarded as representing not more than 16 units of work.

This statement is designed to afford a standard of measurement for the work done in secondary schools. It takes the 4-year high-school course as a basis, and assumes that the length of the school year is from 36 to 40 weeks, that a period is from 40 to 60 minutes in length, and that the study is pursued for 4 or 5 periods a week; but under ordinary circumstances a satisfactory year's

work in any subject cannot be accomplished in less than one hundred and twenty 60-minute hours or their equivalent.

GENERAL INFORMATION AS TO CERTIFICATES

39. All necessary papers, including a set of blank certificate forms (except form III, which is sent only upon application), are furnished by The Adjutant General of the Army to each duly nominated candidate (except where competition is specified) with his letter of appointment.

Any candidate who contemplates submitting a certificate shall, immediately upon receiving his appointment, forward to the Adjutant, United States Military Academy, West Point, N.Y., the names and addresses of all educational institutions from which he expects to obtain certificates, in order that information as to the status of those institutions may be procured before the arrival of the certificates.

Certificates should be submitted not later than February 1. A certificate received between February 1 and the examination will receive consideration, but, in view of the short time left to the academic board to investigate its value, no assurance will be given that such certificate can be acted on in time to exempt the candidate from the regular mental examination. Certificates received at West Point too late for full investigation and appraisal before 9 a.m. on the first Tuesday in March of each year will be returned to the candidates concerned without action.

Candidates who submit certificates on a date which does not allow the academic board sufficient time to investigate their value and notify them regarding the final action thereon prior to the day set for the examination should proceed with the regular examination.

Candidates who are informed that their certificates have been accepted must present themselves at the regular time and place, as herein prescribed, for physical examination and, if required, for the validating examination.

A candidate whose certificate qualifications have been approved *conditionally* (that is, approved provided he completes his regular high-school or preparatory-school course with good grades, and graduates) must bring with him, and present on the day he reports for admission, his diploma or certificate of graduation, together with a certified statement of the grades attained in his academic work, in order that the Academic Board of the Military Academy may determine whether or not sufficient and satisfactory work has been accomplished to remove his condition. The foregoing does not apply to a candidate whose certificate has been approved *unconditionally*.

A candidate who has once satisfactorily fulfilled all the mental requirements for entrance will be regarded as qualified at any subsequent opportunity which may arise for entrance with the same class.

A certificate which is accepted as satisfactory for one examination will be regarded as satisfactory for any other examination which may be set for entrance with the same class.

Any certificate accepted for entrance with one class is not valid for entrance with a succeeding class unless reapproved. It must be resubmitted, accompanied by a full statement of the candidate's educational work in the interim, and both certificate and statement will be subject to careful scrutiny by the academic board.

Inasmuch as candidates from the United States at large, the Regular Army, and the National Guard are appointed to vacancies in the order of merit competitively established as a result of the regular entrance examination, such candidates are not permitted to submit educational certificates in lieu of the regular examination.

REQUIREMENTS AS TO AGE, HEIGHT, AND PHYSICAL CONDITION

40. *Candidates are eligible for admission from the day they are 17 (or 19 if from the Regular Army or from the National Guard) until the day they become 22 years of age, on which latter day they are not eligible. The age requirements for all candidates as well as the service requirements for appointment from the Army and from the National Guard are statutory and cannot be waived.*

No candidate shall be admitted who is less than 5 feet 4 inches in height, or who is deformed or afflicted with any disease or infirmity which would render him unfit for the military service, or who has, at the time of presenting himself, any disorder of an infectious or immoral character.

Candidates must never have been married.

Each candidate must, on reporting at West Point, present a certificate showing successful vaccination within 1 year; or a certificate of two vaccinations, made at least a month apart, within 3 months.

PRELIMINARY PHYSICAL EXAMINATION

41. Each candidate designated as principal or alternate for appointment as a cadet of the Military Academy should ascertain as soon as practicable whether or not he has any physical defect that would disqualify him for admission or any that should be corrected by treatment before presenting himself for examination. For this purpose he should immediately cause himself to be examined by a physician, preferably a medical officer of the Regular Army. The preliminary physical examination is of great importance to the candidate, as it should enable him to determine if he has any physical defect which might subsequently prevent his appointment.

The presentation by an appointee of his letter of conditional appointment with a request for physical examination, or the presentation by a prospective appointee of a letter signed by a Member of Congress stating that the bearer is a candidate for cadet appointment and requesting that he be physically examined, will be sufficient authority for an Army surgeon at any military post to make the desired physical examination. Upon completion of this examination, the Army surgeon will inform the candidate of the result and, in case a disability be found, whether such disability is believed to be permanent and disqualifying for military service or whether it is believed to be of a temporary or curable nature.

It should be clearly understood by the candidate that this examination is a preliminary one only and *in no way commits or obligates the War Department to accept a candidate* who is found by the regular medical examining board to have a physical defect which is considered by the board or by The Surgeon General to be disqualifying.

REGULAR PHYSICAL EXAMINATION

42. The physical examination of a candidate begins after the conclusion of his last mental examination, and is continued daily until completed, but those candidates who upon reporting at the place of examination present evidence^b that they have been excused from the mental examination under the provisions of the certificate privilege, or as the result of having qualified mentally at a previous examination, are usually examined physically as soon as possible after reporting and are not required to wait until the schedule of mental examinations has been completed.

PHYSICAL REQUIREMENTS

43. *a.* Hearing must be normal (20/20) in each ear for the whispered voice and the ears must be free from acute or chronic disease. The following-named conditions are causes for rejection: The total loss of an ear, marked hypertrophy or atrophy, or disfiguring deformity of the organ; atresia of the external auditory canal, or tumors of this part; acute or chronic suppurative otitis media, or chronic catarrhal otitis media; mastoiditis, acute or chronic; existing perforation of the membrana tympani from any cause whatever.

b. Vision as determined by the visual test types (without a cycloplegic) must not fall below 20/20 in either eye without glasses. Both eyes must be free from acute or chronic disease.

The following-named conditions are also cause for rejection: Manifest disturbance of muscle balance; esophoria of more than 10 prism diopters, exophoria of more than 5 prism diopters, or hyperphoria of more than 1 prism diopter; color blindness for red, green, or violet; trachoma, or xerophthalmia; chronic conjunctivitis; pterygium encroaching upon the cornea; complete or extensive destruction of the eyelids, disfiguring cicatrices, adhesions of the lids to each other or to the eyeball; inversion or eversion of the eyelids, or lagophthalmus; trichiasis, ptosis, blepharospasm, or chronic blepharitis; epiphora, chronic dacryocystitis, or lachrymal fistula; chronic keratitis, ulcers of the cornea, staphyloma, or corneal opacities encroaching on the pupillary area and reducing the acuity of vision below the standard noted above; irregularities in the form of the iris, or anterior or posterior synechia sufficient to reduce the visual acuity below the standard; opacities of the lens or its capsule, sufficient to reduce the acuity of vision below the standard, or progressive cataract of any degree; extensive coloboma of the choroid or iris, absence of pigment, glaucoma, iritis, or extensive or progressive choroiditis, retinitis, detachment of the retina, neuroretinitis, optic neuritis, or atrophy of the optic nerve; loss or disorganization of

^b The evidence must be in the form of an official communication from the War Department and must specify exemption from the mental examination of the current year.

either eye, or pronounced exophthalmus, pronounced nystagmus; or permanent or well-marked strabismus; diplopia, or night blindness; abnormal conditions of the eyes due to disease of the brain; malignant tumors of lids or eyeballs; asthenopia accompanying any ocular defect.

c. *Teeth*.—No candidate will be accepted unless he has a minimum of 6 serviceable vital masticating teeth (bicuspids and molars) above and 6 below serviceably opposing and also 4 serviceable vital incisor teeth (incisors and cuspids) above and 4 below serviceably opposing. Therefore, the minimum requirement consists of a total of 12 masticating teeth and 8 incisor teeth, all of which must be so opposed as to serve the purpose of incision and mastication.

Vital teeth properly filled with permanent filling material, or well crowned, will be considered serviceable if otherwise acceptable. A single tooth replacement by a standard method of bridgework will be accepted in lieu of a serviceable vital tooth when the abutment teeth are otherwise acceptable and the bridge well constructed.

A tooth will not be considered serviceable if it fails to enter into serviceable occlusion with an opposing tooth, if it has an unfilled cavity, if it supports a defective filling or crown, if it is nonvital, or if there is destruction of the supporting tissues of the tooth, such as results from chronic gingivitis, pyorrhea, etc.

Causes for rejection are: Failure to meet the standard of minimum requirements outlined above; the loss of three adjoining masticating teeth in either side of the upper or lower jaw; disfiguring spaces between anterior teeth, such as result from the extraction of a tooth; marked irregularity of the teeth, and marked malocclusion.

44. MINIMUM STANDARDS OF PHYSICAL PROPORTIONS FOR HEIGHT, WEIGHT, AND CHEST MEASUREMENT FOR ALL CANDIDATES EXCEPT FILIPINOS

The requirements of the following tables of physical proportions are minimum for growing youths and are for guidance in connection with the other data of the examination, a consideration of all of which will determine the candidate's physical eligibility. Mere fulfillment of the requirements of the standard tables does not determine eligibility.

The physical requirements should be those of the age at the birthday nearest the time of the examination. Fractions greater than one-half inch will be considered as an additional inch of height, but candidates must be at least 64 inches in height.

Weight in excess of the standard shown above may be waived if it is clearly shown that it is due to robust physique and that it does not constitute obesity or evidence of endocrine disorder.

If the weight of a candidate exceeds the standards shown for age and height the excess can be waived provided that it is manifestly due to heavy frame or healthy muscular development.

ADMISSION TO THE ACADEMY

46. Date of admission.—Candidates who fully conform to the requirements set forth in the preceding paragraphs, and who report in person to the superintendent on the first week day in July, before 12 m., shall be admitted as cadets to the United States Military Academy and shall receive their warrants of appointment as soon as practicable. Candidates are received beginning at 8 a.m., and it is to their advantage to report as soon as practicable after that hour. Facilities are not available for the housing and feeding of new cadets reporting before that time. The Military Academy operates on daylight-saving time beginning the last Sunday in April.

47. No cadet to be married.—No married person or person who has been married shall be admitted as a cadet; and if any cadet shall be married prior to graduation, such marriage shall be considered as equivalent to a resignation and he shall be required to leave the institution.

48. Engagement to serve.—Immediately after reporting to the superintendent for admission, and before receiving their warrants of appointment, candidates are required to sign, in the presence of the superintendent or of some officer deputed by him, engagements for service in the following form:

I, _____, of the State (or Territory) of _____, aged _____ years, _____ months, do hereby engage (with consent of my parent or guardian) that from the date of my admission as a cadet of the United States Military Academy I will serve in the Army of the United States for 8 years unless sooner discharged by competent authority.

In the presence of _____.

In the case of the Filipino cadets the engagement shall be made to serve in the Philippine Scouts. (See sec. 1321, R.S.)

49. Oath of allegiance.—Each cadet shall, previous to his admission to the academy, take and subscribe an oath or affirmation in the following form:

I, _____, do solemnly swear that I will support the Constitution of the United States and bear true allegiance to the National Government; that I will maintain and defend the sovereignty of the United States paramount to any and all allegiance, sovereignty, or fealty I may owe to any State, county, or country whatsoever; and that I will at all times obey the legal orders of my superior officers and the rules and articles governing the Armies of the United States (sec. 1320, R.S.).

Sworn to and subscribed at _____ this _____ day of _____, nineteen hundred and _____, before me.

DEPOSIT UPON ENTRANCE

50. Immediately after admission each candidate must be provided with an outfit of uniform, etc., the cost of which is about \$300. This sum, or an amount which, when added to the mileage allowance mentioned in paragraph 51, will equal \$300, must be deposited with the treasurer of the academy before the candidate is admitted. It is best for the candidate to take with him no more money than he needs for traveling expenses and for his parents to send the required deposit by draft, payable to the treasurer, United States Military Academy. The deposit is credited at once to the cadet's account. Upon graduation a cadet who has exercised proper economy will have sufficient money to his credit with the treasurer of the academy to purchase his uniform and equipment as an officer.

PAY OF CADETS

51. The pay of a cadet is \$780 per year and commutation of rations at 80 cents per day, to commence with his admission to the academy. The total is \$1,072.

Mileage, at 5 cents per mile, while proceeding from his home to the Military Academy, is credited to the account of each cadet after his admission to the academy, except when War Department orders directing him to proceed to the Military Academy are received at a place other than his home and nearer to the Military Academy; in such cases the account will be credited with mileage only from the place of receipt of orders to report to the Military Academy.

A cadet's initial deposit, together with his salary, is sufficient to meet his actual needs at the academy. It is not sufficient, however, to meet, in addition, the expenses of leaves of absence, especially if these involve considerable travel.

Obtaining money from outside sources is regarded with disfavor, unless it be for the purpose of liquidating indebtedness at the cadet store or of defraying the expenses of a leave of absence.

UNIFORM AND SUPPLIES

52. Cadets are required to wear the prescribed uniform. All articles of their uniform and equipment, including bedding, shoes, and underwear, are of a designated pattern, and are sold to cadets at West Point at regulated prices. It is not necessary for candidates to make special preparation for their stay at the academy, although there is no objection to their bringing with them such supplies of underwear, toilet accessories, etc., as they may have. Should a trunk be brought, it should be of the Army trunk locker type, 29 $\frac{1}{4}$ by 16 by 12 inches in size, and in good condition. If a candidate does not have such a trunk, he should wait until his arrival at the academy to procure one. Everything needed can be secured from the cadet store at West Point.

ACADEMIC DUTIES

53. There are two terms of academic instruction: September 1–December 23 and January 2–June 4. A semiannual examination is held December 26–31, and an annual examination June 5–12. At the December examination cadets who are found to be proficient in subjects they have completed during the preceding term are arranged according to merit in each subject. At the June examination they are similarly arranged and they are also assigned general standing in the class as determined by their standings in the various subjects. When a subject of study is completed during a term, an examination concluding the work in that subject is sometimes held. Cadets deficient in studies at any examination are discharged from the academy unless for special reasons the academic board recommends otherwise. Cadets exceeding at any time the maximum number of demerits allowed for 6 months are reported to the academic board as deficient in conduct.

The courses of instruction in the various departments are outlined on pages 16 to 24, inclusive.

DEPARTMENT OF TACTICS

54. **New cadets.**—New cadets report for duty at the Military Academy on the first week day in July. They are quartered separately from the Corps and are given intensive training in infantry recruit instruction, military courtesy, guard duty, and infantry weapons and a course of corrective and upbuilding physical training.

After approximately 3 weeks of the above training, the new cadets join the Corps in camp. The remainder of the first summer is devoted to basic training in the technique of infantry, scouting and patrolling, musketry, methods of study, swimming, dancing, hygiene, and customs of the service.

At the end of the first summer the fourth class (new cadets) is fully incorporated into the Corps. The military training during the remainder of the year carries on basic instruction in infantry weapons, combat principles of the squad, map reading, musketry, rifle marksmanship, field artillery, riding, and customs of the service.

Third class.—The military training in the third class during the summer consists of firing all infantry weapons, including the rifle, the machine gun, the pistol, the 37-mm gun, the automatic rifle, and the 75-mm mortar. Instruction is given in the operation and functioning of the various types of field artillery and coast artillery matériel; basic principles of signal communication; field exercises involving the combat principles of the section and platoon; riding, swimming, and dancing. During the winter training period, instruction is continued in coast artillery and field artillery; combat principles of the infantry squad and platoon, using the sand table; riding; customs of the service; and close-order infantry drill.

Second class.—The second class is absent during the summer. The remainder of the year is spent in preparing the class for their work the next summer. It consists in technique of fire of coast artillery and field artillery, coast artillery and field artillery matériel, field artillery in draft, riding, and minor tactics including combat principles of the smaller units of infantry, cavalry, communication units, field artillery, and coast artillery.

First class.—The first-class year is devoted primarily to develop qualities of command and leadership and to give the cadet a general knowledge of the capabilities and limitations of the various arms in combat. During the summer, cadets participate in field exercises, involving cavalry, field artillery, coast artillery (antiaircraft). The summer instruction terminates with a maneuver involving infantry and field artillery. During the summer period instruction is given in field engineering, signal communication, and tactics to include the infantry company, the later instruction being carried out by a series of tactical walks and terrain exercises. During the winter, instruction is given in administration, Air Corps, motor transportation, and tactics including general lectures, conferences, and tactical problems.

All classes.—Instruction in swimming and dancing begins in the fourth-class year and continues for each cadet until he is declared proficient. Practical instruction in fencing, gymnastic exercises, boxing, wrestling, swimming, and all forms of athletics is given to all classes.

Instruction in equitation is given to all classes.

DEPARTMENT OF CIVIL AND MILITARY ENGINEERING

55. *Civil engineering.*—This course is required of all cadets of the first class. It comprises 80 periods, beginning September 1, alternating daily with fortification and military history.

The instruction is theoretical, being illustrated by lectures and engineering models. It includes the mechanics of engineering and the application of the principles of engineering to engineering structures, as dams, walls, roads, railways, bridges, water supply, etc.

Textbook: Civil Engineering, Mitchell.

Throughout the course, instruction is mainly through a loose-leaf system of printed instruction sheets covering the various drawings and phases of the work. These are supplemented by numerous lectures and by blackboard illustrations where necessary. All problems are completed in pencil and carefully checked; only certain selected problems are finished in ink. All work is under close supervision of instructors and individual instruction is constantly given. Except in the theoretical surveying, laboratory methods are employed and advance study is not required.

Textbooks: Descriptive Geometry—Hood, The Geometry of Engineering Drawing. Surveying—Davis, Foote and Rayner; Surveying, Theory and Practice.

Reference books: Engineering Drawing—French. Map Reading and Topographical Sketching—Stuart.

DEPARTMENT OF MODERN LANGUAGES
SECOND, THIRD, AND FOURTH CLASSES

60. Cadets study modern languages throughout the first 3 years at the Military Academy. They follow courses in French during the first and second years and in Spanish the third year. There are 94 attendances in French the first year, 112 the second, and 94 in Spanish the third.

In both languages the instruction starts with pronunciation and grammar and proceeds through idiomatic expression and composition. In these basic features emphasis is placed upon careful and thorough study and application of the rules, but considerable time and attention are devoted also to the lighter side of the study, with much use of exercises in dictation, reading, writing, and speaking. The spoken language is stressed from the beginning and free composition, both oral and written, is practiced extensively. The history of the literature and of the civilization of the country as a background for the study of its language is brought out in the texts for reading and in lectures. A series of lectures in French on French Civilization and a similar series in Spanish on Spanish Civilization are given at the close of the respective courses.

DEPARTMENT OF LAW

FIRST CLASS

61. The course in law extends throughout the first-class year, half the class attending daily, Saturday excepted, for a period of 1 hour. The textbook system, supplemented by case book instruction, is employed. The following courses are studied, each cadet attending for the number of periods indicated:

PARTIAL VIEW OF CENTRAL BUILDINGS FROM HUDSON RIVER

A special course is given in 11 periods of the term to those cadets who have shown a marked proficiency in civil engineering.

Fortifications.—This course is required of all cadets of the first class. It comprises 19 periods, beginning September 1, alternating daily with civil engineering. Fifteen periods of instruction are devoted to lectures and to the study of the theory of fortifications; and the remainder of the course is devoted to practical problems in fortification. The theory includes the evolution of fortification and the principles of laying out and methods of construction of defenses; the problems are devoted principally to fortification by units not larger than a company; the lectures cover the history of the important field and permanent fortifications in past wars and the developments from one type to another, with the lessons learned from their use in war.

Textbook: Fortification, Mitchell.

Army engineering.—This course is required of all cadets of the first class. It comprises 31 periods, beginning after completion of civil engineering.

The instruction is theoretical and practical and is illustrated with models of military engineering constructions.

The instruction is devoted to the application of the principles and practice of civil and mechanical engineering to military conditions. It comprises military mapping, military roads and railways, construction of military shelters, military ports and terminals, siege works, camouflage, demolitions, military bridges, and the application of gas engines to the needs of the military service in different branches of the United States Army. A practical problem covering 10 periods is given, illustrating the application of civil engineering, fortification, and Army engineering to military requirements.

Textbook: Army Engineering, Mitchell.

Military art and history.—This course is required of all cadets of the first class. It comprises 92 periods during the fall and spring terms, alternating daily with civil and Army engineering.

The instruction is theoretical and comprises the organization of armies, employment of the different arms in combination, logistics, and strategy. Study is made of selected periods of the world's military history showing lessons applicable to present conditions. Lectures are given covering certain military events requiring special emphasis.

Textbooks: Napoleon, Dodge; Civil War, Ropes, Livermore; Civil War, Woods and Edmonds; World War Pamphlets.

DEPARTMENT OF NATURAL AND EXPERIMENTAL PHILOSOPHY

SECOND CLASS

56. The course in natural and experimental philosophy extends throughout the second-class year.

In all there are 225 recitation periods, each of 1 hour and 20 minutes duration, 6 attendances per week. For laboratory work each period is of 1 hour and 55 minutes duration. Approximately 30 laboratory experiments are performed during the year.

Analytical mechanics, thermodynamics and prime movers, hydraulics and hydraulic machinery, and aerodynamics and the airplane, in the order mentioned, are presented during the year.

The entire course, insofar as the subjects undertaken are concerned, in addition to its educational and training value, is intended as a thorough preparation for engineering and other technical subjects taught during the first-class year.

A brief statement of the courses given and the textbooks used follows:

Analytical mechanics for engineers.—The text used for this subject is *Analytical Mechanics for Engineers*, Seely and Ensign, second edition, latest printing. This subject is taken up at the beginning of the first term on September 1 and is completed at the end of that term on December 23. Maximum number of actual attendances, approximately 95. The entire text is covered. Throughout this subject a large number of original problems are presented in addition to those given in the text.

Thermodynamics and prime movers.—On January 2, the beginning of the second term, thermodynamics and prime movers is taken up in alternation with hydraulics and approximately 55 days devoted thereto. The text used is *Heat-Power Engineering*, Barnard, Ellenwood, and Hirschfeld, Part I. The theoretical course in this subject is supplemented by laboratory work covering such machinery as steam engines, steam turbines, steam pumps, air compressors, refrigerating plants, et cetera.

Hydraulics and hydraulic machinery.—Approximately 50 days are devoted to this subject which alternates with thermodynamics and prime movers. The scope of the work is that given in Textbook on Hydraulics, Russell, fourth edition. The textbook work is supplemented by a series of laboratory experiments in the hydraulic laboratory covering such subjects as orifices, tubes, nozzles, weirs, pipe friction, sudden contraction and sudden expansion, various water-measuring instruments, gages, pumps, turbines, et cetera.

Aerodynamics.—Approximately 25 periods. The scope and extent of this subject are indicated by the text used, Simple Aerodynamics and the Airplane, Carter, fourth edition. The entire text including approximately 100 original problems is taken. Various Air Corps Information Circulars, Aeronautical Magazines, and publications of the National Advisory Committee for Aeronautics are used for reference.

As the advanced and partial review work in each subject is completed, a series of written general reviews covering the entire subject is presented. All members of the class take the written general reviews. Upon the completion of the work of each term a final written examination is given on the work of that term to those cadets who have failed to meet the requirements of the course during the term.

DEPARTMENT OF MATHEMATICS

THIRD AND FOURTH CLASSES

57. The course in mathematics begins with daily recitations throughout the fourth-class year. It continues through the third-class year, alternating with physics.

In the first term of the fourth-class year, solid geometry is completed in alternation with algebra. In the second term, algebra is completed, followed by trigonometry and analytic geometry.

The third-class year is devoted to the study of differential and integral calculus, followed by a brief course in the method of least squares for selected sections.

The courses in algebra and solid geometry cover the subjects as generally taught in college, but the student is assumed to have mastered, before entrance, elementary algebra to include the progressions and the solution of the quadratic equation. Trigonometry includes the complete solution of plane and spherical triangles. Analytic geometry includes the discussion of the general equation of the second degree in the plane and the particular forms of the equation of the second degree in space.

The course in differential and integral calculus covers the ground of the usual college textbook, including briefly the subject of ordinary differential equations. The method of least squares, given to selected sections, includes the deduction of the facility curve, the formulae for the error, and the distribution of error.

DEPARTMENT OF CHEMISTRY AND ELECTRICITY

SECOND CLASS

58. This department embraces the subjects of chemistry and electrical engineering, the latter including a short course in telephone and radio communication.

The object of the course is to teach cadets to think scientifically, to prepare them for work given in their first-class year, and to impart to them information which is of cultural and professional value.

Recitations, exercises, laboratory work, or lectures take place on all week days throughout the third academic year. Recitation periods are of 1 hour and 30 minutes' duration and laboratory periods are of 2 hours' duration.

Chemistry.—The course in chemistry is a general one and concentrates on the fundamental phenomena and principles and on the simpler applications which can be thoroughly discussed. It is taught during the fall term (September to December, inclusive), and 97 hours are devoted to recitations, exercises, and lectures, and 40 hours to laboratory work.

Electrical engineering.—The course in electrical engineering includes both direct and alternating currents and concentrates on a study of the general principles of the subject, on the more important uses of electricity, and on the operation of generators, motors, and other electrical machinery. It is taught during the period January 2 to June 4, and 140 hours are devoted to recitations, exercises, and lectures, and 50 hours to practical work in the laboratory.

Standard works on the respective subjects are always available for reference, both to cadets and instructors.

DEPARTMENT OF DRAWING

SECOND, THIRD, AND FOURTH CLASSES

59. The course in drawing extends from the middle of the fourth-class year to the middle of the second-class year, or a total of 2 years. Attendance is on alternate days and with minor exceptions the period is 2 hours in length.

The subjects included in the course are surveying, topographical mapping, descriptive geometry, general drawing, and machine drawing.

Surveying.—The instruction is both theoretical and practical. The theoretical instruction covers the tape, compass, transit and stadia, level and level rod, and plane table, with special reference to their uses in the making of topographic maps. Practical exercises with the instruments are given out-of-doors and followed by exercises in computations and plotting in the drafting room.

Topographical mapping.—Detailed instruction is given in the principles of map projections, map scales, the various methods of representing ground forms, and in the systems of conventional signs and rectangular coordinates prescribed for military maps. The theoretical instruction is accompanied by practice in topographical drawing. The simpler methods of transferring data from air photos to maps are explained and illustrated by practical problems. Emphasis is placed on topographical methods employed in the military service.

Detailed instruction in the classroom and in the field is given in topographic and landscape sketching for military purposes, and each cadet is required to make such sketches on difficult ground and with every attention to accuracy and neatness.

Descriptive geometry.—The principles of orthographic projection are taught by means of practical problems and exercises in the drafting room. Simple exercises in isometric drawing and in perspective are also given. Models are freely used, and the cadet's ability to visualize is tested by problems in pictorial representation from the projections.

General drawing.—Detailed instruction is given in the use of instruments and in elementary mechanical drawing including lettering, dimensioning, tracing, and blueprinting. Limited instruction is given in freehand drawing and pictorial representation. Instruction in architectural drawing is limited to the preparation of the working plan and elevation of a small masonry building with the necessary dimensioning and lettering.

Machine drawing.—Instruction is given in the preparation of detailed working drawings of machine parts and in the preparation of finished assembly drawings of rather complicated mechanisms from data furnished in the form of detailed drawings. Technical sketching is briefly covered. One special aim of the machine drawing course is to familiarize the cadet with the standard drawings of the United States Ordnance Department and to enable him to interpret and use such drawings with facility.

Throughout the course, instruction is mainly through a loose-leaf system of printed instruction sheets covering the various drawings and phases of the work. These are supplemented by numerous lectures and by blackboard illustrations where necessary. All problems are completed in pencil and carefully checked; only certain selected problems are finished in ink. All work is under close supervision of instructors and individual instruction is constantly given. Except in the theoretical surveying, laboratory methods are employed and advance study is not required.

Reference books: Engineering Drawing—French. Map Reading and Topographical Sketching—Stuart.

DEPARTMENT OF MODERN LANGUAGES
SECOND, THIRD, AND FOURTH CLASSES

60. Cadets study modern languages throughout the first 3 years at the Military Academy. They follow courses in French during the first and second years and in Spanish the third year. There are 94 attendances in French the first year, 112 the second, and 94 in Spanish the third.

In both languages the instruction starts with pronunciation and grammar and proceeds through idiomatic expression and composition. In these basic features emphasis is placed upon careful and thorough study and application of the rules, but considerable time and attention are devoted also to the lighter side of the study, with much use of exercises in dictation, reading, writing, and speaking. The spoken language is stressed from the beginning and free composition, both oral and written, is practiced extensively. The history of the literature and of the civilization of the country as a background for the study of its language is brought out in the texts for reading and in lectures. A series of lectures in French on French Civilization and a similar series in Spanish on Spanish Civilization are given at the close of the respective courses.

DEPARTMENT OF LAW

FIRST CLASS

61. The course in law extends throughout the first-class year, half the class attending daily, Saturday excepted, for a period of 1 hour. The textbook system, supplemented by case book instruction, is employed. The following courses are studied, each cadet attending for the number of periods indicated:

Elementary law. Fall term, 23 periods. Textbook: Smith's Elementary Law.

Constitutional law. Fall term, 16 periods. Textbook: Burdick's Law of the American Constitution.

Criminal law. Spring term, 10 periods. Textbook: Clark's Criminal Law. Evidence. Spring term, 17 periods. Textbook: McKelvey on Evidence.

Military law. Spring term, 18 periods. Textbook: Manual for Courts-Martial, 1928.

The department of law has a law library of about 6,000 volumes accessible to cadets.

DEPARTMENT OF ORDNANCE AND GUNNERY

FIRST CLASS

62. The course in ordnance and gunnery extends throughout the first-class year, one half the class attending daily, for a period of 1 hour and 10 minutes, except during the time devoted to practical work in the shops, when the period is 1 hour and 55 minutes daily.

During the first term the course includes a study of the properties, manufacture, care, and use of explosives; the theory of explosives; measurements of velocities and pressures; interior ballistics; metals used in ordnance construction; principles of design and construction of guns and breech mechanisms; recoil and recoil brakes; projectiles, primers, and fuzes; small arms, including automatic weapons.

During the second term the course includes the study of the design and construction of artillery carriages; construction and use of fire-control instruments and aiming devices; exterior ballistics; probability and adjustment of fire; internal-combustion engines; military motor vehicles and motorized matériel; automotive laboratory.

The course is supplemented by lectures and by exhibits and models of the various types of arms, ammunition, and accessories.

Practical instruction is given in mechanical trades and is devoted to the principal operations performed in the ordinary metal-working shops. This includes the use of hand and machine tools; bench and vise work; turning, planing, shaping, drilling, milling, and grinding operations and the forging and hardening processes of steel.

Textbooks: Ordnance and Gunnery, McFarland. The Gasoline Automobile, Elliott and Consoliver. Technical pamphlets and periodicals, War Department publications.

DEPARTMENT OF MILITARY HYGIENE

63. The course in hygiene covers 32 periods of the cadet's first-class year at the academy and is required for all cadets. Its basic purpose is the teaching of the principles and practice of military hygiene in such a manner as to prepare the future officer so to care for his own health and that of his men in garrison and the field as to keep the effective strength of his unit as near the maximum as possible "to conserve fighting strength."

Some knowledge of biology, anatomy, physiology, and the Army Medical Service is necessary as a foundation for the course, and as many cadets enter the academy without such knowledge, these subjects, together with social hygiene and first aid, are covered by 18 lectures, while the remainder of the time is devoted to the recitation course in elements of military hygiene.

The first part of the recitation course deals with the recruit and his environment, including personal hygiene, foods and their preparation, hygiene of the barracks, of camps, of moving troops, of hot and cold climates.

The second portion deals with causes of disease, remote, predisposing and exciting, and disease carriers.

The third portion deals with the prevention and control of epidemics and the line officers' duties and responsibilities in relation thereto.

Textbook: Ashburn—Elements of Military Hygiene, new revised edition.

DEPARTMENT OF ENGLISH

64. The course in English extends through the cadet's first 2 years at the Military Academy. Recitation periods are on alternate week days, except Saturdays, throughout the academic year.

The object of the 2-year course in English is threefold: To stimulate in the cadets the desire to read and to appreciate the best in literature, to teach them to write correctly, and to teach them to talk effectively.

FOURTH-CLASS YEAR

The main purpose of the fourth-class English course is to teach the effective use of plain English in expository writing. Cadets should know how to spell, how to punctuate, and how to write grammatically before they enter upon this course. Special effort is made to increase the vocabulary of cadets by a daily drill in the choice and use of words. By lectures, frequent class-room discussions, and supervised visits to the library, instructors seek to stimulate interest in reading good books other than those included in the regular course. The readings assigned in the regular course serve principally as source material for cadets' themes. Tests for mastery of the minimum requirements of the course are briefly as follows:

At the end of the fall term.—Ability to write a well-constructed expository paragraph that shows the cadet's familiarity with the requirements of good usage in spelling, punctuation, grammar, and sentence structure.

At the end of the spring term.—Ability to write a well-constructed expository composition.

SEPTEMBER TO DECEMBER

English analysis and exposition.—Cadets are required to learn the principles of exposition and to apply those principles first in the analysis and then in the writing of sentences and paragraphs. All papers submitted are corrected, returned, and discussed in conferences.

Reading assignments include selected portions of the Bible and the best known poems up to and including those of Chaucer.

JANUARY TO JUNE

Expository composition.—This course is a continuation of the fall term course. Cadets are required to learn the principles of exposition and to apply these principles first in the analysis of selected compositions and then in the writing of numerous expository compositions on material covered in reading assignments. These compositions are usually brief essays, character sketches, editorials, or book reviews. All papers submitted are corrected, returned, and discussed in conferences.

Reading assignments include several plays by Shakespeare, works of the representative writers before the nineteenth century, and popular ballads.

Textbooks

Practical English Composition—Jones.

The Bible—King James' version.

The Hardin Craig Shakespeare.

From Beowulf to Thomas Hardy, Volume I—Shafer.

Webster's Collegiate Dictionary.

Vocabulary Builder Notebook—Kilduff.

THIRD-CLASS YEAR (ENTIRE YEAR)

The object of the third-class English course is twofold: First, to cultivate in the cadets an appreciation of the emotional, æsthetic, and intellectual values of literature, and second, to teach them to talk effectively. The material for the course in talking is taken from the literature of the Romantic and Victorian periods, from current events, from book reviews, from contemporary drama, and from magazine articles. The course includes a study and discussion of selections from Burns, Wordsworth, Byron, Shelley, Keats, Tennyson, Rossetti, Arnold, Huxley, Browning, Swinburne, Stevenson, Hardy, and Benet. During the year 11 lectures are given in connection with the course and enough composition is assigned to confirm the practice of good writing.

The year's work is designed as a continuation of the fourth-class course in English. Mastery of the principles taught in the 2 years will enable the student to appreciate the best in literature, and to write and talk correctly.

Textbooks

From Beowulf to Thomas Hardy, Volume II—Shafer.

The College Omnibus—McCallum.

Stonewall Jackson—Henderson.

Contemporary Drama, English and Irish Plays—Watson and Pressey.

John Brown's Body—Stephen Vincent Benet.

Cyrano de Bergerac—Kestand.

DEPARTMENT OF ECONOMICS, GOVERNMENT, AND HISTORY

HISTORY

65. The course in history is required of all cadets in the third class. Recitation periods are on alternate week days throughout the academic year.

The course includes a survey of the political and international history of Europe from medieval times to the present day.

Fall term: Europe from medieval times to 1789. Spring term: Europe from 1789 to the present.

Textbooks: Sellery and Kroy—Medieval Foundations of Western Civilization; Hayes—A Political and Cultural History of Modern Europe, Volume I; Hayes—Political and Social History of Modern Europe, Volume II; Shepherd—Historical Atlas.

Special courses in historical research are given the first section during the written general review periods. During these same periods one or more sections below the first section are given a special course in United States history.

Textbook: Schlesinger—Political and Social Growth of the United States, 1852–1933.

ECONOMICS AND GOVERNMENT

The course in economics and government is required of all cadets during their first-class year. Government is given during the fall term; economics during the spring term. Recitation periods are on alternate week days throughout the academic year, except for a period of 28 days given to Military Hygiene at the end of the spring term.

The course in government opens with a survey of the evolution of political forms, from the prehistoric era to the present; a more detailed examination of political systems extant today, and a final concentration on the organization and operation of government in the United States.

Textbook: Maxey—The American Problem of Government.

During the written general review period a special course in military aid to the civil power and in military government is given the upper sections (not less than half the class).

Textbook: Military Aid to the Civil Power, by the General Service Schools.

The study of economics includes an investigation of the economic organization of modern society with special reference to the United States and a consideration of the part money and credit play in the operation of this organization. Short courses in the principles of insurance and the principles of double-entry book-keeping are included.

Textbooks: Fairchild, Furniss, and Buck—Elementary Economics. Twentieth Century Bookkeeping and Accounting, part I.

During the written general review period a special course in the resources for war of the Great Powers is given the upper sections (not less than half the class).

Textbook: Simonds and Emeny—The Great Powers in World Politics.

Throughout the year a course in public affairs is given the entire class. Representative daily newspapers are used for reference.

DEPARTMENT OF PHYSICS

THIRD-CLASS YEAR

66. The course in physics begins September 1 of the third-class year and alternates daily with mathematics throughout the academic year. In addition to numerous demonstrations in the classrooms, approximately 22 formal laboratory experiments are performed. Each laboratory period is of two hours' duration. In all there are 112 periods, the recitation period being one hour and 20 minutes.

This course is in preparation for technical work of the second- and third-class years. The textbook, Smith's Elements of Physics, is almost completely covered. Elementary mechanics and sound are taken during the fall term; heat, electricity and magnetism, and light during the spring term. The text is supplemented with numerous original problems. Laboratory apparatus is used for the demonstration of practically all the principles covered. In addition the use of the slide rule is taught at the beginning of the course and its use is required.

THE LIBRARY

67. Cadets and officers have free access to the library, which comprises approximately 97,000 volumes, with an extensive collection of maps, manuscripts, and rare books. The collection contains substantially all standard books

on the subjects taught in the academy, and is especially complete in military subjects. Its card catalogues (about 380,000 cards) are arranged with the special object of saving the time of cadets. The library is open on week days from 8:30 a.m. to 6 p.m., evenings during the summer encampment and when required for studies; on Sundays and holidays from 2 to 6 p.m.

ANNUAL PHYSICAL EXAMINATION OF CADETS

68. All cadets are examined physically each year, and those found physically disqualified to continue with the course, or, in case of the first class, for commission in the Army, are discharged.

VACATIONS AND LEAVES OF ABSENCE

69. Academic duties are suspended from the completion of the June examinations until the end of August. During this period cadets are engaged in military duties and exercises and in receiving practical instruction in military and other subjects. Academic duties are also suspended from December 24 until January 2, except for those undergoing examination. All duties and exercises, as far as practicable, are suspended on New Year's Day, February 22, May 30, July 4, Labor Day, Thanksgiving Day, and Christmas Day.

Cadets of the first, second, and third classes not undergoing examinations are allowed leaves at Christmas. Cadets of the first class are also granted six week-end or holiday leaves throughout the year, provided this privilege does not interfere with academic or military duty and is warranted by their disciplinary and academic records and money accounts. Excepting such leaves, cadets under ordinary circumstances are allowed but one leave of absence during the 4-year course. This leave is granted to those cadets who have successfully completed the third-class course of study and extends from the middle of June to the 28th of August.

DEGREES

70. An act of Congress approved May 25, 1933, provides "That the Superintendents of the United States Naval Academy, the United States Military Academy, and the United States Coast Guard Academy may, under such rules and regulations as the Secretary of the Navy, the Secretary of War, and the Secretary of the Treasury may prescribe, confer the degree of bachelor of science upon all graduates of their respective academies, from and after the date of the accrediting of said academies by the Association of American Universities." The United States Military Academy was accredited by the Association of American Universities on October 31, 1925. The degree of bachelor of science was conferred retroactively by certificate upon all graduates in the classes of 1926 to 1933, inclusive. For succeeding classes this degree is regularly conferred at the time of graduation.

PROMOTION AFTER GRADUATION

71. The act of Congress approved May 17, 1886, to regulate the promotion of graduates of the United States Military Academy provides: "That when any cadet of the United States Military Academy has gone through all its classes and received a regular diploma from the academic staff, he may be promoted and commissioned as a second lieutenant in any arm or corps of the Army in which there may be a vacancy and the duties of which he may have been adjudged competent to perform." The act approved June 4, 1920 (National Defense Act), section 24e provides: "Appointment of officers.—Except as otherwise herein provided, appointments shall be made in the grade of second lieutenant, first, from graduates of the United States Military Academy."

NOTE.—The information contained in this circular is subject to change at any time.

APPENDIX A.—REGULAR EXAMINATIONS

The following sets of questions were used in recent years:

I. ALGEBRA

- | No. | Wt. | MARCH 1931 | |
|-----|-----|---|---|
| 1 | 12 | (a) Multiply $x^{1/2} - x^{1/4} + 5 - 2x^{1/4}$ by $1 + 2x^{1/4}$. | |
| | | (b) Find in simplest form an equation whose roots are | $\frac{-1 + \sqrt{5}}{2}$ and $\frac{-1 - \sqrt{5}}{2}$ |
| 2 | 10 | Solve | $\frac{ax+b}{ax-b} - \frac{bx}{ax+b} = \frac{ax}{ax-b} - \frac{(ax^2-2b)b}{a^2x^2-b^2}$ |
| 3 | 12 | A and B are walking toward each other along a road represented by the axis of X. A's distance x from the origin of coordinates y hours after 12 o'clock is given by the equation $3x - 2y = -2$. B's distance x from the same origin y hours after 12 o'clock is given by the equation $x + y = 6$. Show graphically how to find when A and B will be at the same distance from the origin. How far will they be from the origin at this time? How far apart will A and B be at 12 o'clock (i.e., when $y=0$)? | |
| 4 | 10 | Several persons hired an automobile for \$12, but three of them failed to pay their share and as a result each of the others had to advance 20 cents more. How many persons were in the party? | |
| 5 | 10 | (a) Solve: $\sqrt{2x} - 7x = -52$. | |
| | | (b) | $\left(\frac{-1 + \sqrt{-3}}{2}\right)^2 = ?$ |
| 6 | 12 | What integral values may k have in the equation $4x^2 - 2(k+3)x + k^2 = 0$ such that the values of x shall be real? | |
| 7 | 12 | The fore wheel of a carriage makes 28 revolutions more than the rear wheel in going 560 yards, but if the circumference of each wheel be increased by 2 feet, the difference would be only 20 revolutions. Find the circumference of each wheel. | |
| 8 | 12 | Find the middle term of $\left(\frac{3}{4x} - \sqrt{\frac{x^2}{2}}\right)^{12}$ and write it in the simplest form with positive exponents. | |
| 9 | 10 | A weight suspended by a string is pulled aside on a circular arc to a point A. When released it swings forward to the opposite side of the vertical to a point B; it swings back on the arc to C, then forward to D, etc. If the first swing (that is, the circular arc from A to B) is 6 inches long and each succeeding swing is five-sixths as long as the one just preceding it, how far will the weight travel before coming to rest? | |
| | | EXTRA.—Substitute for no. ———. | |
| | | Solve for x and y : | |
| | | | $\begin{cases} \frac{x^2 - y^2}{y} = \frac{93}{15} \\ x - y = 2 \end{cases}$ |
| | | MARCH 1932 | |
| 1 | 12 | (a) Simplify: | $\frac{4\sqrt{a^2b^4}}{\sqrt[3]{a^2b^2}}$ |
| | | (b) Divide: $a^2b^2 - 2b^2 + a - 3b^2$ by $a^2b^2 - 2b^2 + a - 3b^2$ | |
| | | (c) Reduce to an equivalent fraction having a real denominator | $\frac{3 - \sqrt{-7}}{3 + \sqrt{-7}}$ |
| 2 | 10 | Solve: $\sqrt{x^2-1} + \frac{1}{\sqrt{x^2-1}} = \frac{10}{3}$ | Verify results |
| 3 | 10 | Solve graphically: | |
| | | (a) | $\begin{cases} x - 3y = 6 \\ 3x + 5y = 15 \end{cases}$ |
| | | (b) Solve equations (a) algebraically. Which of these two methods gives the more accurate result? | |
| | | (c) Solve graphically | $\begin{cases} x = -3 \\ y = -2 \end{cases}$ |

Y

- | No. | Wt. | |
|-----|-----|---|
| 4 | 12 | (a) Solve for x the equation: $ax^2+bx+c=0$.
(b) For what values of k are the roots of the equation $x^2-(4k-2)x+3k^2-3=0$, real? Imaginary? Numerically equal with contrary signs? |
| 5 | 10 | Divide 144 into four parts such that if the first be increased by 3, the second diminished by 3, the third multiplied by 3, and the fourth divided by 3, the four numbers so obtained will be equal to each other. |
| 6 | 10 | A workman was hired for a period of 60 days. For each day that he worked he received his board and \$2.00. For each day that he was idle he received nothing and was required to pay \$0.50 for his board. His net earnings for the period were \$60.00. How many days did he work and how many days was he idle? |
| 7 | 12 | (a) Give an example of an arithmetic progression.
(b) Find three numbers in geometric progression, such that the sum of the first and second is 20, and the third exceeds the second by 30. |
| 8 | 12 | (a) Find the Lowest Common Multiple of $64a^2b^3+27a^3b^2$, $16a^2b^4-9a^3b^3$, $16a^3b^3+24a^2b^2+9a^3b^2$, $16a^2b^4-24a^3b^3+9a^4b^2$
(b) Factor: $acx^2-adx-bcx+bd$
(c) Factor: $25m^4+6m^2n^2+n^4$. |
| 9 | 12 | (a) Write the r^{th} term of $(a+b)^n$ by the binomial formula
(b) Write the term involving x^3 in the expansion of $\left(a^2x^2+\frac{1}{x}\right)^{15}$ and reduce to its simplest form |

EXTRA.—Substitute for no. ———

The difference of the cubes of two numbers is 218. The sum of the squares of the two numbers increased by the product of the numbers is 109. Find the numbers.

- No. 8 Wt. 12 The third digit of a 3-digit number is as much greater than the second as the second is greater than the first. If the number be divided by the sum of its digits, the quotient will be 15. The number will be increased by 396 if the order of the digits be reversed. What is the number?
- 9 10 (a) Define and illustrate a geometric progression, a geometric mean.
 (b) Twenty-five trees are planted in a straight line at intervals of 5 feet. To water them, the gardener must bring water for each tree separately from a well which is 10 feet from the first tree and in line with the trees. How far has he walked when he has watered all the trees, starting at the well and ending at the last tree?

EXTRA.--Substitute for no. _____
 In the expansion of $(3x^2 - b)^{13}$ by the binomial theorem
 (a) Write the r th or general term
 (b) Write the two middle terms
 (c) Prove that there can be no term in which x has 7 for its exponent

MARCH 1934

- 1 10 Find the Highest Common Factor and Lowest Common Multiple of $8a^2x^2 - 36a^2b^2x^2 + 54ab^4x^2 - 27b^6x^2$ and $4a^2x + 4a^2bx - 9ab^2x - 9b^3x$.
- 2 10 (a) Solve graphically $\begin{cases} 3x + 5y = 14 \\ x - 2y = -1 \end{cases}$
 (b) Solve equations (a) algebraically.
 (c) Write the equations whose graphs pass through the origin and are parallel to the graphs of equations (a).

From the foot of this perpendicular a perpendicular is let fall on the first side, and from the foot of this perpendicular a perpendicular is let fall again on the second side, and so on, indefinitely. Find the sum of the lengths of all the perpendiculars.
 (Hint: Show that the lengths of the perpendiculars form a geometric progression whose ratio is b divided by a .)

2. PLANE GEOMETRY

MARCH 1931

- No. 1 Wt. 10 Theorem: If two triangles have two sides of one respectively equal to two sides of the other, and the included angles unequal, the triangle which has the greater included angle has the greater third side.
- 2 12 Problem: To find the locus of a point which moves so that the ratio of its distances from two fixed points, A and B , is constant and equal to m [in the construction make $m=\frac{3}{2}$].
- 3 10 Theorem: If, through a point outside a circle, a tangent and a secant are drawn to the circle, the length of the tangent is a mean proportional between the whole secant and its external segment.
- 4 10 Problem: A right line segment, AB , is produced to a point C such that $\overline{AC} \times \overline{BC} = \overline{AB}^2$.
 To construct the point C . [Hint: Theorem of question no. 3 above may be useful.]
- $$\begin{array}{c} A \qquad \qquad \qquad B \\ | \text{-----} | \\ | \text{-----} | \end{array}$$
- 5 12 Problem: To find the locus of the centers of the inscribed circles of all right triangles having line AB as a common hypotenuse.

- 6 12 Problem: To construct a triangle given two of its sides, b , c , and the median m_a to the third side.
- $$\begin{array}{c} m_a \\ | \text{-----} | \\ b \\ | \text{-----} | \\ c \\ | \text{-----} | \end{array}$$

- No. 7 Wt. 12 Theorem: Given two chords of a circle, AB and CD , perpendicular to each other and intersecting at O .
Then $\overline{OA}^2 + \overline{OB}^2 + \overline{OC}^2 + \overline{OD}^2 = (\text{the diameter})^2$.
- 8 10 (a) Theorem: The area of a triangle is equal to one-half the product of its perimeter by the radius of the inscribed circle.
(b) If an arc of 45° on one circumference is equal to an arc of 60° on another, what is the ratio of the areas of the circles?
- 9 12 Exercise: If the radius of a circle be 1 inch and the side of a given regular inscribed polygon be m inches, find the length of the side of a regular inscribed polygon which has twice as many sides as the given polygon.
EXTRA.—Substitute for no. ———.
Exercise: The legs of a right-angled triangle are 3 and 4 inches, respectively. Find (to hundredths of an inch):
(a) The hypotenuse and corresponding altitude.
(b) The projections of the given sides on the hypotenuse.
(c) The radius of the inscribed circle.
(d) The radius of the circumscribed circle.
(e) The segments of the hypotenuse fixed by the point of contact of the inscribed circle.
[Hint: Use statement in question no. 8.]

MARCH 1932

- 1 10 Theorem: In two similar triangles, corresponding altitudes have the same ratio as any two homologous sides.
- 2 12 Theorem: If two parallel straight lines be divided into parts proportional, each to each, and straight lines be drawn through the corresponding points of division, they will pass through a common point.
- 3 12 Problem: Find the locus of the middle points of all chords of a given length in a given circle.
- 4 12 Theorem: In the same circle or equal circles, two angles at the center have the same ratio as their intercepted arcs.
- 5 10 Theorem: ABC is any triangle, M the mid-point of AB , P any point in AB between A and M . If MD is drawn parallel to PC , meeting BC at D , the triangle BPD is equivalent to one-half the triangle at ABC .
- 6 12 Problem: A rectangle and a circle have equal perimeters. Find the difference in their areas (to hundredths of a square inch) if the radius of the circle is 9 inches, and the width of the rectangle is three-fourths of its length.
- 7 10 Theorem: The bisector of an exterior angle of a triangle meets the opposite side produced in a point whose distances from the extremities of that side are proportional to the other two sides.
- 8 10 Theorem: If from a point within a triangle two straight lines are drawn to the extremities of one side, their sum will be less than the sum of the other two sides of the triangle.
- 9 12 (a) Theorem: In any right-angled triangle the median from the vertex of the right angle to the hypotenuse is equal to one half the hypotenuse.
(b) Problem: Construct a right-angled triangle, given the median and altitude drawn from the vertex of the right angle.

altitude

median

EXTRA.—Substitute for no. ———

Problem: Construct a circle tangent to a given circle and tangent to a given straight line, not intersecting the given circle, at a given point on that line.

MARCH 1933

- 1 10 Theorem: The sum of the squares of two sides of a triangle is equal to twice the square of half the third side, plus twice the square of the median drawn to the third side.
- 2 10 Theorem: In the same circle or equal circles, the lesser of two chords is at the greater distance from the center.
- 3 12 (a) Problem: To find the locus of the mid-points of all straight lines drawn from a given point to a given straight line.
(b) Problem: To construct a triangle, given the middle points of its three sides.
- 4 12 Problem: To divide a given line internally in mean and extreme ratio.
- 5 12 Theorem: A circle inscribed in a triangle ABC touches AB at E and AC at D . Prove that the circle inscribed in the triangle AED has the mid-point of the arc ED as its center.

- No. 6 Wt. 12 Problem: To construct a rectangle, having given the difference in length of two sides, d , and the angle, a , formed by the two diagonals.

- 7 10 Problem: In a triangle whose sides are respectively 25.13 inches, 31.29 inches, and 37.56 inches in length, find the segments of the longest side formed by the bisector of the opposite angle.
- 8 10 Problem: Find the area of a regular octagon inscribed in a circle whose radius is 12 inches.
- 9 12 Problem: Two circles intersect at A and B . NAM is any straight line passing through A and terminated by the circumferences. Prove that angle MBN is constant.
- EXTRA.—Substitute for no. ———.
- Theorem: If two circles intersect, any two parallel straight lines drawn through the points of intersection and terminated by the circumferences are equal.

MARCH 1934

- 1 10 Theorem: The three medians of any triangle intersect in a common point which is two-thirds of the distance from each vertex to the middle of the opposite side.
- 2 10 The area of the triangle ABC is 140 square feet. Angle $B=72^\circ$, angle $C=69^\circ$. The area of the triangle DEF is 216 square feet. Angle $D=39^\circ$. The ratio of AB to DE is one-half. What is the ratio of AC to DF ?
- 3 10 Problem: Construct a rectangle equivalent to a given square, and having the difference of its base and altitude equal to a given line.
- 4 10 Theorem: The median drawn to any side of a triangle is less than half the sum of the other two sides.
- 5 10 The radius of a circle is 9 inches. Find the area of a segment whose arc is 60° .
- 6 10 Problem: Construct a triangle, given the side a , and angle B adjacent to the side, and d the difference between the other two sides.

- 7 10 Theorem: Two diagonals of a regular pentagon, not drawn from a common vertex, divide each other in extreme and mean ratio.
- 8 10 In a right triangle the perpendicular from the vertex of the right angle to the hypotenuse divides the hypotenuse into segments whose lengths are m and n respectively.
(a) What is the area of the triangle?
(b) What are the lengths of the other two sides?
- 9 10 Theorem: The radius r of the circle circumscribed about the triangle whose sides are a , b , and c and whose area is K , equals $\frac{abc}{4K}$.
(Hint: From any vertex draw an altitude of the triangle and a diameter of the circle.)
- 10 10 Theorem: If two adjacent angles of a quadrilateral are right angles, the bisectors of the other two angles are perpendicular to each other.
- 11 10 Problem: Given a circle with chord AB ; draw through a given point P , in the arc subtended by AB , a chord which is bisected by AB .

MARCH 1935

- 1 10 Theorem: The line joining the mid-points of the diagonals of a trapezoid is equal to one-half the difference of its bases.
- 2 10 Problem: A point P is taken inside a circle of radius 5 units and at a distance of 3 units from the center. Construct a chord through P , 9 units in length.
- 3 10 Theorem: Two parallel tangents are drawn to a circle whose center is O . A third tangent is drawn to this circle, intersecting the first two at A and B , respectively. Prove that the circle constructed on AB as a diameter passes through O .

- No. Wt. Problem: Construct a triangle, given the base, a , the angle opposite, A , and the altitude p , upon one of the other sides.

- 5 10 Theorem: In a given triangle, if lines be drawn from the center of the inscribed circle to the extremities of the base, the angle so formed equals 90° plus one-half the angle of the triangle opposite the base.
- 6 10 Problem: Construct a triangle equivalent to the polygon whose vertices are A, B, C, D, E .

- 7 10 Theorem: If a straight line divides two sides of a triangle proportionally, it is parallel to the third side.
- 8 10 Problem: Inscribe a regular decagon in a given circle.
- 9 10 Theorem: $ABCD$ is a given square. $E, F, G,$ and H are the middle points of $AB, BC, CD, DA,$ respectively. Draw the lines $AF, BG, CH,$ and DE . Prove that these lines form a square equivalent to $1/5$ the square $ABCD$.
- 10 10 Problem: In a given circle, find a point P on the arc subtended by the chord AB such that the chord PA is to the chord PB as 2 is to 3.
- 11 10 Find the radius of a circle if the difference between the areas of the circumscribed and inscribed regular triangles is 25 square inches. (Leave answer in surd form.)

5⁵. Give in your own words the meaning of the following lines from *Macbeth*:

"Come you spirits
That tend on mortal thoughts, unsex me here,
And fill me from the crown to the tow-topful
Of direct cruelty! make thick my blood,
Stop up the access and passage to remorse,
That no compunctious visitings of nature
Shake my fell purpose."

6³⁰. Write a composition of about 300 words on *one* of the following subjects:

- (a) Books that are always new.
- (b) Reading for pleasure.
- (c) A well-known writer, English or American, whose reputation seems to you much higher (or lower) than it deserves to be.

MARCH 1933

GROUP I

1¹⁵. Write upon *one* topic in this group (at least 150 words).

- (a) In a Shakespearean tragedy there is usually a scene which marks the turning-point in the fortunes of the hero. Select such a scene from one of Shakespeare's tragedies, describe the events which happen in it, and show how these events affect the subsequent career of the hero.
- (b) In any play of Shakespeare show how the hero's conscience or sense of duty influences his career.
- (c) An American critic has said that the plays of Shakespeare "unfold primarily not character but events, and at the end, except for casual conversions, his characters are pretty much what they were at the beginning." Do you find this statement true in the plays which you have read? Explain your answer by definite references.
- (d) In a Shakespearean play there is usually a scene or group of scenes that makes clear the situation out of which the play develops; another that sets the main action going; another that marks the turning point of the action; and another that brings it to a close. Indicate such scenes or groups of scenes from one of Shakespeare's plays and show briefly how each fulfills its purpose.
- (e) Show that a tragedy of Shakespeare represents a conflict between opposing forces.

GROUP II

2¹⁰. Answer both parts:

Macbeth (to Doctor):

"Cure her of that,
Canst thou not minister to a mind diseas'd,
Pluck from the memory a rooted sorrow,
Raze out the written troubles of the brain,
And with some sweet oblivious antidote
Cleanse the stuff'd bosom of that perious stuff
Which weighs upon the heart?"

- (a) Explain in your own words the meaning of this quotation.

- (b) Sunset and evening star,
And one clear call for me!
And may there be no moaning of the bar,
When I put out to sea,

But such a tide as moving seems asleep,
Too full for sound and foam,
When that which drew from out the boundless deep
Turns again home.

Twilight and evening bell,
And after that the dark!
And may there be no sadness of farewell,
When I embark;

For though from out our bourne of Time and Place
The flood may bear me far,
I hope to see my Pilot face to face
When I have crossed the bar.

- (1) What comparison does the poet make?
- (2) In your own words explain the meaning of this poem.

GROUP III

(60 minutes)

No.

134. In a short paragraph state the thought of the following poem:

THE DONKEY

When fishes flew and forests walked
 And figs grew upon thorn,
 Some moment when the moon was blood,
 Then surely I was born.
 With monstrous head and sickening cry
 And ears like errant wings,
 The devil's walking parody
 On all four-footed things.
 The tattered outlaw of the earth,
 Of ancient crooked will;
 Starve, scourge, deride me: I am dumb,
 I keep my secret still.
 Fools! For I also had my hour;
 One far fierce hour and sweet:
 There was a shout about my ears,
 And palms before my feet!

135. Express the thought of the following paragraph in a sentence or two:

Courage is the sound health of a man's nature; but just as, they tell us, there is no man whose physical health is perfect, no man who does not carry somewhere in him some disease which if no other cause outstrips it will bring his death, so there is probably no man who in all his life, in every part of him, is thoroughly, consistently courageous. We know how easy it is to find a man bold as a lion in one part of his nature, and timid as a hare in others. It makes some of the strangest complications of character. It is at the root of some of our most surprising disappointments about men. I see a man leading a regiment in battle directly into the face of the most fearful fire, as stiff and unflinching as if he were made of steel. I think, "Here is a brave man," and I sit down to talk with him, and I find him the most timid creature in his opinions, eternally conservative, always asking what other people think. He is physically brave and intellectually a coward. Or I see a man holding his own principle with calm and strong assertion, and I learn to honor him, and yet that man will not walk through a dark passage by himself nor hold out his hand for a splinter to be taken out without a groan. He has moral courage but no physical courage. "My dear friend, where are you a coward, where is your weak spot?" we should ask of a new companion if we were wholly frank with him, and if he answered us truthfully we should know him at once. As we cannot use such frankness to one another, we have to go on feeling one another's life until we find just at what point his bravery breaks down in cowardice.

39. Read carefully the following paragraph.

LITERARY BURROWING

A few years ago a Shakespearian critic showed that when Falstaff was made to babble of green fields he was really quoting from one of the psalms. This proved that he had received a religious education, and was probably a choir boy in his youth. The man who hit upon this illuminating thought was for weeks a marvel among critics. Since then they have no doubt found Falstaff to be nine different kinds of an allegory; so rapidly does the work advance. Why need every honest poet be suspected of leading a quadruple life? Sometimes the second or third meaning is less interesting than the first, and the only really difficult thing about a poem is the critic's explanation of it. But active minds must find employment, and if you cannot burrow how can you be deep? And if you are not deep, you are that wretched vulgar thing, a casual reader, and will be snubbed to the end of your days by these haughty troglodytes. So when one of them comes along, never let him see you feeding on the surface of a poem. Dive to the bottom like a loon. You can bring up queer things from the deepest part. Then he will feel degraded and superficial and blush awkwardly like a casual reader.

Essaying the Essay—Johnson

In a sentence summarize the thought of this paragraph.

41. Read carefully the following poem.

THE DISCOVERY

There was an Indian, who had known no change,
Who strayed content along a sunlit beach
Gathering shells. He heard a sudden strange
Commingle noise; looked up; and gasped for speech.
For in the bay, where nothing was before,
Moved on the sea, by magic, huge canoes,
With bellying cloths on poles, and not one oar,
And fluttering coloured signs and clambering crews.

And he, in fear, this naked man alone,
His fallen hands forgetting all their shells,
His lips gone pale, knelt low behind a stone,
And stared, and saw, and did not understand,
Columbus's doom-burdened caravels
Slant to the shore, and all their seamen land.

—John C. Squire.

PART I.—History of the United States. (Weight, 50)

NOTE.—The examination in United States History consists of 12 questions (questions 1–12) each having a weight of 5. You are required to answer not more than 10 questions of the 12 presented. Should you answer more than 10 questions, only the first 10 answers will be considered in computing the final mark. An answer scratched out will not be considered.

No.

1. (a) Name two (2) inventions of the fourteenth and fifteenth centuries which encouraged discovery and exploration.
(b) Which general regions in the present United States were explored by the Spaniards? by the French? by the English?
2. (a) List three (3) forms of colonial government used in British America, and name one colony illustrative of each.
(b) In 1775, which form of colonial government predominated?
3. (a) Outline the British campaign of 1777 with reference to plans, operations, and outcome.
(b) How did the result of this campaign affect colonial foreign relations?
4. Point out three (3) sources of national weakness in the Articles of Confederation and tell how each was remedied in the Constitution.
5. (a) What were the effects of the War of 1812 on our commerce and industry?
(b) What change was made in our tariff policy as a result of this war?
6. (a) State the provisions of the Missouri Compromise.
(b) What Supreme Court decision declared this compromise unconstitutional?
7. Define briefly five (5) of the following terms in their historical setting: "Kitchen cabinet"; Stamp Act; Willnot proviso; "War Hawks"; Right of Deposit; Watchful Waiting; Constitutional Union Party; Grandfather clause.
8. (a) List the important engagements (with dates and names of Union commanders in each instance) that led to Union control of the Mississippi River during the Civil War.
(b) What was the chief service of the United States Navy in the Civil War?
9. (a) Explain the change that occurred in European emigration to America after the year 1890.
(b) What was the American attitude toward this change? Why?
10. Trace chronologically in outline form our national acquisition of overseas territory from 1860 to 1920. Give dates of acquisition and source from which each unit of territory was acquired.
11. On map L (see page 49). —
(a) Locate and name:
(1) The city where the treaty ending the Russo-Japanese War was signed in 1905.
(2) The site of a Civil War battle on northern soil.
(b) Trace:
(1) The southern boundary of the Oregon Territory in 1819.
(2) The Cumberland Road.
(c) Outline any one:
(1) The area included in the New England Confederation of 1643.
(2) The first State to secede from the Union.
12. What were the policies of the Federal Government in the World War with reference to (a) recruiting; (b) regulation of commerce and industry; (c) raising of money?

PART II.—Ancient History, 750 B. C. to 814 A. D. (Weight, 50)

NOTE.—The examination in Ancient History consists of 12 questions (questions 13–24), each having a weight of 5. You are required to answer not more than 10 questions of the 12 presented. Should you answer more than 10 questions in Part II, only the first 10 answers will be considered in computing the final mark. An answer scratched out will not be considered.

13. In a paragraph of not over 150 words, describe the organization of the Persian Empire under Darius.
14. In connection with Greek colonization, state (a) causes or motives; (b) most active period; (c) relations between the colonizing city and the colony.
15. In a paragraph of not over 200 words, describe Athens in the time of Pericles under the following heads:
(a) Social organization.
(b) Political organization.
16. Identify (date or period, nationality or location, nature, position or importance) any five (5) of the following:
Aristides
Cimon
Sophocles
Philip II
Xenophon
Helots
Delphi
Tyrant (Greek)
17. Outline the formation of the Delian Confederation or League, and show how this organization became an Athenian Empire.

No.

18. In a paragraph of not more than 200 words, describe the political organization of the Roman Republic in 500 B. C. and trace its political development up to 400 B. C., using correctly the following terms: patrician, plebeian, consul, quaestor, dictator, senate, comitia centuriata, censor, comitia tributa, tribune.
19. Name four (4) provinces acquired by Rome between 250 B. C., and 130 B. C., giving the date and circumstances of each acquisition.
20. Identify (date, or period, nationality or location, nature, position or importance) any five (5) of the following:
- | | |
|----------|-------------|
| Actium | Servile War |
| Selucids | Marius |
| Trajan | Hasdrubal |
| Lepidus | Mithridates |
21. (a) Name the members of the Second Triumvirate.
 (b) Beginning with the Battle of Philippi, outline the steps which led to the dissolution of the Second Triumvirate.
22. Arrange the following emperors in chronological order, and in a sentence each, show their connection with early Christianity: (a) Diocletian; (b) Julian; (c) Nero; (d) Constantine; (e) Theodosius.
23. Locate and name on map B (see page 50) any ten (10) of the following:
- | | |
|---|--------------------------------------|
| Tyre | Zama |
| Ninevah | Cisalpine Gaul |
| Athens | Tours |
| A Greek Colony in Italy | Appian Way |
| Mount Athos | Site of a Roman Naval victory in the |
| Hannibal's route from Saguntum to | First Punic War |
| Cannae | Pompeii |
| Site of a Carthaginian land defeat in 207 | Nicaea |
| B. C. | |
24. Outline the Visigothic invasion of the Roman Empire to include the establishment of the Visigothic Kingdom.

APPENDIX B.—VALIDATING EXAMINATIONS

1. ALGEBRA

MARCH 1931

- 1 10 (a) Solve: $2\{8-2\{6-2(5-\sqrt{2x-1})\}\}=8$
(b) Solve: $x^{-\frac{2}{3}}=27$
- 2 12 Find, by division, the highest common factor of
 $x^4-5ax^3+5a^2x^2+5a^3x-6a^4$ and $x^3+4ax^2+a^2x-6a^3$
- 3 10 Two pipes are connected with a tank. The larger one is an intake which can fill the tank in three hours, while the smaller one is an outlet which can empty the tank in four hours. With both pipes open how long before the tank will be filled?
- 4 10 Reduce the following fractions to an equivalent fraction having a real denominator:
$$\frac{2\sqrt{-3}+5\sqrt{-5}}{3\sqrt{-3}-2\sqrt{-5}}$$
- 5 12 Two launches race over a course of 12 miles. The first goes $7\frac{1}{2}$ miles per hour. The other, having a start of 10 minutes, passes over the first half of the course with a certain speed, but increases its speed over the second half by 2 miles per hour, winning the race by 1 minute. What is the speed of the second launch in the first half of the course?
- 6 10 Find the limits of x when
$$3x-2 > \frac{1}{2}x - \frac{4}{5} \text{ and } \frac{7}{6} - \frac{5}{4}x < 8-2x$$
- 7 12 One basketball team has won 5 games out of 17 played, and another team has won 6 games out of 12 played. How many straight games must the first team win from the second in order that their averages of games won, or percentages, shall be equal?
- 12 Solve $\begin{cases} \frac{1}{x^2} + \frac{1}{xy} + \frac{1}{y^2} = 49 \\ \frac{1}{x} + \frac{1}{y} = 8 \end{cases}$

- (a) Add: $2x^2+3x^3+2x+1$, $x^3-4-5x-3x^2$, $3x+x^2+3-4x^3$
 (b) Subtract: $a^3+3b^3-2a^2b-ab^2$ from $3a^2b-6ab^2-2b^3+4a^3$
 (c) Multiply: $x^3-y^3-3x^2y+3xy^2$ by $x-y$
 (d) Divide: $ab-ac-bd+cd$ by $a-d$

(e) Simplify $\begin{cases} \frac{x}{y} + 1 \\ \frac{y}{x^2} - 1 \\ \frac{1}{y^2} \end{cases}$

(f) Find the square of $x - \frac{3y}{2z}$.

(g) Find the square root of $4a^2 - 20a + 25$

(h) Simplify: $(7 + \sqrt{-3})(7 - \sqrt{-3})$

(k) Solve $\begin{cases} x+y=6 \\ x-y=4 \end{cases}$

(l) Give an example of an arithmetic progression; a geometric progression.

- No. 2 Wt. 10 Solve graphically $\begin{cases} 3x+2y=6 \\ 2x-5y=-10 \end{cases}$

- No. 3 Wt. 12 Find the highest common factor of
 $8a^3+27b^3, 6a^2-4ac+9ab-6bc, 9b^3+12ab+4a^2$
- 4 12 A teacher proposes 16 problems to a pupil. The latter is to receive 5 marks in his favor for each problem solved, and 3 marks against him for each problem not solved. If the number of marks in his favor exceeds those against him by 32, how many problems will he have solved?
- 5 10 Arrange in order of magnitude:
 $4\sqrt{3}, 6\sqrt{5}, 8\sqrt{11}$
- 6 12 Solve: $x + \sqrt{a^2+x^2} = \frac{2a^2}{\sqrt{a^2+x^2}}$. Verify result
- 7 12 Three cities, *A*, *B*, and *C*, are so situated that the distance from *A* to *C* by way of *B* is 50 miles, from *A* to *B* by way of *C* is 70 miles, and from *B* to *C* by way of *A* is 60 miles. How far apart are the cities?
- 8 12 Solve $\begin{cases} x^2+xy+y^2=31 \\ x^2-xy+y^2=91 \end{cases}$

EXTRA.—Substitute for no. (May be substituted for any problem except no. 1.)

- (a) From the sum of x^2-1 , $3x+2$, and $-8x^2-5x$, subtract the sum of $4x-3x^2$, $4-2x$ and $8-3x^2-6x$.
- (b) Simplify: $3a^2x - \{2mb + [a^2x - (-4s^2 + 5mb) + s^2]\}$
- (c) Solve $\begin{cases} 2x+3y=10 \\ x-y=0 \end{cases}$
- (d) $(x^2+xy+y^2)(x^2-xy+y^2)(x-y)(x+y)=?$
- (e) Simplify $\frac{x - \frac{1}{x}}{x+2 + \frac{1}{x}}$
- (f) What is the value of $2x^3-3y^2-4z^{-1}$, if $x=2$, $y=3$, $z=1$?
- (g) Expand: $(x+y)^6$
- (h) Simplify $\left(-\frac{1}{2} + \frac{1}{2}\sqrt{3}\right) \left(-\frac{1}{2} - \frac{1}{2}\sqrt{3}\right)$
- (k) Factor: $1-x^2+2xy-y^2$
- (l) Find the highest common factor and the least common multiple of $4ax^2-20ax+2Aa$ and $6abx^2+2Aabx-126ab$.
- 2 12 A formal rectangular flower garden is to be enlarged by a border whose uniform width is 10 percent of the length of the garden. If the area of the border is 900 square feet and the width of the old garden is 75 percent of the width of the new one, find the dimensions of the new garden and the width of the border.
- 3 12 Solve $\begin{cases} 5x^2-xy+5y^2=59 \\ 3x^2-4xy+3y^2=15 \end{cases}$
- 4 12 From a thread whose length is equal to the perimeter of a square, 1 yard is cut off, and the remainder is equal to the perimeter of another square whose area is $\frac{4}{9}$ of that of the first. What is the original length of the thread?
- 5 12 Solve: $\sqrt{x^2-5x+10}=2x^2-10x+14$.
- 6 10 (a) Find the sum of $\sqrt{6x-18}$, $6\sqrt{4x+8}$, $\sqrt{36x-72}$ and $-\sqrt{25x+50}$.
- (b) Rationalize the denominator and simplify: $\frac{(\sqrt{2}+3)(\sqrt{5}-2)}{(3-\sqrt{2})(2+\sqrt{5})}$
- 7 12 Write the first three terms of the expansion of $\left(\frac{2}{3}x^2 - \frac{3}{2}y^3\right)^9$ by the binomial formula and simplify the result.
- 8 10 Divide 16 into two parts such that their product is to the sum of their squares as 3:10.

MARCH 1931

- No. 1 Wt. 10 Theorem: The bisectors of the exterior angles at two vertices of a triangle and the bisector of the interior angle at the third vertex meet in a point.
- 2 12 (a) Theorem: In an isosceles triangle, the sum of the perpendiculars drawn from any point in the base to the two equal sides is constant and equal to the altitude drawn to one of the equal sides.
(b) How many degrees are there in the sum of the angles of a polygon of 18 sides?
- 3 10 Theorem: Through three points, not lying in a straight line, one circle, and only one, can be drawn.
- 4 12 Theorem: O is a point on the diagonal AC of a parallelogram $ABCD$. Through O are drawn POQ parallel to AB and ROS parallel to AD ; P, Q, R, S are the points where these lines meet AD, BC, AB, CD . The parallelograms $POSD$ and $ROQB$ are equal in area.
- 5 10 (a) Problem: To construct a mean proportional between the two given lines, a and b
-
- (b) How high is a tree that casts a shadow 60 ft. long if a vertical post 6 ft. high casts a shadow 8 ft. long at the same time?
- 6 12 Problem: To find the locus of the middle points of all chords of a given circle that pass through a given point within the circle.
- 7 10 Problem: To draw through a given point on the circumference of a circle a chord that shall be bisected by another given chord. Show when the solution is impossible. [Hint: Use Question No. 6.]
- 8 12 Problem: To draw a common tangent to two given unequal intersecting circles.
- 9 12 (a) Theorem: Two circles intersect at P and Q . PA and PB are diameters. Then the lines QA and QB form a straight line.
(b) The area of a circle is 1,000 sq. inches. Find its radius to hundredths of an inch.
EXTRA.—Substitute for no. —.
Theorem: O is a point in the base, BC , of an isosceles triangle ABC , the rectangle $BO \cdot OC$ is equal to $AC^2 - AO^2$.

MARCH 1932

- 1 20 (a) Draw a quadrilateral that is not a parallelogram.
(b) Draw a parallelogram that is not a rectangle.
(c) Draw an angle that is neither acute nor obtuse.
(d) Draw an isosceles triangle that is not equilateral.
(e) Draw an equilateral pentagon that is not regular.
(f) Draw two circles, the circumference of one being twice the circumference of the other.
(g) Draw a triangle and a rectangle which have equal bases and equal areas.
(h) Draw two unequal triangles having two sides and an angle of one equal, respectively, to two sides and an angle of the other.
(i) What is the ratio of the magnitude of an angle of a regular octagon to that of an angle of a regular hexagon?
(k) What is the radius of a circle if the number of linear inches of its circumference is equal to the number of square inches of its area?
(l) What is the locus of the vertices of all right triangles which can be constructed on a given straight line as hypotenuse? Illustrate by a figure.

- No. Wt. Problem: Find the area of a rhombus if its diagonals are in the ratio of 4 to 7 and their sum is 8 inches.
- 2 10
- 3 12 Theorem: If a straight line be drawn through the point of contact of two tangent circles, forming chords, the radii drawn to the remaining extremities of these chords are parallel. Also, the tangents at these extremities are parallel.
- 4 12 Problem: Construct a triangle ABC , given the angles B and C and the median from the vertex A .

- 5 12 Problem: Upon a given straight line a , construct a segment of a circle which shall contain a given angle x .

- 6 12 Theorem: In two regular polygons of the same number of sides, two corresponding sides are to each other as the radii or as the apothems.
- 7 10 Problem: If the chord of an arc of a circle is 240 inches, and the chord of one half of the arc is 123 inches, what is the diameter of the circle?
- 8 12 Problem: On a given side d construct a rectangle equivalent to the sum of the squares on the lines a and b .

EXTRA.—Substitute for no. ——— (May be substituted for any problem *except* no. 1.)
 Theorem: If the diagonals of a parallelogram be drawn, the four triangles having as a common vertex the intersection of the diagonals are all equivalent.

MARCH 1933

- 1 20 (a) What is the ratio of the areas of two similar triangles whose bases are 2 and 3 inches respectively?
 (b) The area of a circle is 9π sq. in. What is the radius of a circle whose area is $4/9$ the area of the first?
 (c) Angle of a triangle is 33° . What is the adjacent exterior angle?
 (d) Draw trapezoid whose altitude is one inch and whose area is one square inch.
 (e) A point is 4 inches from the circumference of a circle. A tangent to the circle from this point is 8 inches long. What is the radius of the circle?
 (f) The perimeters of two similar polygons are 16 and 12 inches, respectively. The length of one side of the first is 2 inches. What is the length of the corresponding side of the second?
 (g) What is the locus of the centers of all circles which can be drawn tangent to a given line at a fixed point? Illustrate by a figure.
 Complete the following statements:
 (h) In a right triangle, if a perpendicular is drawn from the vertex of the right angle to the hypotenuse, each side about the right angle is a mean proportional between.....
 (i) The sum of all the angles of a polygon is equal to.....
 (k) The three medians of any triangle intersect in a common point which is.....

- No. Wt.
- 2 10 Problem: Each side of a rhombus is 24 inches long and the larger angles are double the smaller angles. Find the area of the rhombus, leaving the answer in surd form.
- 3 12 Theorem: The two common external tangents to two circles meet the line joining their centers in the same point.
- 4 12 Problem: Construct a triangle ABC , given the angles B and C and the sum of the sides opposite these angles.

- 5 10 Problem: Two lines OA and OV are at right angles; $OA=1\frac{1}{2}$ inches and $OB=\frac{1}{2}$ inch. A circle is described with center at A and radius of 1 inch. To construct a circle of radius 1 inch that shall pass through B and be tangent to the given circle.
- 6 12 (a) Theorem: If from a point within a triangle two straight lines are drawn to the extremities of one side, their sum will be less than the sum of the other two sides.
(b) Theorem: Of two oblique lines drawn from the same point in a perpendicular and cutting off unequal distances from the foot, the more remote is the greater.
- 7 12 Problem: The crescent-shaped figure $ABCD$ is bounded by a semi-circle ABC whose radius is 2 feet and an arc ADC whose radius is 4 feet. Find the area of the crescent.
- 8 12 (a) Problem: To draw through the point P a line that shall terminate in the sides of the angle A and shall be bisected at P .

- (b) Problem: Given the line a as the unit, to construct a line equal in length to $\sqrt{3}$.

MARCH 1934

- 1 20 (a) A straight line PAB cuts a given circle at A and B . $PA=2$ inches, $AB=6$ inches. What is the length of the line PT , drawn tangent to the circle at T ?
- (b) What is the locus of the centers of all circles which pass through the points of intersection of two given circles? Illustrate by a figure.
- (c) How many degrees are there in the exterior angle of a regular pentagon?
- (d) The perimeters of two similar polygons are 200 feet and 300 feet respectively. A side of the first is 24 feet. What is the homologous side of the second?
- (e) A tree casts a shadow 90 feet long when a post 6 feet high casts a shadow 4 feet long. How high is the tree?
- (f) The areas of two similar polygons are 50 square inches and 12.5 square inches respectively. If a diagonal of the first is 6 inches what is the length of the homologous diagonal of the second?
- (g) Complete the following statements:
- (1) Two triangles which have their sides perpendicular each to each are -----
 - (2) The area of a parallelogram equals -----
 - (3) The bisector of an angle of a triangle divides the opposite side into segments which are -----

The world is too much with us; late and soon,
Getting and spending, we lay waste our powers:
Little we see in Nature that is ours;
We have given our hearts away, a sordid boon!
The Sea that bares her bosom to the moon;
The winds that will be howling at all hours,
And are up-gathered now like sleeping flowers;
For this, for everything, we are out of tune;
It moves us not.—Great God! I'd rather be
A Pagan suckled in a creed outworn;
So might I, standing on this pleasant lea,
Have glimpses that would make me less forlorn;
Have sight of Proteus rising from the sea;
Or hear old Triton blow his wreathed horn.

—Wordsworth.

- 3¹⁰. a. In a short paragraph state the thought of the following poem.
 b. Suggest another title for the poem.

MEMORABILIA

Ah, did you once see Shelley plain,
 And did he stop and speak to you,
 And did you speak to him again?
 How strange it seems and new!

But you were living before that,
 And also you are living after;
 And the memory I started at—
 My starting moves your laughter!

I crossed a moor, with a name of its own
 And a certain use in the world no doubt,
 Yet a hand's-breadth of it shines alone
 'Mid the blank miles round about:

For there I picked up on the heather,
 And there I put inside my breast
 A molted feather, an eagle-feather!
 Well, I forget the rest.

- 4¹⁰. Express the thought of the following paragraph in a sentence or two:
 All infractions of love and equity in our social relations are speedily punished. They are punished by Fear. Whilst I stand in simple relations to my fellow man, I have no displeasure in meeting him. We meet as water meets water, or a current of air meets another, with perfect diffusion and interpenetration of nature. But as soon as there is any departure from simplicity and attempt at halfness, or good for me that is not good for him, my neighbor feels the wrong; he shrinks from me as far as I have shrunk from him; his eyes no longer seek mine; there is war between us; there is hate in him, and fear in me.
- 5³⁵. Write in several paragraphs a composition of about 350 words on one of the following items:
 a. The Romantic Movement in English Literature.
 b. The benefits I have gained from a study of Shakespeare's plays.
 c. The value to me of the study of Literature.
 d. Name an essay or oration which seems to you to offer valuable suggestions for the solution of some modern social or political problem. What is the problem? What are the author's suggestions? Why do you consider them valuable?

318. Read carefully the following poem.

GRASS

Pile the bodies high at Austerlitz and Waterloo
 Shovel them under and let me work—
 I am the grass; I cover all.

And pile them high at Gettysburg
 And pile them high at Ypres and Verdun.
 Shovel them under and let me work,
 Two years, ten years, and passengers ask the conductor:
 What place is this?
 Where are we now?

I am the grass.
 Let me work.

—*Sandburg.*

In your own words express the thoughts of this poem.

44. Write in several paragraphs a composition of at least 300 words on *one* of the following subjects.
- Contemporary American literature.
 - My favorite character in fiction.
 - The Victorian period in English literature.
 - My favorite novel.

APPENDIX C

ADDITIONAL CAUSES FOR PHYSICAL DISQUALIFICATION. (SEE PAR. 43)

a. In general:

- (1) Any deformity which is repulsive or which prevents the proper functioning of any part to a degree interfering with military efficiency.
- (2) Obesity when so marked as to interfere with marching or military duties.
- (3) A height of more than 78 inches.
- (4) Deficient muscular development.
- (5) Deficient nutrition.
- (6) Evidences of physical characteristics of congenital asthenia. The physical characteristics of congenital asthenia are slender bones, a weak ill-developed thorax, nephroptosis, gastroptosis, constipation, the "drop" heart, with its peculiar attenuation and weak and easily fatigued musculature.
- (7) All acute communicable diseases.
- (8) All diseases and conditions which are not easily remediable or that tend physically to incapacitate the individual, such as—
 - (a) Chronic malaria and malarial cachexia.
 - (b) Severe uncinariasis.
 - (c) Tuberculosis, of whatever degree and whether general or localized.
 - (d) Leprosy and actinomycosis.
 - (e) Pellagra and beriberi.
 - (f) Recurrent attacks of rheumatic fever, chronic articular rheumatism, and chronic arthritis.
 - (g) Cellulitis and osteomyelitis.
 - (h) Malignant disease of all kinds in any location.
 - (i) Hemophilia and purpura.
 - (j) Leukemia of all types.
 - (k) Pernicious anemia.
 - (l) Splenic anemia.
 - (m) Filariasis and trypanosomiasis.
 - (n) Diabetes mellitus or insipidus.
 - (o) Acromegaly, gigantism, myxoedema, cretinism, Addison's disease, and other endocrine diseases.
 - (p) Chronic metallic poisoning.

b. The skin:

- (1) Eczema of long standing or which is rebellious to treatment.
- (2) Chronic impetigo, pemphigus, lupus, or syccosis.
- (3) Actinomycosis, dermatitis, herpiformis, or mycosis fungoides.
- (4) Psoriasis, or marked ichthyosis.
- (5) Acne upon face or neck, which is so pronounced as to amount to positive deformity.
- (6) Elephantiasis.
- (7) Pediculosis or scabies.
- (8) Carbuncle.
- (9) Ulcerations of the skin not amenable to treatment, or those of long standing, or of considerable extent, or of syphilitic or malignant origin.
- (10) Extensive, deep, or adherent scars that interfere with muscular movements or with the wearing of military equipment, or that show a tendency to break down and ulcerate.
- (11) Nævi and other erectile tumors, if extensive, disfiguring, or exposed to constant pressure.
- (12) Obscene, offensive, or indecent tattooing on portions of the body subject to exposure.

c. *The head:*

- (1) Tinea in any form.
- (2) All tumors which are of sufficient size to interfere with the wearing of military headgear.
- (3) Imperfect ossification of the cranial bones, or persistence of the anterior fontanelles.
- (4) Extensive cicatrices, especially such adherent scars as show a tendency to break down and ulcerate.
- (5) Depressed fractures or depressions, or loss of bony substance of the skull, unless the examiner is certain the defect is slight and will cause no future trouble.
- (6) Monstrosity of the head, or hydrocephalus.
- (7) Hernia of the brain.
- (8) Deformities of the skull of any degree associated with evidence of diseases of the brain, spinal cord, or peripheral nerves.

d. *The face:*

- (1) Extreme ugliness.
- (2) Unightly deformities, such as large birthmarks, large hairy moles, extensive cicatrices, mutilations due to injuries or surgical operations, tumors, ulcerations, fistulae, atrophy of a part of the face or lack of symmetrical development.
- (3) Persistent neuralgia, tic doloieux, or paralysis of central nervous origin.
- (4) Ununited fractures of the maxillary bones, deformities of either maxillary bone interfering with mastication or speech, extensive exostosis, caries, necrosis, or osseous cysts.
- (5) Chronic arthritis of the temporo-maxillary articulation, badly reduced or recurrent dislocations of this joint, or ankylosis, complete or partial.

e. *The mouth, nose, fauces, pharynx, larynx, trachea, and œsophagus:*

- (1) Harelip, loss of the whole or a large part of either lip, unsightly mutilations of the lips from wounds, burns, or disease.
- (2) Malformation, partial loss, atrophy or hypertrophy of the tongue, split or bifid tongue, or adhesions of the tongue to the sides of the mouth, provided these conditions interfere with mastication, speech, or swallowing, or appear to be progressive.
- (3) Malignant tumors of the tongue, or benign tumors that interfere with its functions.
- (4) Marked stomatitis, or ulcerations, or severe leukoplakia.
- (5) Ranula if at all extensive, or salivary fistula.
- (6) Perforation or extensive loss of substance or ulceration of the hard or soft palate, extensive adhesions of the soft palate to the pharynx, or paralysis of the soft palate.
- (7) Loss of the nose, malformation, or deformities thereof that interfere with speech or breathing, or extensive ulcerations.
- (8) Perforated nasal septum, if progressive, or if respiration is accompanied by a noticeable whistling sound. Before accepting any applicant with a perforated nasal septum the possibility of syphilitic infection will be excluded.
- (9) Nasal obstruction due to septal deviation, hypertrophic rhinitis, or other causes, if sufficiently severe to interfere materially with breathing.
- (10) Acute or chronic inflammation of the accessory sinuses of the nose, or hay fever.
- (11) Chronic atrophic rhinitis, if marked and accompanied by ozena.
- (12) Malformations and deformities of the pharynx of sufficient degree to interfere with function.
- (13) Postnasal adenoids interfering with respiration or associated with progressive middle-ear disease.
- (14) Chronic enlargement of the tonsils sufficient to interfere with speech or swallowing.
- (15) Chronic laryngitis from any cause.
- (16) Paralysis of the vocal cords, or aphonia.
- (17) Tracheotomy.
- (18) Stricture or pronounced dilation of the œsophagus.

f. The neck:

- (1) Cervical adenitis of other than benign origin, including cancer, Hodgkin's disease, leukemia, tuberculosis, syphilis, etc.
- (2) Adherent and disfiguring scars from disease, injuries, or burns.
- (3) Extensive or progressive goiter interfering with breathing or with the wearing of military clothing.
- (4) Exophthalmic goiter, or myxoedema.
- (5) Thyroid enlargement from any cause associated with toxic symptoms.
- (6) Benign tumors or cysts which are so large as to interfere with the wearing of a uniform or military equipment.
- (7) Torticollis.

g. The spine:

- (1) Lateral deviation of the spine from the normal midline of more than 2 inches (scoliosis).
- (2) Curvature of the spine of any degree in which function is interfered with, or in which there is noticeable deformity when the applicant is dressed (scoliosis, kyphosis, or lordosis).
- (3) Fractures or dislocations of the vertebrae.
- (4) Vertebral caries (Pott's disease).
- (5) Abscess of the spinal column or its vicinity.
- (6) Osteoarthritis of the spinal column, partial or complete.
- (7) Fracture of the coccyx.

h. The chest:

- (1) Deficient expansion of the chest.
- (2) Congenital malformations or acquired deformities which result in reducing the chest capacity and diminishing the respiratory functions to such a degree as to interfere with vigorous physical exertion, or that produce disfigurement when the applicant is dressed.
- (3) Pronounced contractions of the chest with adhesions following pleurisy or empyema.
- (4) Deformities of the scapulae sufficient to interfere with the carrying of military equipment.
- (5) Absence or faulty development of the clavicle.
- (6) Old fracture of the clavicle where there is much deformity or interference with the carrying of military equipment, ununited fractures, or partial or complete dislocation of either end of the clavicle.
- (7) Suppurative periostitis or caries or necrosis of the ribs, the sternum, the clavicles, or the scapulae.
- (8) Old fractures of the ribs with faulty union, if interfering with function.
- (9) Tumors of the breast or chest wall which interfere with the wearing of a uniform or of military equipment.
- (10) Unhealed sinuses of the chest wall following operation.
- (11) Scars of old operations for empyema unless the examiner is assured that the respiratory function is entirely normal.

i. The lungs:

- (1) Active pulmonary tuberculosis.
- (2) Inactive pulmonary tuberculosis.
- (3) Acute or chronic pleurisy, or empyema.
- (4) Pneumothorax or hydrothorax.
- (5) Chronic bronchitis, chronic pneumonia, pulmonary emphysema, asthma, or bronchiectasis.
- (6) Actinomycosis, hydatid cysts, or abscess of the lung.
- (7) Tumor of lungs, pleura or mediastinum.

j. The heart and blood vessels:

All questionable findings will be thoroughly investigated over a sufficient period of time to determine their significance. Any evidences of organic heart disease will be considered as cause for rejection. When a candidate is found to have a systolic blood pressure of 140 mm or more, or a diastolic blood pressure of 90 mm or more, a series of readings will be taken over a period of 3 or more days in order to determine if the arterial hypertension is constant and, if possible, the causes thereof.

- (1) All valvular diseases of the heart.
- (2) Hypertrophy or dilatation of the heart.

- (3) Pericarditis, endocarditis, myocarditis, or angina pectoris.
- (4) A heart rate of 100 or over, or of 50 or under, when these are proved to be persistent in the recumbent posture and on observation and reexamination over a sufficient period of time.
- (5) Marked cardiac arrhythmia or irregularity.
- (6) Arteriosclerosis.
- (7) A persistent systolic blood pressure of 140 mm or more, or a persistent diastolic blood pressure of 90 mm or more, or an unstable blood pressure.
- (8) Aneurysm of any variety in any situation.
- (9) Intermittent claudication.
- (10) Raynaud's disease.
- (11) Thrombophlebitis of one or more extremities if there is a persistence of the thrombus or any evidence of obstruction to circulation in the involved vein or veins.

k. *The abdomen:*

- (1) Wounds, injuries, cicatrices, or muscular ruptures of the abdominal walls sufficient to interfere with function.
- (2) Fistulae from visceral or bony lesions or following operation.
- (3) Hernia of any variety.
- (4) Large tumors of the abdominal walls.
- (5) Scar pain, if severe.
- (6) Chronic diseases of the stomach and intestines.
- (7) Gastroenterostomy for relief of gastric or duodenal ulcer.
- (8) Blood in the feces, unless shown to be due to unimportant causes.
- (9) Ptosis of the stomach or intestines.
- (10) Chronic appendicitis.
- (11) Chronic diseases of the liver, gall bladder, pancreas, or spleen.
- (12) Chronic peritonitis or peritoneal adhesions.
- (13) Chronic enlargement of the liver.
- (14) Chronic enlargement of the spleen, if marked.
- (15) Jaundice.
- (16) Proctitis or stricture of the rectum.
- (17) Hemorrhoids.
- (18) Fistula in ano.
- (19) Incontinence of feces.
- (20) Uncinariasis, if attended with marked anemia or other evidence of grave constitutional disturbance.

l. *The pelvis, including the sacro-iliac and lumbo-sacral joints:*

- (1) Malformation and deformities of the pelvis sufficient to interfere with function.
- (2) Disease of the sacro-iliac or lumbo-sacral joints.
- (3) Urinary fistula.
- (4) Stricture or prolapse of the rectum.
- (5) Fissure of the anus or pruritis ani.
- (6) Fistula in ano or ischio-rectal abscess.
- (7) External hemorrhoids sufficient in size to produce marked symptoms. Internal hemorrhoids, if large or accompanied by hemorrhage or protruding intermittently or constantly.

m. *The genito-urinary system, including venereal diseases:*

The Wassermann test will be required for all candidates. If facilities exist at the station where the examination is conducted the Kahn test will also be made. Whenever a single or a double plus Wassermann reaction or a 3-plus or a 4-plus Kahn reaction is obtained, a second test will be made. If the second test be negative, a third test will be performed. Two single-plus or double-plus Wassermann reactions or two 3-plus or 4-plus Kahn reactions are cause for rejection.

If albumin or casts are found in the urine, the cause will be determined, if possible. In the absence of demonstrable cause urine containing albumin or casts will be analyzed on three successive days. Persistent albuminuria or the persistent presence of casts in the urine is a cause for rejection, even though the cause thereof cannot be determined.

- (1) Acute or chronic nephritis, or diabetes mellitus or insipidus.
- (2) Blood, pus, albumin, or casts in the urine, if persistent.

- (3) Floating kidney, hydronephrosis, pyonephrosis, pyelitis, tumors of the kidney, or renal calculi.
- (4) Acute or chronic cystitis.
- (5) Vesical calculi, tumors of the bladder, incontinence of urine, enuresis, or retention of urine.
- (6) Hypertrophy or abscess of the prostate gland, or chronic prostatitis.
- (7) Urethral stricture or urinary fistula.
- (8) Epispadias or hypospadias.
- (9) Phimosis.
- (10) Hermaphroditism.
- (11) Amputation of or deformity of the penis.
- (12) Varicocele, if large and painful, or hydrocele if large.
- (13) Atrophy or maldevelopment of both testicles or loss of both.
- (14) Undescended testicle of any degree. Infantile genital organs.
- (15) Chronic orchitis or epididymitis.
- (16) Syphilis in any stage.
- (17) Gonococcus infections, acute or chronic (including gonorrheal arthritis) chancroids, or buboes.

n. The extremities:

Suitable exercise will be employed to determine the strength of the arches of the feet. Weak or painful feet are a cause for rejection regardless of whether or not the arch is flattened. In reporting the presence of flat feet a careful estimate of the degree of flattening as first, second, or third degree will be made and reported, as well as other abnormalities, such as eversion, rotation, etc.

- (1) All anomalies in the number, the form, the proportion, and the movements of the extremities which produce noticeable deformity or interfere with function.
- (2) Atrophy of the muscles of any part, if progressive or if sufficient to interfere with function.
- (3) Benign tumors if sufficiently large to interfere with function.
- (4) Ununited fractures, fractures with shortening or callous formation sufficient to interfere with function, old dislocations unreduced or partially reduced, complete or partial ankylosis of a joint, or relaxed articular ligaments permitting of frequent voluntary or involuntary displacement.
- (5) Reduced dislocations or united fractures with incomplete restoration of function.
- (6) Amputation of any portion of a limb, except fingers or toes, or resection of a joint.
- (7) Excessive curvature of a long bone or extensive, deep, or adherent scars interfering with motion.
- (8) Severe sprains.
- (9) Diseases of the bones or joints.
- (10) Chronic synovitis, or floating cartilage, or other internal derangement in a joint.
- (11) Varicose veins in an extremity when they cover a large area or are markedly tortuous or much dilated, or are associated with oedema, varicocele, or hemorrhoids, or are accompanied by subjective symptoms.
- (12) Varices of any kind situated in the leg below the knee if associated with varicose ulcers or scars from old ulcerations.
- (13) Chronic oedema of a limb.
- (14) Chronic and obstinate neuralgias, particularly sciatica.
- (15) Deviation of the normal axis of the forearm to such a degree as to interfere with the proper execution of the manual of arms.
- (16) Adherent or united fingers (web fingers).
- (17) Permanent flexion or extension of one or more fingers, as well as irremediable loss of motion of these parts, if sufficient to interfere with proper execution of the manual of arms.
- (18) Total loss of either thumb.
- (19) Mutilation of either thumb to such an extent as to produce material loss of flexion or strength of the member.

- (20) Loss of more than one phalanx of the right index finger.
- (21) Loss of the terminal and middle phalanges of any two fingers on the same hand.
- (22) Entire loss of any finger except the little finger of either hand, or the ring finger of left hand.
- (23) Perceptible lameness or limping.
- (24) Knock-knee when the applicant is unable to take the position of a soldier, when the gait is clumsy or ungainly, or when subjective symptoms of weakness are present.
- (25) Bowlegs if so marked as to produce noticeable deformity when the applicant is dressed.
- (26) Clubfoot unless the defect is so slight as to produce no symptoms during vigorous exercise.
- (27) Pes cavus if extreme and causing symptoms.
- (28) Flat foot when accompanied with symptoms of weak foot or when the foot is weak on test. Pronounced cases of flat foot attended with decided eversion of the foot and marked bulging of the inner border, due to inward rotation of the astragalus, are disqualifying regardless of the presence or absence of subjective symptoms.
- (29) Loss of either great toe or loss of any two toes on the same foot.
- (30) Webbing of all the toes.
- (31) Overriding or superposition of any of the toes to such a degree as will produce pain when wearing the military shoes.
- (32) Ingrowing toe nails when marked or painful.
- (33) Hallux valgus when sufficiently marked to interfere with locomotion or when accompanied with a painful bunion.
- (34) Bunions sufficiently pronounced to interfere with function.
- (35) Hammer toes when existing to such a degree as to interfere with function when wearing the military shoe.
- (36) Corns or callous on the sole of the foot when they are tender or painful.
- (37) Hyperidrosis or bromidrosis when presented to a marked degree.
- (38) Habitually sodden feet with blistered skin.

o. The nervous system:

- (1) Insanity, epilepsy, or convulsions of any character, or history thereof.
- (2) Idiocy, imbecility, mental deficiency, or moronism (an applicant having a mental age of 10 years or less).
- (3) Constitutional psychopathic states.
- (4) Chronic alcoholism or drug addiction.
- (5) Locomotor ataxia, paresis, or cerebrospinal syphilis.
- (6) Multiple sclerosis, syringomyelia, paralyses, paraplegia, monoplegia, hemiplegia, or hemiparesis.
- (7) Psychoneurosis, neurasthenia, psychasthenia, hysteria, hysterical paralysis, or hysterical stigmata.
- (8) Chorea or marked muscular tremors.
- (9) Somnambulism, or history thereof.
- (10) Neuritis, beriberi, or severe neuralgia.
- (11) Muscular atrophies and dystrophies.
- (12) Stuttering or stammering of such degree that it would interfere with performance of military duties.
- (13) Unequal or irregular pupils, unless cause is definitely determined to be other than neurological.
- (14) Brain tumors.
- (15) History of having been committed to an institution for the care of the insane.
- (16) History of injury to skull, with secondary symptoms, or any evidence of impaired nervous function.
- (17) History of excessive nervousness, or depression to an undue extent.
- (18) Endocrine disturbances that can be diagnosed by ordinary examination.
- (19) Injuries involving peripheral nerves which result in impaired function to an extent that would interfere with the performance of military duty.
- (20) Other organic or severe functional diseases of the nervous system.
